

FINAL SUMMARY OF STUDENT'S PROGRESS AND DEVELOPMENT

Firelands Regional Medical Center School of Nursing Faculty Manual

NAME OF STUDENT (LAST)	(FIRST)	(MIDDLE)
Suresh	Livia	Thulsi-Joan

1. Describe your outstanding personality characteristics (relevant to nursing) possessed at the completion of the program:

With this program, a personality characteristic I obtained was being personable with patient's. It was something I was nervous about at first because I have been used to a more technical setting in patient care that did not involve much patient interaction because they would be under anesthesia. But now I enjoy speaking with patients and getting to know them and their life story. I think I have a personality characteristic that truly empathizes with patients.

2. Describe your special interests and abilities in nursing:

I love doing nursing interventions that involve skill and technique. For example, since learning IV's it's been really fun seeking out opportunities to practice them and become better at them. I'm currently interested in recovering patients post-operatively and assessing for any surgical complications.

3. Discuss your experiences with interpersonal relationships – faculty and staff, patients and their families, and members of the healthcare team throughout the nursing program:

My experience with interpersonal relationships throughout the program have been good. It's always nerve-racking being a student, because it's hard to not feel in the way while at clinicals. But I came across a lot of nurses who liked helping students and teaching them. The staff have been easy to talk with and have been really helpful throughout this entire program. And I've met some classmates who have become forever friends.

4. Participation in activities throughout the program:

In the program I participated in taking blood pressures for the community at the Sandusky Farmer's Market. Majority of my free-time in this program however involved working and taking call in my current job. I hope to have more time in the future to give back to the community.

5. Explain at least 2 professional goals you would like to achieve during your nursing career:

Two goals I would like to achieve are obtaining my BSN and getting my ACLS. I used to have a goal of becoming a CNOR and RNFA in the operating room, which still might be a goal later in life, but now I have switched focus to bedside nursing and how I can help a patient in that setting.

6. List your address at the time of graduation- Include a future address if known:

1110 Hollyood Road, Sandusky, Ohio 44870
