EVALUATION OF CLINICAL PERFORMANCE TOOL
Advanced Medical Surgical Nursing- 2023

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

Student: Alicia McGraw

Final Grade: Satisfactory/Unsatisfactory

Semester: Spring

Date of Completion:

Faculty: Frances Brennan, MSN, RN; Amy M. Rockwell, MSN, RN
Chandra Barnes, MSN, RN; Brian Seitz, MSN, RN, CNE
Brittany Lombardi, MSN, RN

DIRECTIONS FOR USE:
Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S), Needs Improvement (NI), Unsatisfactory (U), and Not Available (NA).** The faculty member will initial if in agreement with the student's evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written in the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a "S, NI, U, or NA". If the student does not self-rate, then it is an automatic "U". A student who submits the clinical evaluation tool late will be rated as "U" in the appropriate competency(s) for that clinical week. Whenever a student receives a "U" in a competency, it must be addressed with a comment as to why it is no longer a "U" the following week. If the student does not state why the "U" is corrected, it will be another "U" until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. If the final performance code is unsatisfactory or needs improvement in any one of the competencies, a grade of unsatisfactory is given. If a pattern of unsatisfactory performance occurs after performing the competency satisfactorily, this also constitutes a grade of unsatisfactory. An unsatisfactory or needs improvement as a final score in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.

METHODS OF EVALUATION:
Clinical Assignments
Completion of Patient Care
Meditech Documentation
Observation of Clinical Performance
Evaluation of Clinical Performance Tool
Onsite Clinical Debriefing
Clinical Discussion Rubric
Preceptor Feedback
Nursing Care Map Rubric
Skills Lab Checklists/Competency Tool
Lasater Clinical Judgment Rubric
Virtual Simulation scenarios
Pathophysiology Grading Rubric
SBAR/Physician Orders Rubric
Hand-Off Report Competency Rubric

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S):   Safe; accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback needed related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI):   Safe, accurate each time, skillful in parts of behavior, focuses more on the skill and self rather than the patient, inefficient, uncoordinated, anxious, worried, and flustered at times, expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues, faculty feedback required in several areas of clinical written work.

Unsatisfactory (U):   Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA):   The clinical experience which would meet the competency was not available.

Grey shaded weekly competency boxes do not need a student evaluation rating or faculty/teaching assistant initials.

Objective

1. Engage in the coordination and delivery of nursing care measures to groups of patients and to patients with complex problems. (1,3,4,5,7,8)*

Comments:

Week 2 (3a,b,c) These competencies will be completed during a future clinical experience, therefore they were changed to a NA. (3d,e)- Great discussion, noticing accountability of delegation and the clarification of roles. You also did a great job interpreting facts to determine the need for prioritization of assigned patient during this clinical rotation. FB

Week 3 (3e) Satisfactory during both days of Patient Management this week. RN comments: 1/24- "Excellent in all areas, but Delegation (Satisfactory) Alicia demonstrated competence in all patient care provided today. Asked relevant questions and was able to demonstrate new skills learned."; 1/25- "Excellent in all areas, but Establishment of Plan of Care and Delegation (Satisfactory). Alicia did very well today, and works well independently." Satisfactory discussion via CDG posting related to your Patient Management experience. Keep it up! AR

Week 4 (3d,e)- You have demonstrated the process of delegation, responsibility, and accountability of the interdisciplinary team members. Great job determining priority care of assigned patients and the priority patient of assigned patients. Keep up the great work! FB

Week 5 (3b)- Satisfactory during Quality/Core Measures observation and with discussion via CDG posting. RN comments: Stroke- "Satisfactory in all areas. Good luck in OR or OB!"; Core Measures- "Satisfactory in all areas."; Rapid Response and Standards of Care- "Excellent in all areas." Great job! AR

Week 1 Lab comments:

Meditech: Satisfactory participation of assessment documentation including physical re-assessment, safety and fall assessment, RN mechanical ventilator assessment, IV location assessment, and documentation editing. Great job! FB

Physician Orders: Satisfactory completion of physician's order lab per the SBAR skills competency rubric. You utilized SBAR communication while communicating with a physician and while taking orders over the phone. Good job! CB/BS

Prioritization/Delegation: Satisfactory completion of the prioritization and delegation skills lab. You satisfactorily prioritized care for multiple patients using multiple methods (e.g. Maslow's hierarchy of needs, ABC, Nursing Process, etc.). You were able to appropriately delegate nursing tasks for the patients, and you actively participated in the group discussion on delegation of nursing tasks. Great job! BL

Resuscitation: Satisfactory participation in the practice of Hands-Only CPR, discussion regarding use of and ventilation with bag- valve mask/Ambu bag, and review of crash cart and Code Blue team duties and documentation. AR

IV Starts: Satisfactory participation in the IV Start lab, including practice with technique, initiation and discontinuation of IV site, and placement of IV dressing. FB/BS/CB/BL

Blood administration/IV pump: Satisfactory completion of practice with blood administration safety checks and quality assurance audit. Great job with IV pump practice, the use of the medication library, and pump set up of primary and secondary IV medication infusion. AR

Central Line Dressing/IV push: Satisfactory central line dressing change using proper technique, as well as line flushing. Great job with preparation of mixing a medication with normal saline and administering as an IV push through the central line. FB

Ports/Blood Draw: You were satisfactory in accessing an Infusaport device, demonstrated proper technique for CVAD cap change and satisfactorily demonstrated how to draw blood from a CVAD per hospital policy. Nice work! CB

Head to Toe Assessment: You are satisfactory for the head-to-toe assessment competency. Nice Job! BL/BS

ECG/Telemetry/Chest Tube: Satisfactory participation with review of monitoring tutorial and

SCENARIO: Week 8 Simulation
OBSERVATION DATE/TIME(S): February 27, 2023 0800-1000

CLINICAL JUDGMENT COMPONENTS					OBSERVATION NOTES
NOTICING: (1,2)*					Notices patient is complaining of fatigue and nausea. Notices patient's SpO2 is 93% on room air. Notices patient's heart rate is low and rhythm is sinus bradycardia. Notices patient's heart rate decreases to 29 and has a change in heart rhythm. Notices patient has a rhythm change after Atropine is administered with continued decreasing heart rate.
• Focused Observation:	E	A	D	B	
• Recognizing Deviations from Expected Patterns:	E	A	D	B	Notices patient's heart rate is elevated and rhythm is abnormal. Notices patient is short of breath, complaining of dizziness and palpitations. Notices patient's heart rhythm and rate is unchanged after administering medication. Notices patient is complaining of dizziness and blood pressure is decreased. Notices patient has crackles after fluid bolus is administered.
• Information Seeking:	E	A	D	B	
					Initially does not notice patient is unresponsive without a pulse.
INTERPRETING: (1,2)*					Interprets patient's SpO2 as low. Interprets patient's initial heart rhythm as sinus bradycardia. Interprets patient's heart rhythm change as a second degree type II heart block. Recognizes a need for medication to increase heart rate. Interprets Atropine dose as 1 mg IVP. Initially interprets patient's second heart rhythm change as a first degree heart block; then interprets it as a third degree heart block.
• Prioritizing Data:	E	A	D	B	
• Making Sense of Data:	E	A	D	B	Interprets patient's heart rhythm as atrial fibrillation; then sinus tachycardia. Recognizes a need for medication to decrease heart rate. Interprets dose of diltiazem as 25 mg IV to be given over 15 minutes. Prioritizes medication administration. Prioritizes stopping the fluid bolus.
					Initially interprets patient's heart rhythm as ventricular tachycardia with a pulse; then realizes patient is pulseless. Interprets correct dose of medications. Interprets patient's low potassium as a potential cause for cardiac arrest.
RESPONDING: (1,2,3,5,6,7)*					Introduces self and identifies patient. Obtains patient's vital signs. Puts the patient on 2L oxygen via nasal cannula. Completes a focused GI assessment. Notifies the physician of patient's low heart rate and sinus bradycardia rhythm. Notifies the physician of patient's continued decreasing heart rate and rhythm change to second degree type II heart block. Places fast patches on patient. Rechecks patient's vital signs. Administers 1 mg of Atropine IVP. Notifies physician of heart rhythm change for a second time with a decreasing heart rate.
• Calm, Confident Manner:	E	A	D	B	
• Clear Communication:	E	A	D	B	
• Well-Planned Intervention/ Flexibility:	E	A	D	B	
• Being Skillful:		E	A	D	
B					Introduces self and identifies patient. Obtains patient's vital signs. Places patient on the monitor. Asks the patient to bear down. Places the patient on 2L oxygen via nasal cannula. Notifies physician that patient is in atrial fibrillation with a heart rate of 160. Reassures patient and communicates calmly. Administers diltiazem bolus. Reassesses patient, obtains vital signs.

	Increases patient's oxygen. Notifies physician that patient's heart rate and rhythm is unchanged after medication administration. Administers diltiazem 10 mg/hr IV. Reassesses patient and obtains vital signs. Notifies physician of decreased blood pressure with unchanged heart rhythm and rate. Administers a bolus of fluids to increase blood pressure. Reassesses patient. Notifies physician of fluid overload. Places patient on monitor and obtains vital signs. Calls physician. Assesses patient's radial pulse. Begins CPR, applies fast patches. Administers epinephrine 1 mg IVP. Reassesses pulse. Defibrillates patient. Begins CPR.
REFLECTING: (1,2,5)* • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D B	Discussed first scenario, identification and treatments for symptomatic bradycardias. Reviewed chart to look for causes of heart block (metoprolol, patient history). Talked about holding medication to see if sinus rhythm will be restored. Alternate drugs for complete heart block discussed (epi, dopamine). Discussed pacing options for symptomatic bradycardias (transcutaneous, transvenous, permanent). Talked about the importance of adjusting electrical current to obtain capture, need for medication). Excellent teamwork! Discussed recognition of A-fib and associated symptoms. Talked about goals of diltiazem therapy. Explanation and demonstration of synchronized cardioversion; discussed differences between cardioversion and defibrillation, the need for sedating medications prior to delivering shock. Great teamwork and communication. Discussed the importance of immediate CPR and defibrillation with pulseless v-tach. Discussed alternative to epi (amiodarone). Roles of the code team discussed (recorder, CPR, airway, meds, lead). Potential causes of code blue discussed (review of chart reveals low K+). Defibrillation discussed, starting low and increasing joules with subsequent shocks. Excellent job!

SUMMARY COMMENTS: * = Course Objectives

Satisfactory completion of the simulation scenario is a score of "Developing" or higher in all areas of the rubric.

E= Exemplary

A= Accomplished

D= Developing

B= Beginning

Scenario Objectives:

- **Differentiate the clinical characteristics and ECG patterns of common dysrhythmias. (1,2)***
- **Choose nursing interventions for patients who are experiencing dysrhythmias. (1)***
- **Differentiate between defibrillation and cardioversion. (1,2,6)***
- **Communicates collaboratively to other healthcare providers utilizing SBAR. (3,5,6,7)***

Lasater Clinical Judgement Rubric Comments:

Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs. Recognizes most obvious patterns and deviations in data and uses these to continually assess. Assertively seeks information to plan intervention; carefully collects useful subjective data from observing and interacting with the patient and family.

Interpreting: Focuses on the most relevant and important data useful for explaining the patient's condition. In most situations, interprets the patient's data patterns and compares with known patterns to develop an intervention plan and accompanying rationale; the exceptions are rare or in complicated cases where it is appropriate to seek the guidance of a specialist or a more experienced nurse.

Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations. Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport. Interventions are tailored for the individual patient; monitors patient progress closely and is able to adjust treatment as indicated by patient response. Displays proficiency in the use of most nursing skills; could improve speed or accuracy.

Reflecting: Independently evaluates and analyzes personal clinical performance, noting decision points, elaborating alternatives, and accurately evaluating choices against alternatives. Demonstrates commitment to ongoing improvement; reflects on and critically evaluates nursing experiences; accurately identifies strengths and weaknesses and develops specific plans to eliminate weaknesses.

You are satisfactory for this simulation. Great job!

EVALUATION OF CLINICAL PERFORMANCE TOOL
Advanced Medical Surgical Nursing- 2023

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
