Patients often use the Internet to search for health-related issues. Search the Internet for any health-related issue of your choosing. Evaluate the website by answering the following questions:

1. Do the authors have qualifications listed? What are their qualifications? What is the domain? (.gov, .edu, .org) <https://my.clevelandclinic.org/about/website/reprints-licensing> Did not have any authors on this website, but it was from the Cleveland clinic and it is an organization.
2. When was the site created? When was the site last updated or revised? This site was updated in 2023. I do not see a date when it was created.
3. Who is the targeted audience? Does the web site present facts or opinions? Targeted audience are the people who think they may have hypothyroidism to make an appointment with the Cleveland Clinic. The site presents facts.
4. How complete and accurate is the content information? This site is accurate with its contents it does come from a reputable source. Does it agree with other expert sources? Yes, it does agree with the Lewis text book.
5. Does the site load quickly? Is it a secured site? Are there graphics, or pictures on the page that serve a purpose? If so what are they and how do they relate to the health issue? The site loaded quickly and is a secured site I think. I am not sure how to check this. Yes, there are graphics and pictures to the right of this page. This graphics are advertisements from Sephora, credit card application, and workout equipment. These graphics do not relate to health issues maybe the exercise equipment to help with strengthening, to lose weight and get fit.
