

Boys and girls club Clinical – Stranger Danger

Destiny Hamman, Taylor Fox, Briana Busby, Veronica Cromwell, Natasha Doughty, and Katelyn Elmlinger

Activities

A beaded bracelet that has a Parents or caregivers phone number on the bracelet just in case they get lost in public. We will have a whistle attached to it for safety if they encounter a strange person.

The bracelets would be a mix of these two incorporating the phone number and whistle.

We also have two worksheets which will be included below as a link for you to look at them. We all agreed both activities would be appropriate for all age groups at the boys and girls club.

Questions

What do we think a stranger is?

What is a safe stranger?

What do we do if a stranger approaches us?

What should you do if you get lost in public?

ACE

We are incorporating care values of caring, diversity, and enthusiasm by educating different age groups about stranger safety. We have different activities for different age groups and ability levels so everyone feels included and is learning.

Participation

All 6 of us in the group will be actively involved in each of these activities and helping the kids learn about stranger safety. We will be helping the kids make these bracelets and helping with the worksheet to help be active in the club and better educate the kids.
