Firelands Regional Medical Center School of Nursing
Nursing Foundations 2023
Skills Lab Competency Tool

Student Name: Kaden Troike

Comments:

Week 1 (Technology Lab):

During this lab you were able to satisfactorily navigate:

- Edvance360 Learning Management System.
- Skyscape Resource System.
- Assessment Technologies Institute (ATI) / Virtual Simulation (vSim) Systems.
- Guided tour of library and computer lab. AR

Week 2 (Hand Hygiene; Vital Signs; PPE):

During lab this week you were able to satisfactorily demonstrate:

- Appropriate hand hygiene utilizing hand sanitizer and soap/water.
- Accurate verbalization of procedure for donning & doffing PPE.
- Appropriate level of skill during guided practice with measurement of radial and brachial pulses, along with manual blood pressure. Vital signs skills will be observed 1:1 with faculty during Week 3. Keep up the good work! AR

Week 3 (Vital Signs):

Awesome work in the lab this week! You satisfactorily completed the vital sign check off during 1:1 observation, including oral temperature, radial pulse, respiratory rate, pulse oximetry, and blood pressure measurement. During the blood pressure measurement, you accurately obtained two consecutive blood pressure results on the Vital Sim manikin. The first blood pressure measurement was set at 158/96, and you identified it as 152/100, which was within the range for a satisfactory result. The second measurement was set at 122/84 and you interpreted it as 118/82, within the desired range. You were able to verbally discuss the following measurements: axillary and rectal temperature along with orthostatic vital sign assessments. You only required one prompt throughout the check-off related to obtaining a pulse rate in addition to the blood pressure when obtaining orthostatic vital signs. You provided accurate detail in your communication with the “patient”. Your documentation was spot on. Keep up the great work!! NS

Week 4 (Assessment):

Satisfactory with head to toe assessment guided practice, hand-off report activity, and Lexicomp/Intranet navigation activity. You will be observed 1:1 for Head to Toe Assessment competency during Week 5. NS

Week 5 (Assessment; Mobility):

Great job in lab this week! You have satisfactorily demonstrated a basic head to toe assessment in the skills lab. Your approach was systematic, thorough, and overall well done. You only required one prompt throughout your while check-off related to assessing the eyes for accommodation. You correctly identified lung sounds as crackles, nice job! You demonstrated friendly, professional, and informative communication. Great work! NS

Feedback on documentation this week: With this being the first time that you fully documented these interventions, there are some areas for improvement. You did a good job, overall, with your Meditech documentation. You documented on the interventions listed below; however, some areas were inaccurate or omitted. Please review each area of documentation so you can examine areas that were omitted. I want you to feel comfortable and confident with Meditech documentation.

- Pain – omitted “physician already aware” comment. Otherwise, accurate and complete.
- Vital signs - omitted “normal” for respiratory pattern. Otherwise, accurate and complete.
- Safety - omitted “Pneumonia” comment as reason for isolation. Added “altered awareness of immediate environment.” Omitted comment “education completed” for fall precautions.
- Physical assessment - omitted left ear documentation under HEENT assessment. Omitted lip condition as “dry.” Omitted oxygen delivery method as “nasal cannula” in the respiratory assessment, omitted oxygen humidified “no.” Omitted anterior lung sounds as expiratory wheezes/rhonchi, only posterior lung sounds documented. Omitted “Pacemaker/ICD present” as being yes. Cardiovascular parameters incorrectly identified as “yes” for within defined parameters. Omitted S1S2 heart sounds. Omitted all pulses under cardiovascular assessment. Omitted edema present under cardiovascular assessment.

Mobility Lab 9/21/2023: Satisfactory completion of mobility lab through demonstration of the following: Logrolling/turning a patient, lifting a patient in bed, repositioning from lying to sitting, repositioning from sitting to standing, stand/pivot transfer from a bed to a chair, ambulating with a walker, ambulating with crutches, ambulating with a cane, use of a gait belt, and safe use of a wheelchair. Proper body mechanics were utilized to promote safety for the health care worker and the patient. Great job with active participation throughout the duration of the lab. NS

Week 6 (Personal Hygiene Skills):

Satisfactory with patient hygiene, making an occupied bed, shaving, oral care, hearing aid care, application of ace wraps, TED Hose/SCD’s, and clinical readiness scenario during guided practice. Completed Meditech documentation for Hygiene and Ted Hose. Keep up the great work! AR

Week 7 (NG Skills: Insertion, Irrigation, and Removal; Feedings):

Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves; I&O, Documentation Lab):

Week 9 (Dressing Change: Dry Sterile, Damp to Dry Packed, Stoma Skills):

Week 10 (Safety; Infection Control; Prioritization; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP):

Week 11 (Medication Lab):

8/17/2023
