\*Course Objectives

**Comments:**

**Week 6 (Wound Care):** You have satisfactorily demonstrated competency in the skill of wound assessment and care (Sterile Damp to Dry Packed Dressing & Dry Sterile Dressing), as well as application of sterile gloves. Your skill performance was systematic, thorough, and was extremely deliberate in maintaining sterility. No prompting was required and no suggestions for improvement are necessary. Overall, very well done. Be sure to complete all required lab preparation noted in the Course Outline prior to all future labs. ATI is important but when it comes to the one-on-one checkoff, your skills checklist in the red folder and Edvance360 videos will be your main visual guide. This will provide you with a solid knowledge base that will make practice in the lab more efficient and confident. Additionally, you actively participated in activities associated with physical restraints and Meditech documentation related to wound care. With all future practice documentation, be sure to enter the Meditech Test environment to avoid documenting inappropriately on a real patient. This was your first experience with the Test environment and all documentation was removed successfully. In the end, no harm was done but this is a great lesson in paying closer attention to detail. Nice job this week! DW

**Week 9 (NG Insertion/Care):**

**Week 10 (Foley Insertion/Care):**

**Week 11 (Head to Toe Assessment):**

**Week 12 (Documentation):**
