EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2024

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

Student: Joshua Hernandez

Semester: **Spring**

Faculty: **Dawn Wikel,** MSN, RN, CNE**; Rachel Haynes,** MSN, RN**; Kelly Ammanniti,** MSN, RN, CHSE**;**
Monica Dunbar, DNP, RN;**Heather Schwerer,** MSN, RN;**Nick Simonovich,** MSN, RN

Teaching Assistant: **None**

Final Grade: **Satisfactory/Unsatisfactory**

Date of Completion:

Faculty eSignature:

DIRECTIONS FOR USE:

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S), Needs Improvement (NI), Unsatisfactory (U), and Not Available (NA).** The faculty member will initial if in agreement with the student's evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written on the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a "S, NI, U, or NA". If the student does not self-rate, then it is an automatic "U". A student who submits the clinical evaluation tool late will be rated as "U" in the appropriate competency(s) for that clinical week. Whenever a student receives a "U" in a competency, it must be addressed with a comment as to why it is no longer a "U". If the student does not state why the "U" is corrected, it will be another "U" until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. If the final performance code is unsatisfactory or needs improvement in any one of the competencies, a grade of unsatisfactory is given. If a pattern of unsatisfactory performance occurs after performing the competency satisfactorily, this also constitutes a grade of unsatisfactory. An unsatisfactory or needs improvement as a final score in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.

METHODS OF EVALUATION:

Skills Lab Competency Tool & Skills Checklists
Simulation, Prebriefing, & Reflection Journals
Nursing Care Map Rubric
Meditech Documentation
Clinical Debriefing
Clinical Discussion Group Grading Rubric
Evaluation of Clinical Performance Tool
Lasater's Clinical Judgment Rubric & Scoring Sheet
Virtual Simulation Scenarios

ABSENCE (Refer to Attendance Policy)

Date	Number of Hours	Comments	Make-up (/Date/Time)

Faculty's Name	Initials
Kelly Ammanniti	**KA**
Monica Dunbar	**MD**
Rachel Haynes	**RH**
Heather Schwerer	**HS**
Nick Simonovich	**NS**
Dawn Wikel	**DW**

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe, accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe; accurate each time; skillful in parts of behavior; focuses more on the skill and self rather than the patient; inefficient, uncoordinated, anxious, worried, flustered at times; expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues; faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool.   The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

*Grey shaded boxes do not need a student evaluation rating or faculty/teaching assistant initials.

Date	Care Map Top Nursing Priority	Evaluation & Instructor Initials	Remediation & Instructor Initials	Remediation & Instructor Initials

Note: Students are required to submit two satisfactory care maps over the course of the semester. If the care map is not evaluated as satisfactory upon initial submission, the student must revise the care map based on instructor feedback/remediation and resubmit. A maximum of two remediation attempts will be provided for a single care map and if still unsatisfactory, the student will be required to start fresh and initiate a care map on a new patient. At least one care map must be submitted prior to midterm.

Objective

1. Illustrate correlations to demonstrate the pathophysiological alterations in adult patients with medical-surgical problems. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:																	
a. Analyze the involved patho-physiology of the patient's disease process. (Interpreting)			S														
b. Correlate patient's symptoms with the patient's disease process. (Interpreting)			S														
c. Correlate diagnostic tests with the patient's disease process. (Interpreting)			S														
d. Correlate pharmacotherapy in relation to the patient's disease process. (Interpreting)			S														
e. Correlate medical treatment in relation to the patient's disease process. (Interpreting)			S														
f. Correlate the nutritional needs in relation to patient's disease process. (Interpreting)			S														
g. Assess developmental stages of assigned patients. (Interpreting)			S														
h. Demonstrate evidence of research in being prepared for clinical. (Noticing)	S		S														
Indicate your clinical site as well as your patient's age and primary medical diagnosis in this box weekly.	Meditech (room H) FSBS room (skills lab) IV Pump		3T 71years old,Syncopal episode														
Instructors Initials	**DW**																

Comments:

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Week 1 (1h)- During week 1, the Meditech, FSBS and IV pump sessions were all considered clinical hours. You came prepared to each of them and demonstrated competency accordingly. For this reason, you have earned an S for this competency. DW

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

2. Perform physical assessments as a method for determining deviations from normal. (3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies: a. Perform inspection, palpation, percussion, and auscultation in the physical assessment of assigned patient. (Noticing)			S														
b. Conduct a fall assessment and implement appropriate precautions. (Noticing)			S														
c. Conduct a skin assessment and implement appropriate precautions and care. (Noticing)			S														
d. Communicate physical assessment. (Responding)			S														
e. Analyze appropriate assessment skills for the patient's disease process. (Interpreting)			S														
f. Demonstrate skill in accessing electronic information and documenting patient care. (Responding)	S		S														
	DW																

Comments:

Week 1 (2f)- By attending the Meditech clinical update & providing your full, undivided attention during the demonstration of documenting insulin, IV solutions, and the Meditech 2.2 upgrades, you are satisfactory for this competency. NS

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions.   (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies: a. Perform standard precautions. (Responding)	S		S														
b. Demonstrate nursing measures skillfully and safely. (Responding)	S		S														
c. Demonstrate promptness and ability to organize nursing care effectively. (Responding)			S														
d. Appropriately prioritizes nursing care. (Responding)			S														
e. Recognize the need for assistance. (Reflecting)			S														
f. Apply the principles of asepsis where indicated. (Responding)	S		S														
g. Demonstrate appropriate skill with Foley catheter insertion, maintenance, & removal (Responding)			NA														
h. Implement DVT prophylaxis (early ambulation, SCDs, ted hose, administer enoxaparin or heparin) based on assessment and physicians' orders (Responding)			S														
i. Identify the role of evidence in determining best nursing practice. (Interpreting)	S		S														
j. Identify recommendations for change through team collaboration. (Reflecting)			S														
	DW																

Comments:

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies: k. Administer PO, SQ, IM, or ID medications observing the rights of medication administration. (Responding)			S														
l. Ensure patient safety through proper use of EHR, IV flow sheet, and BMV. (Responding)			S														
m. Calculate medication doses accurately. (Responding)			S														
n. Administer IV therapy, piggybacks, IV push, and/or adding solution to a continuous infusion line. (Responding)			NA														
o. Regulate IV flow rate. (Responding)	S		NA														
p. Flush saline lock. (Responding)			NA														
q. D/C an IV. (Responding)			NA														
r. Monitor an IV. (Noticing)	S		S														
s. Perform FSBS with appropriate interventions. (Responding)	S		S														
	DW																

Comments:

Week 1 (3o,r)- During the IV pump session, you actively participated in the programming and maintenance of the Alaris IV pump. Additionally, you accurately identified abnormal IV site assessment data with an IV site monitoring activity. HS
(3s)- The student was able to satisfactorily perform a Quality Control check of the glucometer as well as demonstrate skills and knowledge required for proper fingerstick blood glucose measurement with the ACCU-CHEK Inform II glucometer. DW

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

4. Use therapeutic communication techniques to establish a baseline for nursing decisions. (1,5,7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies: a. Integrate professionally appropriate and therapeutic communication skills in interactions with patients, families, and significant others. (Responding)			S														
b. Communicate professionally and collaboratively with members of the healthcare team using hand-off communication techniques. (SBAR) (Responding)			S														
c. Report promptly and accurately any change in the status of the patient. (Responding)			S														
d. Maintain confidentiality of patient health and medical information. (Responding)			S														
e. Consistently and appropriately post comments in clinical discussion groups. (Reflecting)			S														
f. Obtain report, from previous care giver, at the beginning of the clinical day. (Noticing)			S														
g. Provide a clear, organized hand-off report to your patient's next provider of care. (Responding)			S														

Comments:

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

5. Implement patient education based on teaching needs of patients and/or significant others.   (1,6)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies: a. **Describe a teaching need of your patient.** (Reflecting)			S														
b. **Utilize appropriate terminology and resources (Lexicomp, UpToDate, Dynamic Health, Skyscape) when providing patient education. (Responding)**			S														

**5a & b- You must address this competency in the comments below for all clinicals on 3T, 4N, or Rehab- describe the patient education you provided; be specific- include the topic, method of delivery, reason for teaching need, materials to support learning through above resources (if applicable), and method used to validate learning.
Example: Education related to orthostatic hypotension (changing positions slowly by sitting at the side of the bed or chair for a few minutes before moving to another position, utilizing the walker when ambulating) was provided to my patient through discussion and demonstration. This was necessary to maintain patient safety as he/she was experiencing a drop-in blood pressure and dizziness when getting out of bed. A patient education sheet was printed from Lexicomp and given to the patient. The teach back method was used to validate learning.

Comments:

 Week 3: 5a & b:I educated my patient on the need of coughing and deep breathing when they have been inactive for a long time. I had the patient take a couple of coughs follow with a deep inspiration and expiration as I showed them first they followed right after me. I believe that this was important to teach my patient since they haven't been moving much and have been laying down since they have gotten admitted and this would be able to loosen their secretions and prevent them from developing pneumonia. I provided patient education while using my skyscape app on the benefits of coughing and deep breathing and as well as the risk for them being immobile. I was able to use the teach back method and asked if the patient had any other questions regarding what we smoke about.

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

6. Implement patient-centered plans of care utilizing the nursing process, clinical judgment, and consideration for cultural, ethnic, and social diversity. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Develop and implement a priority care map utilizing the nursing process and clinical judgment. (Noticing, Interpreting, Responding, Reflecting)			NA														
b. **Identify factors associated with Social Determinants of Health (SDOH) &/or cultural elements that have the potential to influence patient care.**** (Noticing, Interpreting, Responding, Reflecting)			S														

**6b- You must address this competency in the comments on a weekly basis. For all clinicals - provide an example of SDOH &/or cultural elements that influenced your patient's care; be specific.

Comments: week 3 6b: My patients Social determinants of health would have to come from housing since they are a nursing home patient they do not have a house of their own. This influenced my patient care because I had to keep in mind that my patient is used to help in the nursing home so they will probably need extra assistants in the hospital as well, I was able to ask my patients if their was anything I could help them with every chance I had gotten because since my patient is used to having an environment with caregivers that are with them for long periods of time I wanted them to feel welcomed and not a burden to me. Patients backgrounds and housing needs to be part of the care one is giving because it can act as guide on being able to deliver care without being to invasive or doing different things that patients may not be used to depending on where they come from.

See Care Map Grading Rubrics below.

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

7. Illustrate professional conduct including self-examination, responsibility for learning, and goal setting.   (7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. **Reflect on an area of strength. ** (Reflecting)	S		S														
b. **Reflect on an area for improvement and set a goal to meet this need.** (Reflecting)	S		S														
c. Demonstrate evidence of growth, initiative, and self-confidence. (Responding)	S		S														
d. Follow the standards outlined in the FRMCSN Student Code of Conduct Policy. (Responding)	S		S														
e. Incorporate the core values of caring, diversity, excellence, integrity, and "ACE"- attitude, commitment, and enthusiasm during all clinical interactions. (Responding)	S		S														
f. Exhibit professional behavior i.e. appearance, responsibility, integrity, and respect. (Responding)	S		S														
g. Demonstrate the ability to give and receive constructive feedback. (Responding)	S		S														
h. Actively engage in self-reflection. (Reflecting)	S		S														
	DW																

7a and 7b: You must address these competencies in the comments section on a weekly basis. Please write a different comment each week. Remember that a goal includes what you will do to improve, how often you will do it, and when you will do it by (example- "I had trouble remembering to do the three checks of the six medication rights prior to administering medications. I will review the six rights and medication administration content in the textbook twice before the next clinical. Additionally, I will request to meet with my clinical faculty member to practice preparing and administering at least three medications before the next clinical."

Comments:

Week 1- 7a:I believe that an area of strength was being able to correctly calculate how much insulin I must give prior to administering my practice insulin injection. This is crucial because being off in units can be a life or death situation to a patient and knowing how to calculate the correct dosage is as important as knowing how to administering insulin. Great reflection here! Keep up the great work! DW

*End-of-Program Student Learning Outcomes
Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting   11

7b:I believe that an area for improvement that I had was when administering my IM injection in the NF skills practice lab I didn't pull the syringe down when drawing back the medication fluid which caused for air bubbles to form and making the process of drawing up medications difficult . I am going to review the steps on how to perform a IM injection 3 times in my NF skills slides that I had received last semester a week prior to starting clinical. I will additionally check in with clinical instructor if I am still having issues with drawing up medications. Good plan! Practice will help to solidify this skill in your mind. Also, if it helps, you did a nice job reconstituting and drawing up the pantoprazole during the IV lab. DW

Week 2 7a:I believe that a strength that I was able to correctly able to figure out how to do ABG practice questions. I believe this is very important to be able to figure out what Is going on with my patient and interventions I am able to do as a nurse to try and correct an imbalance my patient may have. Wonderful! DW
7b:I believe that an area for improvement that I had was when I prep my sterile equipment for cleaning a tracheostomy. Although I did do good during my lab practical I still could find some area for improvement on where I place my items and ways I can move around my equipment without being at risk for breaking sterile field. I am going to look at the supplies that I may need for cleaning a tracheostomy and figure out how I can place them and organize my equipment 3 times before attending my first clinical on 3 tower. Great idea! Maintaining your sterile field is a basic but extremely important concept. DW
Side note: On weeks that you do not have clinical (ex. Week 7, 8 and 13), you do not need to write a strength and goal for improvement. Regardless, I'm really glad you did. It's always important to reflect on past experiences for future growth. DW

Week 3 7a: I believe that a strength that I had was being able to flow through my head to toe assessment fairly smooth without having to check my meditech screen to see what I missed. I feel that this is important because it helps me be time efficient and be able to help the patient with anything they need and as well as being able to pass medications more efficiently by having more time to look up my meds to be able to pass them out to my patient on time.
7b:I believe than an area for improvement would that I had trouble in was being able to fill out my report sheet in the right slots and found myself having to write everything behind my paper and fill the information in the correct spots after report was done. I am going to look over where everything goes in my report sheet 3 times before my next clinical so I am able to find information for my patient easier when asked a question about my patient.

Student Name:			Course			
Date or Clinical Week:			**Objective:**			

	Criteria	3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	**(lists at least 7*) *provides explanation if < 7**	**(lists 5-6)**	**(lists 5-7 but no specific patient data included)**	**(lists < 5 or gives no explanation)**		
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	**(lists at least 3*) *provides explanation if < 3**		**(lists 3 but no specific patient data included)**	**(lists < 3 or gives no explanation)**		
	3. Identify all risk factors relevant to the patient.	**(lists at least 5*) *provides explanation if < 5**	**(lists 4)**	**(lists 3)**	**(lists < 3 or gives no explanation)**		
Interpreting	4. List all nursing priorities and highlight the top priority problem.	**> 75% complete**	**50-75% complete**	**< 50% complete**	**0% complete**		
	5. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	**> 75% complete**	**50-75% complete**	**< 50% complete**	**0% complete**		
	6. Identify all potential complications for the top nursing priority problem.	**(lists at least 3)**	**(lists 2)**		**(lists < 2)**		
	7. Identify signs and symptoms to monitor for each complication.	**(lists at least 3)**	**(lists 2)**		**(lists < 2)**

*Course Objectives

Comments:

Week 1
(Insulin)- You were able to correctly prepare an insulin pen and administer subcutaneous insulin. Insulin requirements were accurately identified and calculated through the corrective scale and carbohydrate coverage orders. MD
(Assessment)- You were able to satisfactorily demonstrate the Basic Head to Toe Assessment during lab. KA/RH
(IV Math)-You satisfactorily participated in the IV Math learning session on 1/9/24 as well as the assigned IV Math practice questions and the IV Math Application lab on 1/10/24. KA/DW
(Lab Day)- You satisfactorily completed the mandatory lab review of nursing foundational skills. This was achieved through simulating care for a patient in a scenario requiring competency in assessment, communication, medication administration (including PO and IM injection), nasogastric tube insertion and maintenance, patient mobility and hygiene, use of PPE for Contact Isolation, wound care, foley insertion, and development of nursing notes. NS/MD
(IV Skills)- You have satisfactorily completed IV lab including a saline flush, IV push medication administration, priming and hanging a primary and secondary IV solution, adjusting a flow rate to run by gravity, discontinuing IV solution, and monitoring the IV site for infiltration, phlebitis, and signs of complication. DW

Week 2
(Trach Care & Suctioning) - During this lab, you satisfactorily demonstrate competence with tracheostomy care and tracheostomy suctioning. You did a nice job of explaining the procedure to your patient. Overall nice job with maintaining your sterile field. During tracheostomy care, your sterile gloves broke when applying them, you

identified the need to obtain a new pair and executed the application effectively. During trach suctioning, you were able to remind yourself about the need to apply a mask prior to opening the sterile kit. No prompts were needed for tracheal suctioning. For tracheostomy care, you reminded yourself to fill both sides of the empty basin when preparing supplies. You also reminded yourself to remove the soiled dressing prior to applying your sterile gloves. As a result, no prompts were needed. You were able to answer my questions appropriately and demonstrated competence in both procedures. Keep up the hard work.   DW/RH/NS/HS

(EBP Lab)- You actively participated in the online searching process for evidence-based practice literature, as well as reviewing example articles to determine appropriate selection and information needed when summarizing a research article. KA/LK

EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2024

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
