

**EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2024**

**Firelands Regional Medical Center School of Nursing
Sandusky, Ohio**

Student:

Final Grade: Satisfactory/Unsatisfactory

Semester: Spring

Date of Completion:

Faculty: Dawn Wikel, MSN, RN, CNE; Rachel Haynes, MSN, RN; Kelly Ammanniti, MSN, RN, CHSE;
Monica Dunbar, DNP, RN; Heather Schwerer, MSN, RN; Nick Simonovich, MSN, RN

Faculty eSignature:

Teaching Assistant: None

DIRECTIONS FOR USE:

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S)**, **Needs Improvement (NI)**, **Unsatisfactory (U)**, and **Not Available (NA)**. The faculty member will initial if in agreement with the student’s evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written on the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a “S, NI, U, or NA”. If the student does not self-rate, then it is an automatic “U”. A student who submits the clinical evaluation tool late will be rated as “U” in the appropriate competency(s) for that clinical week. Whenever a student receives a “U” in a competency, it must be addressed with a comment as to why it is no longer a “U”. If the student does not state why the “U” is corrected, it will be another “U” until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. If the final performance code is unsatisfactory or needs improvement in any one of the competencies, a grade of unsatisfactory is given. If a pattern of unsatisfactory performance occurs after performing the competency satisfactorily, this also constitutes a grade of unsatisfactory. An unsatisfactory or needs improvement as a final score in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.

METHODS OF EVALUATION:

- Skills Lab Competency Tool & Skills Checklists
- Simulation, Prebriefing, & Reflection Journals
- Nursing Care Map Rubric
- Meditech Documentation
- Clinical Debriefing
- Clinical Discussion Group Grading Rubric
- Evaluation of Clinical Performance Tool
- Lasater’s Clinical Judgment Rubric & Scoring Sheet
- Virtual Simulation Scenarios

ABSENCE (Refer to Attendance Policy)

Date	Number of Hours	Comments	Make-up (/Date/Time)

Faculty’s Name	Initials
Kelly Ammanniti	KA
Monica Dunbar	MD
Rachel Haynes	RH
Heather Schwerer	HS
Nick Simonovich	NS
Dawn Wikel	DW

PERFORMANCE CODE

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe, accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe; accurate each time; skillful in parts of behavior; focuses more on the skill and self rather than the patient; inefficient, uncoordinated, anxious, worried, flustered at times; expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues; faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

***Grey shaded boxes do not need a student evaluation rating or faculty/teaching assistant initials.**

Date	Care Map Top Nursing Priority	Evaluation & Instructor Initials	Remediation & Instructor Initials	Remediation & Instructor Initials

Note: Students are required to submit two satisfactory care maps over the course of the semester. If the care map is not evaluated as satisfactory upon initial submission, the student must revise the care map based on instructor feedback/remediation and resubmit. A maximum of two remediation attempts will be provided for a single care map and if still unsatisfactory, the student will be required to start fresh and initiate a care map on a new patient. At least one care map must be submitted prior to midterm.

Objective

1. Illustrate correlations to demonstrate the pathophysiological alterations in adult patients with medical-surgical problems. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			N/A	S													
a. Analyze the involved pathophysiology of the patient's disease process. (Interpreting)			N/A	S													
b. Correlate patient's symptoms with the patient's disease process. (Interpreting)			N/A	S													
c. Correlate diagnostic tests with the patient's disease process. (Interpreting)			N/A	S													
d. Correlate pharmacotherapy in relation to the patient's disease process. (Interpreting)			N/A	S													
e. Correlate medical treatment in relation to the patient's disease process. (Interpreting)			N/A	S													
f. Correlate the nutritional needs in relation to patient's disease process. (Interpreting)			N/A	S													
g. Assess developmental stages of assigned patients. (Interpreting)			N/A	S													
h. Demonstrate evidence of research in being prepared for clinical. (Noticing)	S		S	S													
Indicate your clinical site as well as your patient's age and primary medical diagnosis in this box weekly.	Meditech, FSBS, IV Pump Sessions		Digestive Health and Infection control.	31, 70-year-old female, hypertensive urgency.													
Instructors Initials	MD	MD	DW														

Comments:

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Week 1 (1h)- During week 1, the Meditech, FSBS and IV pump sessions were all considered clinical hours. You came prepared to each of them and demonstrated competency accordingly. For this reason, you have earned an S for this competency. NS/DW/HS

Objective

2. Perform physical assessments as a method for determining deviations from normal. (3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			N/A	S													
a. Perform inspection, palpation, percussion, and auscultation in the physical assessment of assigned patient. (Noticing)			N/A	S													
b. Conduct a fall assessment and implement appropriate precautions. (Noticing)			N/A	S													
c. Conduct a skin assessment and implement appropriate precautions and care. (Noticing)			N/A	S													
d. Communicate physical assessment. (Responding)			N/A	S													
e. Analyze appropriate assessment skills for the patient's disease process. (Interpreting)			N/A	S													
f. Demonstrate skill in accessing electronic information and documenting patient care. (Responding)	S		N/A	S													
	MD	MD	DW														

Comments:

Week 1 (2f)- By attending the Meditech clinical update & providing your full, undivided attention during the demonstration of documenting insulin, IV solutions, and the Meditech 2.2 upgrades, you are satisfactory for this competency. NS

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:	S		S	S													
a. Perform standard precautions. (Responding)	S		S	S													
b. Demonstrate nursing measures skillfully and safely. (Responding)	S		S	S													
c. Demonstrate promptness and ability to organize nursing care effectively. (Responding)			N/A	S													
d. Appropriately prioritizes nursing care. (Responding)			N/A	S													
e. Recognize the need for assistance. (Reflecting)			N/A	S													
f. Apply the principles of asepsis where indicated. (Responding)	S		S	S													
g. Demonstrate appropriate skill with Foley catheter insertion, maintenance, & removal (Responding)			N/A	N/A													
h. Implement DVT prophylaxis (early ambulation, SCDs, TED hose, administer enoxaparin or heparin) based on assessment and physicians' orders (Responding)			N/A	S													
i. Identify the role of evidence in determining best nursing practice. (Interpreting)	S		S	S													
j. Identify recommendations for change through team collaboration. (Reflecting)			S	S													
	MD	MD	DW														

Comments:

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			N/A	S													
k. Administer PO, SQ, IM, or ID medications observing the rights of medication administration. (Responding)			N/A	S													
l. Ensure patient safety through proper use of EHR, IV flow sheet, and BMV. (Responding)			N/A	S													
m. Calculate medication doses accurately. (Responding)			N/A	S													
n. Administer IV therapy, piggybacks, IV push, and/or adding solution to a continuous infusion line. (Responding)			N/A	S													
o. Regulate IV flow rate. (Responding)	S		N/A	S													
p. Flush saline lock. (Responding)			N/A	S													
q. D/C an IV. (Responding)			N/A	N/A													
r. Monitor an IV. (Noticing)	S		N/A	S													
s. Perform FSBS with appropriate interventions. (Responding)	S		N/A	S													
	MD	MD	DW														

Comments:

Week 1 (3o,r)- During the IV pump session, you actively participated in the programming and maintenance of the Alaris IV pump. Additionally, you accurately identified abnormal IV site assessment data with an IV site monitoring activity. HS
 (3s)- The student was able to satisfactorily perform a Quality Control check of the glucometer as well as demonstrate skills and knowledge required for proper fingerstick blood glucose measurement with the ACCU-CHEK Inform II glucometer. DW

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

4. Use therapeutic communication techniques to establish a baseline for nursing decisions. (1,5,7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			N/A	S													
a. Integrate professionally appropriate and therapeutic communication skills in interactions with patients, families, and significant others. (Responding)			N/A	S													
b. Communicate professionally and collaboratively with members of the healthcare team using hand-off communication techniques. (SBAR) (Responding)			N/A	S													
c. Report promptly and accurately any change in the status of the patient. (Responding)			N/A	S													
d. Maintain confidentiality of patient health and medical information. (Responding)			S	S													
e. Consistently and appropriately post comments in clinical discussion groups. (Reflecting)			N/A S	S													
f. Obtain report, from previous care giver, at the beginning of the clinical day. (Noticing)			N/A	S													
g. Provide a clear, organized hand-off report to your patient's next provider of care. (Responding)			N/A	S													
	MD	MD	DW														

Comments:

Week 3 (4e)- According to the CDG Grading Rubric, you have earned a satisfactory for your Infection Control discussion this week. While your content was thoughtful and appropriate, please ensure that all future CDG posts utilize proper sentence structure. There were a couple sentences that you lost your train of thought and didn't finish the sentence. I know it can be challenging to identify mistakes in your own writing, but it may be helpful to read it out loud before submitting it. This often helps me. As for

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

APA formatting, your in-text citation was nearly right on point. Remember to separate your author and year of publication with a comma in the citation. Additionally, if you are going to use direct quotes, the citation should include the page number. With that said, in scholarly writing, it is ideal to paraphrase information instead of directly quoting whenever possible. Please keep this in mind for future CDGs. Otherwise, keep up the great work! DW

Objective

5. Implement patient education based on teaching needs of patients and/or significant others. (1,6)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			N/A	S													
a. Describe a teaching need of your patient.** (Reflecting)																	
b. Utilize appropriate terminology and resources (Lexicomp, UpToDate, Dynamic Health, Skyscape) when providing patient education. (Responding)			N/A	S													
	MD	MD	DW														

****5a & b- You must address this competency in the comments below for all clinicals on 3T, 4N, or Rehab- describe the patient education you provided; be specific- include the topic, method of delivery, reason for teaching need, materials to support learning through above resources (if applicable), and method used to validate learning.**

Example: Education related to orthostatic hypotension (changing positions slowly by sitting at the side of the bed or chair for a few minutes before moving to another position, utilizing the walker when ambulating) was provided to my patient through discussion and demonstration. This was necessary to maintain patient safety as he/she was experiencing a drop-in blood pressure and dizziness when getting out of bed. A patient education sheet was printed from Lexicomp and given to the patient. The teach back method was used to validate learning.

Comments:

5a&b. Week 3: I had infection control and digestive health. DW

5a&b. Week 4: Education related to the patient’s blood pressure medication was given. I explained the importance of taking the medication as prescribed is extremely important. The patient had not been taking the blood pressure medication that was needed which then led to her blood pressure increasing tremendously. I used skyscape to get the information about the medication and I was able to explain the adverse effects, the implementation (it does not have to be taken with meals), and that it is important to continue taking the blood pressure medication (amlodipine besylate) even if her blood pressure is normal. I informed her that the reason her blood pressure would be normal is because of the medication. I then asked the patient to paraphrase what I explained to ensure she understood.

Objective

6. Implement patient-centered plans of care utilizing the nursing process, clinical judgment, and consideration for cultural, ethnic, and social diversity. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Develop and implement a priority care map utilizing the nursing process and clinical judgment. (Noticing, Interpreting, Responding, Reflecting)			N/A	S													
b. Identify factors associated with Social Determinants of Health (SDOH) &/or cultural elements that have the potential to influence patient care.** (Noticing, Interpreting, Responding, Reflecting)			S	S													
	MD	MD	DW														

****6b- You must address this competency in the comments on a weekly basis. For all clinicals - provide an example of SDOH &/or cultural elements that influenced your patient's care; be specific.**

See Care Map Grading Rubrics below.

Comments:

6b. Week 3: Transportation is one factor that affects the social determinant of health because people need to make sure they can get to their colonoscopy appointment. They will also need a way home because they will be given monitored anesthesia which means they cannot drive themselves home. Employment could be another factor some people do not want to miss work or can not afford to miss work to get a colonoscopy, bronchoscopy, or EGD. **Great considerations here! DW**

6b. Week 4: Health coverage could be a factor that affects social determinants of health because my patient had not been taking her medication. I am not sure if it was because she was not able to get it or if she thought she did not need it because her blood pressure had not been high. She explained her blood pressure was not high, so she did not need to take it. This could also be due to provider linguistic; she may have not understood what the health care provider explained which led to her not taking her medication properly. Another factor could be stress, my patient has a lot going on at home which may have to do with her not taking her medication or not remembering to take it.

Objective

7. Illustrate professional conduct including self-examination, responsibility for learning, and goal setting. (7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Reflect on an area of strength. ** (Reflecting)	S		S	S													
b. Reflect on an area for improvement and set a goal to meet this need.** (Reflecting)	S		S	S													
c. Demonstrate evidence of growth, initiative, and self-confidence. (Responding)	S		S	S													
d. Follow the standards outlined in the FRMCSN Student Code of Conduct Policy. (Responding)	S		S	S													
e. Incorporate the core values of caring, diversity, excellence, integrity, and “ACE”- attitude, commitment, and enthusiasm during all clinical interactions. (Responding)	S		S	S													
f. Exhibit professional behavior i.e. appearance, responsibility, integrity, and respect. (Responding)	S		S	S													
g. Demonstrate the ability to give and receive constructive feedback. (Responding)	S		S	S													
h. Actively engage in self-reflection. (Reflecting)	S		S	S													
	MD	MD	DW														

****7a and 7b: You must address these competencies in the comments section on a weekly basis. Please write a different comment each week. Remember that a goal includes what you will do to improve, how often you will do it, and when you will do it by (example- “I had trouble remembering to do the three checks of the six medication rights prior to administering medications. I will review the six rights and medication administration content in the textbook twice before the next clinical. Additionally, I will request to meet with my clinical faculty member to practice preparing and administering at least three medications before the next clinical.”**

Comments

Week 1: My strength would be that I was able to successfully get a FSBS and use the glucometer. **Awesome! MD**

My weakness would be that I had trouble remembering the IV math formulas. I will review the formulas and do practice problems before the first clinical so I will have a better understanding and I will be prepared.

Great goal! MD

Week 2: I did not have clinical. **MD**

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Week 3: My strength would be that I was able to remember what frequent organisms needed what specific precautions for infection control. This was helpful when I was going through the hospital to ensure the patients in precautions had the proper precautions set up. **Excellent! Glad this experience reinforced that knowledge for you. DW**
My weakness would be I was nervous to ask the doctor what we were looking at during the colonoscopy and there were some things I was unsure of what they were. Luckily the nurse and doctor explain what we were looking at during most of the colonoscopy. I would like to improve on asking questions when I am unsure of things for the next clinical. This will ensure I am more confident in what I am doing. I will also look over the procedure or illness if I find that I had questions about them after clinical. **Great idea! Figuring out the anatomy during an endoscopic procedure can be challenging. Asking questions will provide clarify and will also help to develop relationships with other disciplines. Teamwork is an integral part of healthcare, so the more you engage others now, the easier it will be when you are licensed as an RN. DW**

Week 4: My strength would be I was able to notice when I took my patients blood pressure it was normal but a few hours later I went in and seen the blood pressure on the monitor was very high and different from the number I got when I took it. I had asked the patient when she last remembered her blood pressure being taken and she said physical therapy had taken it before they started working with her. With this information I had taken her blood pressure again to ensure she was at a good blood pressure.
My weakness would be I would like to be more comfortable when I am giving medication. I felt overwhelmed and nervous during the medication pass which I would like to improve on. I am going to review the videos on hanging IV bags and the information that was provided on advance to ensure I feel less overwhelmed for my next clinical experience. I will also review the notes we received last semester about medication this will also ensure that I feel more confident when passing medications during the next clinical.

Student Name:		Course Objective:					
Date or Clinical Week:							
Criteria		3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	(lists at least 7*) *provides explanation if < 7	(lists 5-6)	(lists 5-7 but no specific patient data included)	(lists < 5 or gives no explanation)		
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	(lists at least 3*) *provides explanation if < 3		(lists 3 but no specific patient data included)	(lists < 3 or gives no explanation)		
	3. Identify all risk factors relevant to the patient.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)		
Interpreting	4. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete		
	5. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete

Comments:

Week 1

(Insulin)- You were able to correctly prepare an insulin pen and administer subcutaneous insulin. Insulin requirements were accurately identified and calculated through the corrective scale and carbohydrate coverage orders. MD

(Assessment)- You were able to satisfactorily demonstrate the Basic Head to Toe Assessment during lab. KA/RH

(IV Math)-You satisfactorily participated in the IV Math learning session on 1/9/24 as well as the assigned IV Math practice questions and the IV Math Application lab on 1/17/24. KA/DW

(Lab Day)- You satisfactorily completed the mandatory lab review of nursing foundational skills. This was achieved through simulating care for a patient in a scenario requiring competency in assessment, communication, medication administration (including PO and IM injection), nasogastric tube insertion and maintenance, patient mobility and hygiene, use of PPE for Contact Isolation, wound care, foley insertion, and development of nursing notes. NS/MD

(IV Skills)- You have satisfactorily completed IV lab including a saline flush, IV push medication administration, priming and hanging a primary and secondary IV solution, adjusting a flow rate to run by gravity, discontinuing IV solution, and monitoring the IV site for infiltration, phlebitis, and signs of complication. MD

Week 2

(Trach Care & Suctioning) - During this lab, you satisfactorily demonstrate competence with tracheostomy care and tracheostomy suctioning. During this lab, you satisfactorily demonstrated competence with tracheal airway suctioning and tracheostomy care. You did a nice job of explaining the procedure to your patient and keeping

the patient comfortable. Great job maintaining your sterile field and applying sterile gloves. You stayed very calm throughout both procedures. You were able to answer my questions appropriately demonstrated knowledge and competence of each procedure. No prompts were needed for either skill. You were thorough in your approach and well prepared. Nice job! DW/RH/NS/HS

(EBP Lab)- You actively participated in the online searching process for evidence-based practice literature, as well as reviewing example articles to determine appropriate selection and information needed when summarizing a research article. KA/LK

EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2024

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
