Z- Chapter 6

2/5/2023

Education is very important to me, and I am competent in my practice. When I am thinking about the future, I am thinking about getting my BSN in nursing. Obtaining my BSN would give me more options for work because most of the places I would like to work want you to get your BSN within two years of working at the facility. I plan to stay in Ohio a while, and then I plan to move to Florida. Having my BSN will make me look better on my resume for getting jobs and will bump me up in the list rather than just having my diploma. After getting my BSN, I will then take a break from school.

After a few years of obtaining my BSN, I hope to return to school to obtain my MSN. MSN can then possibly move me to a higher-up position in a facility is the end goal for me. I also want to build upon my knowledge as a nurse, and going to school would help me with that goal. I would want to get this after my children are more grown up so I can focus on the schooling and give it my best effort and devoted time it deserves. Education is the most important thing to me and being knowledgeable in my field as well as giving me a passport to freedom in the field of nursing.
