

Allison Martin
Chapter 6/7 Assignment

My education relating to nursing is far from being over after nursing school. As of right now I am still deciding what specialty I would want to focus on as a Registered Nurse. I plan to continue my schooling and go for my BSN after I get at least a year of experience out of nursing school. This is because I started nursing school right out of high school and I would like to take a year off school to just work and get experience. The experience that I get through the year off will help me greatly as I complete my BSN course. After I receive my bachelor's degree I plan to go back to school for my MSN. With the master's degree I plan to become a Nurse Practitioner.

My main goal is to become a family NP and work at a family health center. I want to achieve this because my family NP is a big inspiration and has helped me a lot throughout the years. I want to give to other people what has been given me as a knowledgeable and trustworthy NP. A big reason for wanting to become a family NP is because I love working with pediatric patients. Also, I love being able to develop a connection with my patients and being able to care for them as they grow. With all of this in mind I am determined to reach my goal and I will do what it takes to get there!
