- Review the steps in evaluating the validity of a website. (7)*

***Course Objectives**

Review the assignment and place your answers to the questions in the Z-CH # 23 drop box by 0800 on March 25, 2024.

Patients often use the Internet to search for health-related issues. Search the Internet for any health-related issue of your choosing. Evaluate the website by answering the following questions:

1. Do the authors have qualifications listed? What are their qualifications? What is the domain? (.gov, .edu, .org) The site I chose was Mayo Clinic and they do have their qualifications listed, most contributors to the page I chose are M.D.. This site's domain is .org.
2. When was the site created? When was the site last updated or revised? June 03, 2022
3. Who is the targeted audience? Does the web site present facts or opinions? The targeted audience is patients and people who may not have a medical background.
4. How complete and accurate is the content information? Does it agree with other expert sources? The content information on this page is very accurate and complete with many details.
5. Does the site load quickly? Is it a secured site? Are there graphics, or pictures on the page that serve a purpose? If so what are they and how do they relate to the health issue? The site loaded very quickly. There were pictures related to the topic being discussed like anatomical body graphics so patients can see what is in the area.

In order to receive full credit (1 H class time) for this assignment, it must be completed in its entirety by the due date/time assigned. Any assignments not completed in its entirety by the assigned due date and time will result in missed class time.
