Sandusky, Ohio

Faculty eSignature: _____

PERFORMANCE CODE

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe; accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback needed related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe, accurate each time, skillful in parts of behavior, focuses more on the skill and self rather than the patient, inefficient, uncoordinated, anxious, worried, and flustered at times, expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues, faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

Grey shaded weekly competency boxes do not need a student evaluation rating or faculty/teaching assistant initials.

Objective

1. Engage in the coordination and delivery of nursing care measures to groups of patients and to patients with complex problems. (1,3,4,5,7,8)*

Weeks of Course:	2	3	4	5	6	7	8	Make up	Mid-term	9	10	11	12	13	14	15	Make up	Final
Competencies:	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
a. Manage complex patient care situations with evidence of preparation and organization. (Responding)	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
b. Assess comprehensively as indicated by patient needs and circumstances. (Noticing)	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
c. Evaluate patient's response to nursing interventions. (Reflecting)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
d. Interpret cardiac rhythm; determine rate and measurements. (Interpreting)	NA	NA	NA	NA	S	S	NA	NA	S	S	S	NA						
e. Administer medications observing the six rights of medication administration. (Responding)	NA	NA	NA	S	S	S	NA	NA	S	S	S	S						
f. Perform venipuncture skill with beginning dexterity and evidence of preparation. (Responding)	S	NA	NA	NA	NA	NA	NA	NA	S	NA	NA	NA	S					
g. Respond appropriately to equipment alarms; IV pumps, ECG monitors, ventilators, etc. (Responding)	NA	NA	NA	S	S	S	NA	NA	S	S	S	NA

Comments:

Week 2 (1f)- Great job with several successful IV attempts, including access of an Infusaport; appropriate technique was demonstrated. Great job! FB

Week 4 (1c)- Satisfactory Patient Advocate/Discharge Planner clinical and with discussion via CDG posting. Preceptor comments: "Excellent in all areas.". Great job! AR

Week 5 (1a,b)- Great job managing patient care and prioritizing care based on your comprehensive assessments. FB

Week 6 (1a,b,c)- Satisfactory with managing patients during your patient management clinical experiences this week! Great job! FB

Week 7 (1c)- Great job evaluating the plan of care and patient needs to determine the order of care for several patients during this clinical rotation. FB

*End-of- Program Student Learning Outcomes

Week 9(1a,b,c,e,g): You did a great job this week managing complex patient situations while in the ICU. You performed and documented thorough assessments, performed interventions, and evaluated your patient's response to those interventions. You did a great job administering medications this week (PO via an OG tube, IV, IVP, and SQ), following the six rights of medication administration. You appropriately responded to alarms related to your patient, great job! CB

Week 10-1(a-e, g) Excellent job this week managing complex patient care situations. Your care was very well organized, and you did a great job with your time management. All head to toe assessments were very thorough and well done. Your medication passes were safely done, and you had the opportunity to administer PO, IV, SQ and transdermal medications all while following the six rights. Great job monitoring your patients very closely to ensure positive patient outcomes. BL

Week 11(1a,b,c,d,e,g): You did a great job this week managing complex patient situations while in the ICU. You performed and documented thorough assessments, performed interventions, and evaluated your patient's response to those interventions. You completed your ECG booklet, interpreting cardiac rhythm strips with measurements. You did a great job administering medications this week (PO, transdermal, and SQ), following the six rights of medication administration. You appropriately responded to alarms related to your patient, great job! CB

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

2. Formulate nursing care plans, correlations, or clinical reports that demonstrate patient-centered care of diverse populations, evidence-based practice, and clinical judgment. (1,2,3,4,5,8)*

Weeks of Course:	2	3	4	5	6	7	8	Make up	Mid-term	9	10	11	12	13	14	15	Make up	Final
Competencies:	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
a. Correlate relationships among disease process, patient's history, patient symptoms, and present condition utilizing clinical judgment skills. (Noticing, Interpreting, Responding)	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
b. Monitor for potential risks and anticipate possible early complications. (Noticing, Interpreting, Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
c. Recognize changes in patient status and take appropriate action. (Noticing, Interpreting, Responding)	NA	NA	NA	S	S	S	NA	NA	S	S	S	NA						
d. Formulate a prioritized nursing plan of care utilizing clinical judgment skills. (Noticing, Interpreting, Responding, Reflecting) *	S	NA	NA	S	S	S	NA	NA	S	S	S	S						
e. Respect patient and family perspectives, values, and diversity when planning, giving, and adapting care. (Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
Faculty Initials	AR	AR	AR	FB	FB	FB	FB	FB	FB	CB	BL	CB						

***When completing the 4T Care Map CDG refer to the Care Map Rubric**

Comments:

Week 5 (2a,b)- Great use of clinical judgement skills to determine patient needs, plan care for patients, and implement appropriate nursing interventions. FB

Week 6 (2a,b,d)- Great job with correlation of patient condition, pathophysiology of disease process, and monitoring of any possible complications. Based off assessments you were able to implement the plan of care for several patients. FB

Week 7 (2a,b)- Good use of clinical judgement as you correlate the relationship between patient's disease process, current symptoms, and present condition. You are also assessing for potential risks and anticipating possible complications as you prioritize care for your assigned patients. Keep up the good work! FB

Week 9(2a,c,e): Great job correlating relationships among disease process, your patient's history/symptoms/diagnosis, and formulating a pathophysiology. You did a great job recognizing changes in your patient from day one of clinical to day two. You respected your patient and family giving proper education and adapting to their needs. CB

*End-of- Program Student Learning Outcomes

Week 10-2(e) Great job this week in debriefing discussing social determinants of health that may have impacted your patient's health, well-being, and quality of life. BL
Week 11(2b,c,d): Great job in debriefing discussing how you monitored your patient for potential risks and anticipated early complications. You also did a great job discussing changes in patient status you noticed, as well as how you responded and took action. You are Satisfactory on your care map, please see the grading rubric below for feedback. CB

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

3. Plan leadership experiences with a mentor to impact team performance, patient safety, and quality indicators. (1,3,5,7,8)*

Weeks of Course:	2	3	4	5	6	7	8	Make up	Mid-term	9	10	11	12	13	14	15	Make up	Final
Competencies:	S	NA	S	S	S	S	NA	NA	S	S	S	S	S					
a. Critique communication barriers among team members. (Interpreting)	S	NA	S	S	S	S	NA	NA	S	S	S	S	S					
b. Participate in QI, core measures, monitoring standards and documentation. (Interpreting & Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S	S					
c. Discuss strategies to achieve fiscal responsibility in clinical practice. (Responding)	S	NA	S	NA	NA	NA	NA	NA	S	S	S	S	S					
d. Clarify roles & accountability of team members related to delegation. (Noticing)	NA	NA	NA	S	S	S	NA	NA	S	S	S	NA	NA					
e. Determine the priority patient from assigned patient population. (Interpreting) (Patient Mgmt.)	NA	NA	NA	S	S	S	NA	NA	S	NA	NA	NA	NA					
Faculty Initials	AR	AR	AR	FB	FB	FB	FB	FB	FB	CB	BL	CB						

Comments:

Week 2 (3b)- Satisfactory discussion via CDG posting related to your Quality Department observation experience. Great job! AR

Week 4 (3b,c)- Satisfactory during Quality Scavenger Hunt, with documentation, and discussion via CDG posting. AR

Week 5 (3d,e)- Great discussion, noticing accountability of delegation and the clarification of roles. You also did a great job interpreting facts to determine the need for prioritization of assigned patient during this clinical rotation. FB

Week 6 (3e) Great job with prioritizing the delivery of care to assigned patients assigned to you this week. (c) These competencies were not addressed this week therefore changed to NA. FB

Week 7 (3d,e)- You have demonstrated the process of delegation, responsibility, and accountability of the interdisciplinary team members. Great job determining priority care of assigned patients and the priority patient of assigned patients. Keep up the great work! FB

Week 9(3c): Great job this week demonstrating ways to obtain fiscal responsibility and discussing this in debriefing. CB

Week 10-3(a) Excellent job in debriefing critiquing and discussing communication barriers you witnessed among team members while caring for your patient this week. BL

Week 11(3b): Great job in debriefing participating in discussion of quality indicators and core measures related to your patient. CB

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

4. 4. Plan for a future in the nursing profession by analyzing information concerning employment, licensure, ethical, and legal issues in nursing focusing on accountability and respecting patient autonomy. (1,2,4,5,7)*

Weeks of Course:	2	3	4	5	6	7	8	Make up	Mid-term	9	10	11	12	13	14	15	Make up	Final
Competencies:	S	NA	S	S	S	S	NA	NA	S	S	S	S						
a. Critique examples of legal or ethical issues observed in the clinical setting. (Interpreting)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
b. Engage with patients and families to make autonomous decisions regarding healthcare. (Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
c. Exhibit professional behavior in appearance, responsibility, integrity and respect. (Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
Faculty Initials	AR	AR	AR	FB	FB	FB	FB	FB	FB	CB	BL	CB						

Objective 4a: Provide a comment for the highlighted competency each week. If no clinical experiences, put "NA" for that week.

Comments:

WEEK 2: During digestive health, there was a patient that stated she had an allergy to anesthesia and would prefer local anesthesia for her colonoscopy. When questioned further, it was revealed that she did not have a true allergy but preferred local anesthetic. Neither the doctor nor the nurse educated her regarding the importance of the type of anesthetic she would receive, and how local anesthetic was not suitable for her colonoscopy. **Great example but definitely not appropriate care for this patient. AR**

WEEK 3: N/A

WEEK 4: This week with patient advocacy, we discussed a patient grievance, and an unhappy family member. The patient was confused, and had dementia, the POA was the daughter. The daughter asked case management to call her when her mother would be discharged back to the assisted living facility, because she wanted to be there to help comfort her mother. Case management only gave the daughter a fifteen-minute warning about transport coming and her mothers discharge. The advocate got involved when the patients daughter refused discharge and filed a grievance with the hospital and Medicare. Today, the advocate received a phone call from the daughter, who was once again concerned about her mothers discharge because her systolic blood pressure was in the 150's. The advocate was involved ethically to ensure the patient and the family were receiving adequate care (transport concerns) and to set realistic expectations (the slightly elevated blood pressure, which was baseline.) **Great example! AR**

WEEK 5: This week, I had a patient that wanted to go home, as he felt he was better. The doctor wanted him to stay one more day, as he did not "feel better" for an entire day and had just switched from IV to PO drugs that day. The wife was frustrated because she was taking days off work to be with her husband in the hospital and was concerned about her absence. From an ethical standpoint, it is important to consider the patient and family perspective. However, as care providers we have a responsibility to promote the best outcomes for our patients. Requesting that the patient wait one more day was ethically appropriate to reduce the risk of worsening condition and readmittance. **It is sometimes difficult when trying to advocate for your patient based on their wishes and doing what is best for the patient. Education is the best way to provide the necessary information that is going to provide a positive outcome. FB**

Week 5 (4c)-You are doing a great job presenting yourself in a professional manner through your attitude, commitment, and eagerness to learn. **FB**

*End-of- Program Student Learning Outcomes

WEEK 6: This week I noticed a lack of teamwork on the unit I was assigned, and the ethical dilemma it can pose. The unit can become extremely demanding and with that some staff seem burnt out and unwilling to help. Not only is this problematic from the perspective of patient safety, but it also becomes an ethical issue when people are unwilling to help one another. Shoving your responsibility onto others because you are overworked, or refusing to help out because you assume another staff member will step up is unfair to everyone involved. **Great example. Teamwork is very important for several reasons, the main one is quality patient care. Safety of the patients should be everyone's main priority, if all work together the unit runs smooth and there are positive patient outcomes. FB**

WEEK 7: This week I had a patient that would undergo a surgery with vascular surgery to place a temporary dialysis catheter, and then immediately following would have their first dialysis treatment. Their wife was very upset because she wanted to accompany the patient to dialysis and sit with him during the treatment, however it is a closed unit due to infection control. Ethically, we have a responsibility to maintain strict infection control procedures to reduce the risk of infection for all patients, however I could understand the concern of the wife wanting to make sure her husband was okay, due to his condition. We educated her regarding the policy and the reasoning, but she was still understandably disappointed. **Great example. We try to advocate for patients, but sometimes it is truly not in the best interest of the patient. We cannot always please patients or family members by doing the right thing. FB**

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

WEEK 9: This week my patient was from out of town, and had family in another state that was wanting updates on their care. The husband, who was the only family member left the second day, would record nurses and physicians to send to family back home. This could become an ethical dilemma, as he did not ask permission or notify staff when he began recording or video chatting. When we were performing patient care we had to be conscious of potential recording for the privacy of the patient and the protection of us. Although his intentions were good, it can quickly become a difficult situation. **Tasha, this is a great example. Although, he is the NOK, he should truly make it known when he is videoing the patient and the care that is being provided. Even when he video chats and the doctor is having a conversation, just making everyone aware of what is going on. CB**

WEEK 10: My first patient this week was determined to be at baseline and ready for discharge back to their nursing home. The legal guardian was resistant to this, and requested that the discharge be delayed. It was shared that the family and guardian wanted the patient to stay in the hospital because they were unhappy with the care being provided at the nursing home. This can become an ethical dilemma, because the patient is potentially being discharged to unsuitable conditions, however it is also important to keep beds available in the hospital for patients that truly need care. It is also important to differentiate between truly unsuitable care, and general unhappiness due to preference. **Great example, Tasha. BL**

WEEK 11: This week my patient was pushing for discharge, and giving deadlines for when she will sign out AMA. The day of her anticipated discharge, her EKG showed changes, the physician was notified and put in orders for lab work. When the lab work came back normal, the patient was discharged. Ethically this can become problematic, because the patient was pushing for a discharge and threatening to leave, which may have influenced the results of her care. If she were more compliant with treatment, I wonder if she would have been discharged. **Tasha, this is a good thought! I have to say that I think sometimes decisions that are made in the care a patient receives truly is because of how the patient is acting/demanding, although it might not be in the best interest for the patient. CB**

WEEK 12: While at the infusion center, I learned they also did dressing changes on acute wounds. The nurse explained that they do not deal with chronic wounds, as those patients would be better served at the wound clinic, under the direction of Dr. Blank. However, there was a man with diabetic neuropathy, who had been receiving dressing changes for the past year due to a nonhealing foot ulcer. I asked the nurse when a wound was considered chronic instead of acute, and why the man was not being seen by the wound clinic for his nonhealing wound. She explained that a podiatrist was overseeing his care, and that the podiatrist would have to release the client to Dr. Blank in order to be seen at the wound clinic. She went on to explain that doctors are resistant to releasing care when a wound becomes chronic due to insurance reimbursement and a loss of income. Ethically this is extremely problematic as this patient could be receiving better care at a chronic wound clinic, with doctors and nurses that specialize in wounds, and a greater availability of resources that could aid in the healing process.

Objective

5. Construct methods for self-reflection and critiquing healthcare systems, processes, practices and regulations on a weekly basis. (7,8)*

Weeks of Course:	2	3	4	5	6	7	8	Make up	Mid-term	9	10	11	12	13	14	15	Make up	Final
Competencies:	S	NA	S	S	S	S	NA	NA	S	S	S	S						
a. Reflect on your overall performance in the clinical area for the week. (Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
b. Demonstrate initiative in seeking new learning opportunities. (Responding)	S	NA	S	S	S	S	NA	NA	S	S	S	S						
c. Describe factors that create a culture of safety (error reporting, communication, & standardization, etc. (Interpreting)	S	NA	S	S	S	S	NA	NA	S	S	S	S

Comments:

Week 2 (5c)- Satisfactory discussion via CDG posting related to your Quality Department observation. AR

Week 5 (5a)- Reported on by assigned RN during clinical rotation 2/6/2024. Excellent in all areas. Student goals: "Get better at excusing myself out of patient rooms. Time management; especially getting stuck in rooms, late meds." Additional Preceptor comments: "Natasha did a great job today. Knowledgeable and prepared. She did just fine with an extremely needy patient." LC/FB

Week 6 (5a)- Reported on by assigned RN during clinical rotation 2/13/2024- Excellent in all areas. Student goals: "Time management, try to research patient earlier in day." No additional Preceptor comments. EW/FB Reported on by assigned RN during clinical rotation 2/14/2024- Excellent in all areas. Student goals: "time management, when to say no." No additional preceptor comments. EM/FB

Week 7 (5a) Reported on by assigned RN during clinical rotation on 2/20/2024 – Excellent in all areas, satisfactory in demonstrates prior knowledge of departmental/nursing responsibilities and delegation. Student goals: "Get past the 1700 slump everything goes sideways then. Not be so hard on myself." Additional Preceptor comments: Tasha has a can do spirit and faces adversity smoothly. Some things can't be helped so don't hold the ebs and flows of the ever-changing

*End-of- Program Student Learning Outcomes

assignments against yourself. I would recommend her for an intense nursing setting such as ER because she is a quick thinker and open to learning. HH/FB Reported on by assigned RN during clinical rotation on 2/21/2024 – Excellent in all areas. Student goals: “I felt really great today would have liked more time to research my patients.” Additional Preceptor comments: “Tasha is wonderful at the bedside. She is very caring and kind to her patients and their families. She is also confident while performing skills and eager to learn new tasks. She kept her patients informed of changes to care and helped them feel comfortable.” SS/FB

Week 9(5c,e): Tasha, great job in debriefing discussing factors that create a culture of safety that you provided for your patient during the clinical day and EBP tools that you utilized to support safety and quality. CB

Week 10-5(b) Tasha, you do an excellent job working independently and taking initiative in completing nursing interventions for your patients. You are organized and consistently well prepared. You took excellent care of your patients this week. BL

Week 11(5b,c) Tasha, you do an excellent job working independently and taking initiative in completing nursing interventions for your patient. CB

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

6. Engage with members of the healthcare team, patients, families, faculty, and peers through written, verbal and nonverbal methods, and by utilizing computer technology. (1,2,6,7,8)*

Care Map Evaluation Tool**

AMSN
2024

Date	Nursing Priority Problem	Evaluation & Instructor Initials	Remediation & Instructor Initials
3/26-27/2024	Decreased Cardiac Output	S/CB	NA

** AMSN students are required to submit one satisfactory care map (CDG) during the 3-week 4T clinical rotation. If the care map is not evaluated as satisfactory upon initial submission, the student has one opportunity to revise the care map based on instructor feedback.

Comments:

Firelands Regional Medical Center School of Nursing
Care Map Grading Rubric
AMSN
2024

Student Name: Natasha Doughty				Course Objective: Formulate nursing care plans, correlations, or clinical reports that demonstrate patient-centered care of diverse populations, evidence-based practice, and clinical judgment.			
Date or Clinical Week: 3/26-27/2024							
Criteria		3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	(lists at least 7*) *provides explanation if < 7	(lists 5-6)	(lists 5-7 but no specific patient data included)	(lists < 5 or gives no explanation)	3	Excellent job identifying all abnormal assessment findings, lab findings and diagnostic tests for your patient. You also did a great job identifying all risk factors relevant to your patient as well.
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	(lists at least 3*) *provides explanation if < 3		(lists 3 but no specific patient data included)	(lists < 3 or gives no explanation)	3	
	3. Identify all risk factors relevant to the patient.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)	3	
Interpreting	4. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	For your nursing problems/diagnoses, remember that your top priority problem should not be a “risk for” diagnosis. Your patient has an active problem going on; therefore, your top priority should be “Decreased Cardiac Output.” You did a great job highlighting all of the relevant data that supports the top priority nursing problem. Potential complications were listed with appropriate s/sx to monitor for each.
	5. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	6. Identify all potential complications for the top nursing priority problem.	(lists at least 3)	(lists 2)		(lists < 2)	3	
	7. Identify signs and symptoms to monitor for each complication.	(lists at least 3)	(lists 2)		(lists < 2)	3	
Responding	8. List all nursing interventions relevant to the top nursing priority.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	Great job listing appropriate nursing interventions related to your patient. Your interventions were prioritized, included a frequency and rationale.
	9. Interventions are prioritized	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	10. All interventions include a frequency	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	11. All interventions are individualized and realistic	> 75% complete	50-75% complete	< 50% complete	0% complete	3	

*End-of- Program Student Learning Outcomes

	12. An appropriate rationale is included for each intervention	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
Reflecting	13. List all of the highlighted reassessment findings for the top nursing priority.	>75% complete	50-75% complete	<50% complete	0% complete	3	Good job re-evaluating all of the assessment findings related to your priority problem. I also agree with continuing the plan of care for your patient.
	14. Evaluation includes one of the following statements: - Continue plan of care - Modify plan of care - Terminate plan of care	Complete			Not complete	3	
Total Possible Points= 42 points 42-33 points = Satisfactory 32-21 points = Needs Improvement* < 21 points = Unsatisfactory* *Total points adding up to less than or equal to 32 points require revision and resubmission until Satisfactory. Refer to the course specific requirements for resubmission deadlines. Faculty/Teaching Assistant Comments: Tasha, you are Satisfactory on your care map! Please review each section for my feedback.							Total Points: 42/42 Faculty/Teaching Assistant Initials: CB

***Course Objectives**

Comments:

Meditech Documentation: Satisfactory participation of assessment documentation including physical re-assessment, safety and fall assessment, RN mechanical ventilator assessment, IV location assessment, and documentation editing. Great job! FB

Physician Orders/SBAR: Satisfactory completion of physician's order lab per the SBAR skills competency rubric: phone call to physician with SBAR report, receiving and reading back multiple physician orders, and hand-off report given to the next student in rotation. Discussion of the treatment, medications, and plan of care for a patient experiencing NSTEMI and STEMI. CB/BS

Prioritization/Delegation: Satisfactory completion of the prioritization and delegation skills lab. You satisfactorily prioritized care for multiple patients using multiple methods (e.g. Maslow's hierarchy of needs, ABC, Nursing Process, etc.). You were able to appropriately delegate nursing tasks for patients, and you actively participated in the group discussion on delegation of nursing tasks. Great job! BL

Resuscitation: Satisfactory participation in the practice of Hands-Only CPR, discussion regarding use of and ventilation with bag-valve mask/Ambu bag, and review of crash cart and Code Blue team duties and documentation. AR

IV Start: Satisfactory participation in the IV Start lab, including practice with technique, initiation and discontinuation of IV site, and placement of IV dressing. FB/BL/CB/BS

Blood Admin/IV Pumps: Satisfactory completion of practice with blood administration safety checks and quality assurance audit. Great job with IV pump practice, the use of the medication library, and pump set up of primary and secondary IV medication infusion. AR

Central Line Dressing Change: Satisfactory central line dressing change participation providing proper technique guidelines, maintenance of central line ports, and line flushing. FB

Ports/Blood Draw: You were satisfactory in accessing and de-accessing an infusaport device, demonstrated proper technique on how to draw blood from a CVAD, and properly labeled a blood tube per hospital policy. Great job! CB

Head to Toe Assessment: Satisfactory completion of the Head to Toe Assessment. Great job! LB/BS

*End-of- Program Student Learning Outcomes

ECG/Telemetry Placements/Hand-off report/CT: Satisfactory participation with review of monitoring tutorial and placement of ECG/Telemetry patches and leads; satisfactory participation in review of Chest Tube/Atrium tutorial; satisfactory completion of handoff report activity. BL/BS

Pathophysiology Grading Rubric
Firelands Regional Medical Center School of Nursing
Advanced Medical Surgical Nursing
2024

Student Name: Natasha Doughty		Clinical Date: 3/12-13/2024	
1. Provide a description of your patient including current diagnosis and past medical history. (4 points total) - Current Diagnosis (2) - Past Medical History (2)		Total Points:4 Comments: Great job discussing your patient's current diagnosis and past medical history.	
2. Describe the pathophysiology of your patient's current diagnosis. (6 points total) Pathophysiology-what is happening in the body at the cellular level (6)		Total Points:6 Comments: Excellent job! Pathophysiology is detailed and accurate for your patient's current diagnosis.	
3. Correlate the patient's current diagnosis with presenting signs and symptoms. (6 points total) - All patient's signs and symptoms included (2) - Explanation of what signs and symptoms are typically expected with this current diagnosis (Do these differ from what your patient presented with?) (2) - Explanation of how all patient's signs and symptoms correlate with current diagnosis. (2)		Total Points:6 Comments: All patient's signs and symptoms included with detailed explanation of correlation to current diagnosis. Great job discussing the signs and symptoms that are typically expected with a patient who is diagnosed with this disease.	
4. Correlate the patient's current diagnosis with all related labs. (12 points total) - All patient's relevant lab result values included (3) - Rationale provided for each lab test performed (3) - Explanation provided of what a normal lab result should be in the absence of current diagnosis (3) - Explanation of how each of the patient's relevant lab result values correlate with current diagnosis (3)		Total Points:12 Comments: Excellent job, Tasha! All relevant labs were included with rationales. Normal lab values were included and an explanation of how each lab correlates to the patient's diagnosis.	
5. Correlate the patient's current diagnosis with all related diagnostic tests. (12 points total) - All patient's relevant diagnostic tests and results included (3) - Rationale provided for each diagnostic test performed (3) - Explanation provided of what a normal diagnostic test result would be in the absence of current diagnosis (3) - Explanation of how each of the patient's relevant diagnostic test results correlate with current diagnosis (3)		Total Points:12 Comments: Excellent job! All relevant diagnostic test were included with rationales. Normal findings were included and an explanation of how each test correlates to the patient's diagnosis.	
6. Correlate the patient's current diagnosis with all related medications. (9 points total) All related medications included (3)		Total Points:9 Comments: Great job including all medications. All information is detailed and accurate.	

• Rationale provided for the use of each medication (3) • Explanation of how each of the patient's relevant medications correlate with current diagnosis (3)	
7. Correlate the patient's current diagnosis with all pertinent past medical history. (4 points total) • All pertinent past medical history included (2) • Explanation of how patient's pertinent past medical history correlates with current diagnosis (2)	Total Points:4 Comments: Great job correlating the patient's past medical history with current diagnosis.
8. Prioritize nursing interventions related to current diagnosis. (6 points total) • All nursing interventions provided for patient prioritized and rationales provided (6)	Total Points:6 Comments: All pertinent nursing interventions are prioritized, all realistic for your patient, and you provided detailed rationales.
9. Discuss the role of interdisciplinary team members in the care of the patient. (6 points total) • Identifies all interdisciplinary team members currently involved in the care of the patient (2) • Explains how each current interdisciplinary team member contributes to positive patient outcomes (2) • Identifies additional interdisciplinary team members (not involved currently) that should be included in the care of the patient to ensure positive patient outcomes (2)	Total Points:6 Comments: Great job identifying additional interdisciplinary team members that should be included to ensure positive outcomes for your patient.
Total possible points = 65 51-65 = Satisfactory 33-50 = Needs improvement <32 = Unsatisfactory Course Objective: 2. Formulate nursing care plans, correlations, or clinical reports that demonstrate patient-centered care of diverse populations, evidence-based practice, and clinical judgment. (1,2,3,4,5,8)* Clinical Competency: 2(a.) Correlate relationships among disease process, patient's history, patient symptoms, and present condition utilizing clinical judgment skills. (Noticing, Interpreting, Responding) *End-of-Program Student Learning Outcomes	Total Points: 65/65 Comments: Excellent job, Tasha! Your pathophysiology was very detailed, thorough and well done. Keep up all your hard work! CB

*End-of- Program Student Learning Outcomes

STUDENT NAME(S): **Natasha Doughty, Kenneth Seibold, Paige Stacy, Madison Taylor**

GROUP #: **1**

SCENARIO: **Week 8 Simulation**

OBSERVATION DATE/TIME(S): **2/26/2024 0800-1000**

CLINICAL JUDGMENT COMPONENTS	OBSERVATION NOTES				
NOTICING: (1,2)* - Focused Observation: E A D B - Recognizing Deviations from Expected Patterns: E A D B - Information Seeking: E A D B	Notices patient's heart rate is decreased. Notices patient's SpO2 is decreased. Initially does not recognize rhythm change after administration of Atropine, but notices another decrease in heart rate. Notices patient's heart rhythm change after prompted by the physician. Notices patient has a cough. Notices patient's heart rhythm is irregular and increased. Notices patient is feeling dizzy after administration of medication. Notices patient's heart rhythm does not change after diltiazem is administered. Notices blood pressure is decreased. Notices patient has a history of CHF. Notices patient's cough has worsened after fluid bolus. Notices patient's lung sounds have changed. Notices patient is unresponsive. Notices patient is pulseless.				
INTERPRETING: (1,2)* - Prioritizing Data: E A D B - Making Sense of Data: E A D B	Interprets patient's initial heart rhythm as sinus bradycardia. Recognizes the need for medication to increase patient's heart rate. Initially interprets the patient's heart rhythm change as sinus bradycardia, then interprets it as a second-degree type II heart block. Interprets patient's second heart rhythm change as a third-degree heart block. Interprets patient's initial heart rhythm as atrial fibrillation. Recognizes the patient cannot be cardioverted right away due to unknown length of time on anticoagulant. Recognizes the need for medication to decrease the heart rate. Recognizes the need to increase the blood pressure. Initially interprets the patient's lung sounds as diminished rather than crackles. Interprets patient's heart rhythm as ventricular tachycardia. Interprets correct medications for treatment. Interprets patient's low potassium as a potential cause for cardiac arrest.				
RESPONDING: (1,2,3,5,6,7)* - Calm, Confident Manner: E A D B - Clear Communication: E A D B - Well-Planned Intervention/Flexibility: E A D B - Being Skillful: E A D B	Introduces self and identifies patient. Places patient on the monitor and obtains vital signs. Calls the physician and attempts to provide SBAR. Does not place patient on oxygen. Administers 1 mg of Atropine IVP. Does not repeat all vital signs. Calls the physician due to decreasing heart rate. Attempts to provide SBAR, but does not have all the assessment data. Recommends transcutaneous pacing, amiodarone and epinephrine. Introduces self and identifies patient. Obtains vital signs, places patient on the monitor and performs an assessment. Asks patient about medical history. Calls the physician and attempts to provide SBAR. Recommends diltiazem				

*End-of- Program Student Learning Outcomes

	for treatment. Applies oxygen on the patient. Administers diltiazem per orders. Reassesses the monitor and blood pressure after diltiazem is administered. Calls the physician and provides SBAR. Recommends cardioversion and a fluid bolus to increase blood pressure. Administers fluid bolus. Reassesses patient. Asks the patient to perform a deep cough to help bring heart rate down. Initially does not stop fluids. Calls physician and provides update. Calls code. Places patient on the monitor. Calls physician. Performs CPR. Administers epinephrine 1 mg IVP. Continues CPR. Places fast patches on patient. Begins bagging the patient. Performs defibrillation. Recommends amiodarone as potential treatment.
REFLECTING: (1,2,5)* • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D B	Discussed first scenario, identification and treatments for symptomatic bradycardias. Reviewed chart to look for causes of heart block (metoprolol, patient history). Talked about holding medication to see if sinus rhythm will be restored. Alternate drugs for complete heart block discussed (epi, dopamine). Discussed pacing options for symptomatic bradycardias (transcutaneous, transvenous, permanent). Talked about the importance of adjusting electrical current to obtain capture, need for medication). Excellent teamwork! Discussed recognition of A-fib and associated symptoms. Talked about goals of diltiazem therapy. Explanation and demonstration of synchronized cardioversion; discussed differences between cardioversion and defibrillation, the need for sedating medications prior to delivering shock. Great teamwork and communication. Discussed the importance of immediate CPR and defibrillation with pulseless v-tach. Discussed alternative to epi (amiodarone). Roles of the code team discussed (recorder, CPR, airway, meds, lead). Potential causes of code blue discussed (review of chart reveals low K+). Defibrillation discussed, starting low and increasing joules with subsequent shocks. Excellent job!
SUMMARY COMMENTS: * = Course Objectives Satisfactory completion of the simulation scenario is a score of “Developing” or higher in all areas of the rubric. E= Exemplary A= Accomplished D= Developing B= Beginning	Lasater Clinical Judgement Rubric Comments: Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs. Recognizes most obvious patterns and deviations in data and uses these to continually assess. Actively seeks subjective information about the patient’s situation from the patient and family to support planning interventions; occasionally does not pursue important leads. Interpreting: Focuses on the most relevant and important data useful for explaining the patient’s condition. In most situations, interprets the patient’s data patterns and compares with known patterns to develop an intervention plan and accompanying rationale; the exceptions are rare or in complicated cases where it is appropriate to seek the guidance of a specialist or a more

Scenario Objectives: • Differentiate the clinical characteristics and ECG patterns of common dysrhythmias. (1,2)* • Choose nursing interventions for patients who are experiencing dysrhythmias. (1)* • Differentiate between defibrillation and cardioversion. (1,2,6)* • Communicates collaboratively to other healthcare providers utilizing SBAR. (3,5,6,7)*	experienced nurse. Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations. Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport. Interventions are tailored for the individual patient; monitors patient progress closely and is able to adjust treatment as indicated by patient response. Displays proficiency in the use of most nursing skills; could improve speed or accuracy. Reflecting: Independently evaluates and analyzes personal clinical performance, noting decision points, elaborating alternatives, and accurately evaluating choices against alternatives. Demonstrates commitment to ongoing improvement; reflects on and critically evaluates nursing experiences; accurately identifies strengths and weaknesses and develops specific plans to eliminate weaknesses. Satisfactory completion of the simulation scenario. Great job!

EVALUATION OF CLINICAL PERFORMANCE TOOL
Advanced Medical Surgical Nursing- 2024

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:

Student eSignature & Date:

ar 12/13/2023
