

**EVALUATION OF CLINICAL PERFORMANCE TOOL**  
**Nursing Foundations – 2024**

**Firelands Regional Medical Center School of Nursing**  
**Sandusky, Ohio**

**Student:**

**Final Grade:** Satisfactory/Unsatisfactory

**Semester:** Fall

**Date of Completion:**

**Faculty:** Frances Brennan, MSN, RN; Amy Rockwell, MSN, RN;  
Chandra Barnes, MSN, RN; Nick Simonovich, MSN, RN  
Heather Schwerer, MSN, RN; Brittany Lombardi, MSN, RN, CNE

**Faculty eSignature:**

**Teaching Assistant:** Stacia Atkins, BSN, RN

**DIRECTIONS FOR USE:**

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S)**, **Needs Improvement (NI)**, **Unsatisfactory (U)**, and **Not Available (NA)**. The faculty member will initial if in agreement with the student's evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written in the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a "S, NI, U, or NA". If the student does not self-rate, then it is an automatic "U". A student who submits the clinical evaluation tool late will be rated as "U" in the appropriate competency(s) for that clinical week. Whenever a student receives a "U" in a competency, it must be addressed with a comment as to why it is no longer a "U" the following week. If the student does not state why the "U" is corrected, it will be another "U" until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. **An unsatisfactory or needs improvement as a final evaluation in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. Patterns of performance over the course of the semester will be utilized to determine the final competency evaluations. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.**

**METHODS OF EVALUATION:**

|                                          |                     |
|------------------------------------------|---------------------|
| Skills Lab Checklists                    | Faculty Feedback    |
| Care Map Grading Rubric                  | Documentation       |
| Administration of Medications            | Clinical Reflection |
| Simulation Scenarios                     |                     |
| Skills Demonstration                     |                     |
| Evaluation of Clinical Performance Tool  |                     |
| Clinical Discussion Group Grading Rubric |                     |
| Lasater Clinical Judgment Rubric         |                     |

**ABSENCE (Refer to Attendance Policy)**

| Date                | Number of Hours | Comments | Make Up (Date/Time) |

## **PERFORMANCE CODE**

### **SATISFACTORY CLINICAL PERFORMANCE**

**Satisfactory (S):** Safe, accurate each time, efficient, coordinated, confident, focuses on the patient, some expenditure of excess energy, within a reasonable time period, appropriate affective behavior, occasional supporting cues, minimal faculty feedback needed related to written clinical work.

### **UNSATISFACTORY CLINICAL PERFORMANCE**

**Needs Improvement (NI):** Safe, accurate each time, skillful in parts of behavior, focuses more on the skill and self rather than the patient, inefficient, uncoordinated, anxious, worried, and flustered at times, expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues, faculty feedback required in several areas of clinical written work.

**Unsatisfactory (U):** Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U", the faculty member (s) will continue to rate the competency unsatisfactory.

### **OTHER**

**Not Available (NA):** The clinical experience which would meet the competency was not available.

**\*Grey shaded weekly competency boxes do not need a student evaluation rating or faculty/teaching assistant initials.**

---

| Objective                                                                                                                               |        |                      |        |        |        |             |        |          |          |          |         |         |         |         |                 |       |

|                                                                                                                                         |        | Meditech Orientation |        |        |        | No Clinical | NA     | 3T<br>70 | NA       | 3T<br>43 |         |         |         |         |                 |       |

#### Comments

**\*\*Document your clinical location and patient age in the designated box above.**

Week 8(1c,d): Great job showing respect for your patient's needs, being compassionate and kind while delivering care. You also demonstrated the appropriate use of Maslow's hierarchy of needs during the head to toe assessment performed on your patient during this clinical experience, being able to recognize physiological needs of your patient when performing head to toe assessment. CB

| Objective                                                                                                                                                                                                     |        |        |        |        |        |        |        |        |          |        |         |         |         |         |                 |       |

Clinical judgment terminology embedded in each competency – noticing, interpreting, responding, reflecting

**Comments**

Week 8- I feel that I need improvement in performing my head-to-toe assessment because I missed capillary refill and having the patient squeeze my hands. I will improve by practicing my head-to-toe assessment three times over the weekend so I can remember not to miss steps such as capillary refill and having the patient squeeze my hands during clinical. **Rylee, with more practice and experience, you will see that the head-to-toe assessment will become easier. CB**

**Week 8(2a,b): Rylee, you performed a systematic head to toe assessment and retrieved all vital signs within a timely manner. CB**

Week 9-Although I did do better than at my last weeks clinical in my head-to-toe assessment I had a hard time feeling the radial pulse of my patient. For my first clinical patient finding her radial pulse was not hard for me but I know every patient is different with their strength and the location of their radial pulse. I put NI for vital signs because although I could feel the radial pulse I couldn't correctly count out the pulse. Which is why I put NI for both my head-to-toe assessment and vital signs.

#### Comments

Week 6-3(a-f) These competencies were rated as “U” because you did not self-rate. According to the performance code on page 2 of this document, if a student does not self-rate a competency the competency is graded “U.” A “U” in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the “U”, the faculty member (s) will continue to rate the competency unsatisfactory. Please be sure to include this on your Week 7 tool. If you have any questions about this process, please do not hesitate to reach out. BL

I will have Satisfactorys in all competences by filling out all competencies for every week. Rylee, thank you for addressing the reason you received an “U” and how to correct it. CB

Week 8(3a,c,d,e): Great job receiving hand off report on your patient. Competencies 3c-f were changed to “S” because you used appropriate medical terminology with communication, you reported concerns appropriately, and you participated as an accountable health care team member. CB

Midterm (3c): You are Satisfactory in this competency at midterm by addressing a plan to ensure all areas of the clinical tool are filled out properly. CB

#### Comments

Week 2(4c,d): Satisfactory for listening attentively and actively participating in the Meditech orientation clinical. You showed beginning competence in the ability to access a patient's EHR, document care in an intervention, and locate patient data. You were able to access Lexicomp to locate patient education materials. Additionally, nursing policies and procedures were located on the health system intranet. Great job! NS/CB

Week 8(4a,b,c,f): Satisfactory job with documentation of the head to toe assessment and vital signs of your patient. Make sure to note any areas you may have forgot to assess, so that assessments and documentation are thorough and accurate. You did a good job utilizing Meditech for documentation and to look up patient information. You completed your first cdg, meeting all requirements per the grading rubric, excellent job! Please make sure that you utilize the sheet Brittany and Nick both gave you regarding intext citations and references. The intext citation for your cdg should be written (Venes, 2021). CB

Comments

**\*\*You must document the location of the pull station and extinguisher here for your first clinical experience.**

Week 6-5(a,b,d,e) These competencies were rated as “U” because you did not self-rate. According to the performance code on page 2 of this document, if a student does not self-rate a competency the competency is graded “U.” A “U” in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the “U”, the faculty member (s) will continue to rate the competency unsatisfactory. Please be sure to include this on your Week 7 tool. If you have any questions about this process, please do not hesitate to reach out. BL

I will get a satisfactory in all competencies by filling out every competency for every week. Rylee, thank you for addressing the reason you received an “U” and how to correct it. CB

**Week 8-** Fire extinguisher is located by room 3027. Pull station is located by the nursing director’s door. Thank you! CB

Week 8(5a,b): Great job utilizing correct body mechanics and raising the bed while performing an assessment. You did a great job ensuring that you foamed in/out when entering/exiting patients’ rooms. CB

\* End-of-Program Student Learning Outcomes

Clinical judgment terminology embedded in each competency – noticing, interpreting, responding, reflecting

**\*\* Strength/weakness reflection (a,b): Must have different written example each week of clinical/lab. You must explain your plan for how you will improve. Example, “I am having a difficult time with obtaining a manual BP. I will get a BP cuff from Amy and practice manual BP’s with at least three members of my family this week.” Please ensure that you answer this section in-depth with your plan of action. Each week must be different.**

Week 8- One of my strengths is that I have good communication skills going into my patients room. I told her why I was doing her blood pressure, pulse oximeter, counting her respirations, and taking her pulse. I wanted her to know why I was doing those things so she wasn’t confused. I tried making conversation with her but she was tired and had a headache so she wasn’t fully compatible to communicate with me. One of my weaknesses from clinical is that I forgot some questions to ask and examining some things on my patient for my head-to-toe assessment. To fix this issue, I will practice doing a head-to-toe assessment in my room five times this week before clinical. Rylee, you did a great job communicating with your patient this week. You have a great plan in place to help with your weakness, ensuring that you will not miss bits and pieces of your head to toe assessment. CB

Week 9- **Strengths**-One of my strengths is that I performed my head-to-toe assessment well. I asked all the necessary questions and performed all the actions I had to too complete my head-to-toe assessment. **Weakness**-One of my weaknesses I feel like I need to work on is being confident. I tend to underestimate myself because I have never worked in a hospital environment before and its all new to me. I feel like there really isn’t anything that I can practice on by being more confident. The only way I think I can get more confident is by gaining more experience. This clinical made me a lot more confident but only in certain things that I did such as knowing where all of the vital sign equipment was and knowing my head-to-toe assessment.

Identify all abnormal assessment findings (subjective and objective); include specific patient data.              | (lists at least 7*)<br>*provides explanation if < 7 | (lists 5-6)     | (lists 5-7 but no specific patient data included) | (lists < 5 or gives no explanation) |               |          |
|                        | 2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.                               | (lists at least 3*)<br>*provides explanation if < 3 |                 | (lists 3 but no specific patient data included)   | (lists < 3 or gives no explanation) |               |          |
|                        | 3. Identify all risk factors relevant to the patient.                                                                | (lists at least 5*)<br>*provides explanation if < 5 | (lists 4)       | (lists 3)                                         | (lists < 3 or gives no explanation) |               |          |
| Interpreting           | 4. List all nursing priorities and highlight the top priority problem.                                               | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |
|                        | 5. State the goal for the top nursing priority.                                                                      | Complete                                            |                 |                                                   | Not complete                        |               |          |
|                        | 6. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem. | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |
|                        | 7. Identify all potential complications for the top nursing priority problem.                                        | (lists at least 3)                                  | (lists 2)       |                                                   | (lists < 2)                         |               |          |
|                        | 8. Identify signs and symptoms to monitor for each complication.                                                     | (lists at least 3)                                  | (lists 2)       |                                                   | (lists < 2)                         |               |          |
| Responding             | 9. List all nursing interventions relevant to the top nursing priority.                                              | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |
|                        | 10. Interventions are prioritized                                                                                    | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |
|                        | 11. All interventions include a frequency                                                                            | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |
|                        | 12. All interventions are individualized and realistic                                                               | > 75% complete                                      | 50-75% complete | < 50% complete                                    | 0% complete                         |               |          |

| Criteria   |                                                                                                                                                                                               | 3              | 2               | 1              | 0            | Points Earned | Comments |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-----------------|----------------|--------------|---------------|----------|
|            | 13. An appropriate rationale is included for each intervention                                                                                                                                | > 75% complete | 50-75% complete | < 50% complete | 0% complete  |               |          |
| Reflecting | 14. List all of the highlighted reassessment findings for the top nursing priority.                                                                                                           | >75% complete  | 50-75% complete | <50% complete  | 0% complete  |               |          |
|            | 15. Evaluation includes one of the following statements: <ul style="list-style-type: none"> <li>Continue plan of care</li> <li>Modify plan of care</li> <li>Terminate plan of care</li> </ul> | Complete       |                 |                | Not complete |               |          |

### Reference

An in-text citation and reference are required.

The care map will be graded “needs improvement” if missing either the in-text citation or reference, but not both.

The care map will be graded “unsatisfactory” if no in-text citation AND reference is included.

Total Possible Points= 45 points

45-35 points = Satisfactory

34-23 points = Needs Improvement\*

< 23 points = Unsatisfactory\*

**\*Total points adding up to less than or equal to 34 points require revision and resubmission until Satisfactory. Refer to the course specific requirements for resubmission deadlines.**

**\*\*\*Students that are not satisfactory after 2 attempts will be required to meet with course faculty for remediation. \*\*\***

\* Course Objectives

**EVALUATION OF CLINICAL PERFORMANCE TOOL**  
**Nursing Foundations – 2024**

**Firelands Regional Medical Center School of Nursing**  
**Sandusky, Ohio**

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
