

### INFECTION CONTROL “QUALITY” SCAVENGER HUNT

**Assignment:** The student will independently participate in a quality assurance review of charts by monitoring for appropriateness and compliance of precautions for all patients who are currently in isolation. This will be completed during the Infection Control clinical. This assignment will be submitted to Dawn Wikel’s mailbox on the next scheduled class, lab, or simulation day following the experience. The faculty will review for completion and forward to the Firelands Infection Preventionist, Sydney Cmar, RN, MPH.

**Instructions:** Under the direction of Sydney Cmar or Sandie Beal, you will go to various inpatient units and complete this assignment. You will make rounds on the nursing unit to determine which patients are in isolation precautions (all patients in isolation will be assessed). Utilizing the patient chart in Meditech, you will then review and record the information included on the checklist. Sydney Cmar will review this process with you during your Infection Control clinical.
