

# FINAL SUMMARY OF STUDENT'S PROGRESS AND DEVELOPMENT

## Firelands Regional Medical Center School of Nursing Faculty Manual

Prior to graduation, senior students will complete the Final Summary of Student's Progress and Development form which is filed and retained in the graduate folder.

NAME OF STUDENT (LAST)	(FIRST)	(MIDDLE)
Dauch	Tylie	Jennifer

**1. Describe your outstanding personality characteristics (relevant to nursing) possessed at the completion of the program:**

As this program is coming to an end, I have noticed a lot of qualities about myself that will better me in the nursing field. I am definitely a go getter and when I have a certain goal in mind, I do not let anything stand in my way. I also like to take charge. I tend to be the ringleader in situations, and this will for sure help me in the nursing field.

**2. Describe your special interests and abilities in nursing:**

My goal ever since I was little was to deliver babies. Since going through the maternal child chapter, I have taken a large interest in lactation. I find the breastfeeding process to be very interesting. I think it is awesome how our bodies are able to produce nutrients for our babies and tailor the milk to exactly what the baby needs. As far as my abilities in nursing, I am very good at interacting with my patients and their families. I am often times told that I am able to talk a patient or their family off the ledge and provide a sense of comfort. I also am a quick learner and can remember things you told me without having to explain multiple times.

**3. Discuss your experiences with interpersonal relationships – faculty and staff, patients and their families, and members of the healthcare team throughout the nursing program:**

I have had many positive experiences with interpersonal relationships throughout my time at the school. All of the faculty and staff have become like a family to me. I have learned so much from my instructors and they never fail to make me feel like I am important. The faculty and staff are one of a kind and I would recommend this school to anyone because of them. As far as patients and their families, I have had very positive experiences with them as well. I love getting to know mt patients and making them feel comfortable with me. Talking to the patients and their families is one of my favorite things about nursing. The nurses and staff and Firelands were also amazing. I enjoyed learning from all of them and have nothing bad to say about the experience.

**4. Participation in activities throughout the program:**

I personally did not participate in many activities through the school. I was very much focused on my studying throughout nursing school. If I wasn't studying though, I was finding time to spend with my family and friends. This unfortunately, did not leave much time for me to do extra activities through the school. All of the different clubs set up some fun activities through the years and I do regret not being able to go to more of them. It always seemed like such a fun and

positive environment.

**5. Explain at least 2 professional goals you would like to achieve during your nursing career:**

One professional goal I hope to achieve is receiving my lactation certification. This is a goal because I find lactation very interesting, and I believe I can use this knowledge to help mothers who are struggling to breastfeed.

Another goal I hope to achieve is receiving my electronic fetal monitoring certification. This is a goal because in order to start working on the floor on my own, I will need this certification. It will help me better understand the monitoring system and why the things that are on the monitor are happening.

**6. List your address at the time of graduation- Include a future address if known:**

736 Fourth Street  
Fremont, Ohio 43420
