

Unit 8: Nursing Informatics
Z-Chapter 23
ONLINE CONTENT (1 H)

Unit Objectives:

- Discuss trends associated with the computerized electronic record, e-health, and mobile devices. (6,7)*
- Review the steps in evaluating the validity of a website. (7)*

*Course Objectives

Review Z-chapter 23 the assignment and place your answers to the following questions in the Z-CH # 23 drop box by 0800 on 3/24/2025.

Patients often use the Internet to search for health-related issues. Search the Internet for any health-related issue of your choosing. Evaluate the website by answering the following questions:

1. Do the authors have qualifications listed? What are their qualifications? What is the domain? (.gov, .edu, .org)
There aren't any authors that I could find; it only states that it's from University Hospitals Rainbow Babies & Children's team. The domain is .org.
2. When was the site created? When was the site last updated or revised?
It was created in 2025 and last revised in 2025.
3. Who is the targeted audience? Does the web site present facts or opinions?
The target audience is for parents of kids who are diagnosed with type 1 diabetes. The web site presents only facts about diabetes and kid's stories of their life living with type 1 diabetes.
4. How complete and accurate is the content information? Does it agree with other expert sources? (Provide expert sources you researched.)
<https://my.clevelandclinic.org/health/diseases/21500-type-1-diabetes>
I think the information is very helpful and accurate because a lot of the information agrees with the Cleveland Clinic, especially with signs and symptoms you are looking out for with type 1 diabetes. It also give a lot of the same information on how to manage the type 1 diabetes, but it changes up the routine a bit to conform to how a child is living with it compared to an adult.
5. Does the site load quickly? Is it a secured site? Are there graphics, or pictures on the page that serve a purpose? If so what are they and how do they relate to the health issue?
The site does load quickly and it is secured. There are pictures of happy children using a glucose monitor and it serves a purpose to show you that children can live happily with a diagnosis of type 1 diabetes. It also soothes a lot of parents because the diagnosis can sometimes be more difficult on the parent than it is for the child.

In order to receive full credit (1 H class time) for this assignment, it must be completed in its entirety by the due date/time assigned. Any assignments not completed in its entirety by the assigned due date and time will result in missed class time.
