

March 27, 2025

The Honorable Marcy Kaptur
United States House of Representatives
2186 Rayburn House Office Building
Washington, DC 20515

Dear Representative Kaptur,

My name is Kaden Troike and I am a nursing student finishing up my last semester at the Firelands Regional Medical Center School of Nursing, in Sandusky, Ohio. I am writing to you regarding the issue of abortion, which continues to be an epidemic and significant matter within our country. I am respectfully expressing my opposition to the practice of abortion and urging you to consider stronger legislative measures to protect human life from conception. The right to life is a fundamental human right, and I believe that life begins at conception. I believe that babies are a gift from God. Jesus says "come as you are", he does not want children dead due to imperfect circumstances. Terminating a pregnancy, regardless of the circumstances, destroys a life that has the potential to thrive.

While I acknowledge that this issue is highly complex and touches deeply on personal decisions, feelings, and emotions. I firmly believe that we can find ways to provide support to women in need without resorting to abortion. Instead, we should invest in support services, including adoption, counseling, healthcare, and education, that can promote women and families to make life first choices.

As you continue your service in Congress, I respectfully request that you advocate for policies that promote the protection of life and explore alternatives to abortion. Thank you for your time and attention to this matter. I look forward to hearing your thoughts on this critical issue.

Sincerely,
Kaden Troike
