

EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2025

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

Student: Colleen Camp

Final Grade: Satisfactory

Semester: Spring

Date of Completion: 4/25/2025

Faculty: Dawn Wikel, MSN, RN, CNE; Rachel Haynes, MSN, RN; Kelly Ammanniti, MSN, RN, CHSE;
Monica Dunbar, DNP, RN; Heather Schwerer, MSN, RN; Nick Simonovich, MSN, RN

Faculty eSignature: Heather Schwerer MSN, RN

Teaching Assistant: Stacia Atkins, BSN, RN

DIRECTIONS FOR USE:

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S)**, **Needs Improvement (NI)**, **Unsatisfactory (U)**, and **Not Available (NA)**. The faculty member will initial if in agreement with the student's evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written in the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a "S, NI, U, or NA". If the student does not self-rate, then it is an automatic "U". A student who submits the clinical evaluation tool late will be rated as "U" in the appropriate competency(s) for that clinical week. Whenever a student receives a "U" in a competency, it must be addressed with a comment as to why it is no longer a "U" the following week. If the student does not state why the "U" is corrected, it will be another "U" until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. **An unsatisfactory or needs improvement as a final evaluation in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. Patterns of performance over the course of the semester will be utilized to determine the final competency evaluations. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.**

METHODS OF EVALUATION:

Skills Lab Competency Tool & Skills Checklists
Simulation, Prebriefing, & Reflection Journals
Nursing Care Map Rubric
Meditech Documentation
Clinical Debriefing
Clinical Discussion Group Grading Rubric
Evaluation of Clinical Performance Tool
Lasater's Clinical Judgment Rubric & Scoring Sheet
Virtual Simulation Scenarios

ABSENCE (Refer to Attendance Policy)

Date	Number of Hours	Comments	Make-up (/Date/Time)
4/12/2025	1 hour	Simulation #2 survey	4/14/2025 1 1 hour

Faculty's Name	Initials
Kelly Ammanniti	KA
Stacia Atkins	SA
Monica Dunbar	MD
Rachel Haynes	RH
Heather Schwerer	HS
Nick Simonovich	NS
Dawn Wikel	DW

PERFORMANCE CODE

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe, accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe; accurate each time; skillful in parts of behavior; focuses more on the skill and self rather than the patient; inefficient, uncoordinated, anxious, worried, flustered at times; expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues; faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

***Grey shaded boxes do not need a student evaluation rating or faculty/teaching assistant initials.**

Date	Care Map Top Nursing Priority	Evaluation & Instructor Initials	Remediation & Instructor Initials	Remediation & Instructor Initials
1/27/25	Impaired Physical Mobility	S/RH	N/A	N/A
3/24/2025	Impaired cerebral tissue perfusion	S/HS	N/A	N/A

Note: Students are required to submit two satisfactory care maps over the course of the semester. If the care map is not evaluated as satisfactory upon initial submission, the student must revise the care map based on instructor feedback/remediation and resubmit. A maximum of two remediation attempts will be provided for a single care map and if still unsatisfactory, the student will be required to start fresh and initiate a care map on a new patient. At least one care map must be submitted prior to midterm.

Objective

1. Illustrate correlations to demonstrate the pathophysiological alterations in adult patients with medical-surgical problems. (2,3,4,5)*

Comments:

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Week 1 (1h)- During week 1, the Meditech, FSBS and IV pump sessions were all considered clinical hours. You came prepared to each of them and demonstrated competency accordingly. For this reason, you have earned an S for this competency. NS/SA/DW/HS

Week 3: 1(c, d, e) This week you did a great job of discussing your patient's pathophysiology of their illness as well as discussion of their medications. You were able to correlate why each medication was related to their care. RH

Week 5 - (1 a, b, c, d, e)-Great job this week! This week you did a great job discussing your patient's pathophysiology of their illness. You were also able to review the diagnostics and discuss how they correlated with the patient's diagnosis. You were able to discuss the importance of the medications that your patient was taking and how they impacted the plan of care. HS

Week 9 6(1-h) - You did well this week discussing alterations to your patient's health and implementing the nursing care required. You cared for a patient admitted with a diabetic foot ulcer and cellulitis to the lower extremity. You discussed his medical history of diabetes and poor health management as contributing factors. You analyzed the disease process and discussed potential complications such as osteomyelitis. You correlated his signs and symptoms of chills, fever, pain, and redness to the lower extremity as being related to an acute infection. Diagnostic tests were reviewed and discussed, including the foot xray, MRI, and WBC monitoring for worsening infection. Treatment was correlated related to the infection and diabetic management. You identified the rationale behind the IV antibiotic and were well-prepared to discuss the medication prior to administration. You also noticed significant hyperglycemia with symptoms of polyuria, polydipsia, and polyphagia. You identified non-compliance with a diabetic diet and documented appropriately. The medical treatment also included an I&D of his foot and daily dressing changes which were implemented effectively. Nutritional needs were discussed, focusing on education for a diabetic diet and avoiding excess carbohydrates. Good job this week caring for your patient and enhancing your clinical judgment through chart review and discussion. NS

Week 10 (1a-e)- Great job this week. You were able to discuss with the patient as well as investigating in the chart to determine the patient's history and current diagnoses. You were able to correlate the patients known risk factors for stroke and identify those symptoms that he was experiencing after the stroke. You were also able to review his diagnostic testing that was completed and determine how that correlated with his diagnosis of stroke. HS

Week 11 (1a-e)- You are continuing to show awesome growth with learning about your patient's pathophysiology and correlating symptoms, diagnostics, pharmacotherapy, treatments, and nutritional needs to better care for them. You are able to determine developmental stages and gear education based on needs. You also are prepared for clinical and asked a ton of awesome questions about leadership. Great job! SA

Week 12 Rehab Clinical Objective 1 B-F: This week you were able to correlate the patient's symptoms, diagnostic tests, pharmacotherapy, treatment, and nutritional needs based on their reason for being on the Rehab floor and their past medical history. Great job! MD

Objective

2. Perform physical assessments as a method for determining deviations from normal. (3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
a. Perform inspection, palpation, percussion, and auscultation in the physical assessment of assigned patient. (Noticing)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
b. Conduct a fall assessment and implement appropriate precautions. (Noticing)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
c. Conduct a skin assessment and implement appropriate precautions and care. (Noticing)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
d. Communicate physical assessment. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
e. Analyze appropriate assessment skills for the patient's disease process. (Interpreting)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
f. Demonstrate skill in accessing electronic information and documenting patient care. (Responding)	S		S	S	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
	HS		RH	DW	HS	DW	DW	HS	HS	NS	HS	SA	MD		HS	HS	HS

**Evaluate these competencies for the offsite clinicals: DH: N/A IC: 2f ECSC: N/A

Comments:

Week 1 (2f)- By attending the Meditech clinical update & providing your full, undivided attention during the demonstration of documenting IV solutions and the IV assessment, you are satisfactory for this competency. NS

Week 3: (2a-f) This week you performed a full head to toe assessment on your patient as well as a fall/safety assessment and skin assessment. You were able to identify your patient's laceration dressing was loose and did a wound assessment after removing the dressing. You were able to communicate any abnormalities in your assessment to myself and the nurse. You charted all your findings in the EHR appropriately. RH

Week 5 (2a-f)- You did a nice job with your assessment as well as documenting it within the electronic medical record. You also did a nice job communicating your findings to the RN. You were also able to discuss your focused assessment and the reasoning behind your decision of focus. HS

Week 9 2(a,e) – Good work this week with your assessments, noticing numerous deviations from normal. You prioritized your focused assessments effectively and implemented appropriate interventions. You noticed hyperglycemia with specific signs and symptoms, redness to the lower extremity, and gained experience assessing a diabetic foot wound. Your assessments were completed in a timely manner and were documented accurately. NS

Week 10 (2a-f) You performed a thorough assessment on your patient with a focus on the neurological assessment. You were able to identify that he had some communication issues as well as some issues with dexterity since his cup kept ending up on the floor. HS

Week 11 (2a-f)- Nice job on your assessment. Wonderful job communicating with your primary nurse and peers this week! You have continued to show growth professionally! All documentation was appropriately charted as well as you were able to determine as team leader your peers documentation needs of improvement. SA

Week 12 Rehab Clinical Objective 2 A, D, & F: While you were on clinical you performed a satisfactory physical assessment, communicated abnormal assessments to myself and to the primary nurse, and you were able to satisfactorily document all information to Meditech documentation. MD

Objective																	
3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*																	
Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:	S		S	S	S	NA	S	NA	S	S	S	S	S		NA	NA	S
a. Perform standard precautions. (Responding)																	
b. Demonstrate nursing measures skillfully and safely. (Responding)	S		S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
c. Demonstrate promptness and ability to organize nursing care effectively. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S

**Evaluate these competencies for the offsite clinicals:

DH: 3a

IC: 3a, f, i

ECSC: 3a, j

Comments:

Week 3: (3a, b, d) You used proper hand hygiene throughout both clinical days. You were able to care for your patient while assisting therapy in helping your patient with their ADLs all while keeping safety in mind. You also were able to prioritize your day and organize your day in a way that allowed you to get all things done in a timely manner. You did great working around and with all the various therapies your patient had this week. RH

Week 5 (3 c, d, e)- You were able to prioritize your care for the day and adjust when necessary based on changes that occurred during the day. You were available to help others when needed, and ask for assistance when needed. (3g)-You were able to provide foley care, and educate your patient on the importance of proper foley care. (3h)- You were able to administer SQ heparin for DVT prophylaxis. HS

Week 9 3(b,c,d,f) – You did well prioritizing and managing your care this week. Your promptly reported abnormal findings, such as his elevated blood glucose levels. When you noticed the first FSBS was significantly elevated, you used appropriate clinical judgement to obtain a second FSBS to confirm accuracy. Once you noticed a critically high level, you notified faculty and the assigned RN of your findings. In providing nursing care, you demonstrated competence in various nursing skills. You did a great job preparing IV medications, flushing the IV site, administering injections, and performing wound care. In performing the dressing change, you implemented appropriate aseptic technique and followed physicians' orders appropriately. You were timely in your care, documentations, and communications, ensuring all care needs were met. NS

Week 10 (3b-d) You did a nice job prioritizing your care throughout the day for your patient. You quickly noticed that he was confused even though you were told in report that he was alert and oriented. You made sure to discuss these findings with the primary nurse as well, in which she stated she had the same findings. You made sure to complete a thorough assessment and maintain fall and seizure precautions throughout the shift. HS

Week 11 (3a-f,h-j)- While caring for your patient you were able to identify all of the priority needs for your patient based on their condition and report you received from the night shift nurse. You were able to communicate your priority assessments for the day and what interventions needed to be completed during your shift. You were able to remove dressing as ordered and discontinue an IV. Great job! SA

Week 12 Rehab Clinical Objective 3 C & D: While caring for your patient you were able to identify all of the priority needs for your patient based on their condition and report you received from the night shift nurse. You were able to communicate your priority assessments for the day and what interventions needed to be completed during your shift. Great job! MD

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
k. Administer PO, SQ, IM, or ID medications observing the rights of medication administration. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
l. Ensure patient safety through proper use of EHR, IV flow sheet, and BMV. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
m. Calculate medication doses accurately. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S

	HS		RH	DW	HS	DW	DW	HS	HS	NS	HS	SA	MD		HS	HS	HS

**Evaluate these competencies for the offsite clinicals:

DH: N/A

IC: N/A

ECSC: N/A

Comments:

Week 1 (3o)- During the IV pump session, you actively participated in the programming and maintenance of the Alaris IV pump. Additionally, you accurately identified abnormal IV site assessment data with an IV site monitoring activity. HS

(3r)- The student was able to satisfactorily perform a Quality Control check of the glucometer as well as demonstrate skills and knowledge required for proper fingerstick blood glucose measurement with the ACCU-CHEK Inform II glucometer. SA/DW

Week 3: (3k-m) You did great with your medication administration this week. You identified all medications and were able to provide me with detailed information about each medication, why the patient was getting the medications, and what to look for after administering the medications. You performed all checks prior to administration. You were organized and diligent while administering medications. You were able to scan all medications in the EMAR and chart them appropriately. You administered PO and topical medications this week. RH

Week 5 (3k, l, m, p)- You did a nice job with medication administration this week! You were able to administer PO, SQ medication and do an IV flush. You followed the rights of medication administration and completed all checks prior to administering. You were able to research each medication and answer all questions related to the medications. (3r) You were able to complete a FSBS and determine the appropriate amount of insulin to be administered. HS

Week 9 3(k-r) – Excellent job with medication administration this week. The rights of medications administration were observed, and safety checks were performed. You were well-prepared to discuss each medication, including the indication, side effects, and nursing implications for each. You did well administering PO medications safely. Experience was gained preparing IV antibiotics using reconstitution to mix the powder medication. Tubing was primed accurately and independently. A saline flush was performed to confirm patency of the IV site using aseptic technique while also monitoring for signs of complications. The IV pump was programmed accurately to ensure proper administration. Well done. Numerous FSBS were performed. Dosage calculation was performed accurately based on the patient's corrective scale. You did a great job with your subcutaneous injections, selecting appropriate injection sites and utilizing the insulin pen effectively. Overall you did well with several new medications skills and promoting safety throughout. NS

Week 10 (3k, l, m, p)- You did a nice job with medication administration this week! You were able to administer several oral medications. You followed the rights of medication administration and completed all checks prior to administering. You were able to research each medication and answer all questions related to the medications. You did a nice job researching the chart to determine why he was receiving a seizure medication even though we were not informed of anything related to him having seizures in report. HS

Week 11 (3k-m,q)- This week on Rehab you were able to identify the rights of medication administration appropriately and provided a comprehensive analysis of the medications you administered to your patient. Included in the analysis was the type of medication, side effects, and nursing implications for each medication. You were able to provide further information based on the medication you were administering that was included in the nursing implications you discussed. You also were able to identify safe practice for medication administration and performed them well. Awesome medication pass! SA

Week 12 Rehab Clinical Objective 3 K-L: This week on Rehab you were able to identify the rights of medication administration appropriately and provided a comprehensive analysis of the medications you administered to your patient. Included in the analysis was the type of medication, side effects, and nursing implications for each medication. You were able to provide further information based on the medication you were administering that was included in the nursing implications you discussed. You also were able to identify safe practice for medication administration and performed them well. You also were able to use the BMV and document in the EHR appropriately. Awesome medication pass! MD

Objective

4. Use therapeutic communication techniques to establish a baseline for nursing decisions. (1,5,7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final

**Evaluate these competencies for the offsite clinicals:

DH: 4a, b, d

IC: 4b, d, e

ECSC: 4a, b, d, e

Comments:

Week 3: (4b, e, f, g) You did a good job staying in communication with the nurse caring for your patient this week. You were able to use SBAR communication to keep the nurse informed of the care you provided and if there were any changes in your patient's status. You were also able to provide an SBAR handoff at the end of the day to the next provider of care. You did great with your clinical discussion post and finding an evidence-based article that related to your patient this week. RH

Week 4 (4e)- According to the CDG Grading Rubric, you have earned a satisfactory for your Infection Control and Erie County Senior Center discussion this week. Your discussion was thorough and backed by evidence from Nurses' Pocket Guide. Additionally, in terms of APA formatting, I have a couple suggestion: 1. When you are citing a reference within your text, Skyscape is only a platform that houses the actual resource; therefore, you won't say "Skyscape defines...". Instead you will use the author(s) and say, "Doenges et al. defines...". 2. Et al. is used when there are more than 2 authors for the citation. 3. When you cite a direct quote from a resource, the intext citation should include a page or paragraph number that the quote can be found; for example, (Doenges et al., 2022, para 1). A paragraph number is only used when the resource does not have page number, such as an electronic resource like Nurses' Pocket Guide. Please use this feedback to improve with APA formatting for future CDG's and other course/clinical paperwork. Also keep in mind that there is an APA Formatting Examples document in the Clinical Resources on Edvance360 and online resources to help you (ex. Purdue Owl website- I really like this one! https://owl.purdue.edu/owl/research_and_citation/apa_style/apa_formatting_and_style_guide/general_format.html). I am always happy to help you if some of these resources are unclear to you. DW

Week 5 (4e)- Great job with your CDG this week! You were able to find an article that pertained to your patient and discussed the relevance. You successfully met all of the requirements on the rubric for your initial posting and the response to a peer. You answered all of the questions with a thorough explanation for each one. You also provided an in-text citation and a reference for the initial and peer response. Nice job! HS

Week 9 4(a,b,c) – You used strong communication throughout the week with your peers, patient, staff, and faculty. You consistently monitored your patient's status and providing therapeutic communication throughout. You promptly reported your findings to the assigned RN to ensure everyone was on the same page. You also did well collaborating with your peers to enhance your learning. NS

Week 9 4(e) – Your CDG was well done this week. Great job discussing the potential SDOH that could impact your patient's health outcomes. It appears you were able to learn a lot about your patient through communication. He had numerous concerns related to SDOH that could significantly impact his future outlook. I appreciate the time spent discussing these with your patient and learning more about him. It seems that you really focused on providing support during your time caring for him as you noticed he didn't have a strong support system. Good descriptive details provided which were supported with reputable resources. Your response to Morgan, enhancing the conversation with additional thoughts and details. APA formatting looked spot on. All criteria were met for a satisfactory evaluation. NS

Week 10 (4e)- Nice job on your CDG this week! You successfully met all of the requirements on the rubric for your initial posting and the response to a peer. You answered all of the questions and were able to discuss the current and past diagnoses, and correlate them with the ordered medications, and treatment plan for the patient. You also provided an in-text citation and a reference for the initial and peer response. Nice job! HS

Week 11 (4a-g)- Nice job on your CDG as you provided information on your team leading experience. This week as Team Leader you were tasked to give a formal SBAR report to me at the end of the clinical week on Rehab. You had clear communication, appropriate priorities, detailed, and organized with delivery of the information. Thank you for researching education resources for your peers on clinical as well! We discussed in person after your SBAR to include specific on the medical and surgical diagnosis and histories flowed together with appropriate information. Awesome job working with your peers and showing interest in leadership! Great work this week! SA

Week 12 Rehab Clinical Objective 4 E: For clinical this week you provided a CDG that was satisfactory per the CDG rubric. In this CDG, you provided information on patient satisfaction and restorative care that was interesting and detailed regarding your patient. The reference and in-text citation you provided were satisfactory. Please see me if you have further questions! MD

Objective

5. Implement patient education based on teaching needs of patients and/or significant others. (1,6)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
a. Describe a teaching need of your patient.** (Reflecting)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
b. Utilize appropriate terminology and resources (Lexicomp, UpToDate, Dynamic Health, Skyscape) when providing patient education. (Responding)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
			RH	DW	HS	DW	DW	HS	HS	NS	HS	SA	MD		HS	HS	HS

****5a & b- You must address this competency in the comments below for all clinicals on 3T, 4N, or Rehab- describe the patient education you provided; be specific- include the topic, method of delivery, reason for teaching need, materials to support learning through above resources (if applicable), and method used to validate learning.**

Example: Education related to orthostatic hypotension (changing positions slowly by sitting at the side of the bed or chair for a few minutes before moving to another position, utilizing the walker when ambulating) was provided to my patient through discussion and demonstration. This was necessary to maintain patient safety as he/she was experiencing a drop-in blood pressure and dizziness when getting out of bed. A patient education sheet was printed from Lexicomp and given to the patient. The teach back method was used to validate learning.

Comments:

week 3: During this clinical rotation I educated my patient on the proper use of a walker and nonskid socks. This education was provided to ensure her safety during her stay at the hospital as she had recently fallen due to unsteady gait. My patient and I had a discussion and demonstration on how to walk with a walker properly and how to make sure the walker is at the right height for her. I used skyscape to provide this education, and the patient demonstrated back to me how to use a walker properly therefore I knew the education was effective. **This is a great education topic for your patient since they are going home rather than to a nursing home or skilled nursing facility. RH**

Week 5: During this week on clinical I educated my patient on preventing CAUTI. My patient was a 77-year-old male with chronic kidney disease and a chronic catheter. The information I provided was a patient education sheet from Lexicomp, and it stated the different sign and symptoms of a UTI and how to properly clean and manage the catheter. I spoke with my patient's wife, and she told me she changes his catheter at home, and I educated her on being as sterile as possible when she changes it. Overall, I thought the education was successful as my patient and his wife were able to use the teach back method and they asked questions and were very engaged in the learning. **Great job! Nice job discovering that the wife was involved in the patients care, and including her in the education. HS**

Week 9: During this week in clinical I educated my patient on the cessation of substance abuse. My patient was a 65-year-old male who came to the ER with cellulitis and a diabetic foot ulcer. Upon examining his toxicology screen the found he tested positive for cocaine. I used skyscape to educate on the long-term effects of substance abuse and why it is important to stop now. With him having uncontrolled diabetes as well as using cocaine this will cause his body to shut down faster than it normally would if he did not use these toxic substances. Overall I think he took the information well he agreed on cutting back on substances but is going to continue to use. **Very good! This is a difficult topic to provide education on, because you never know how receptive the patient is going to be. Substance abuse is sensitive subject that has an impact both physically and mentally. I commend you for taking on the challenge and providing teaching regarding the long-term effects. I am curious how he responded to this education. Furthermore, he had important teaching needs regarding his diabetic management, as he admitted to you sneaking cookies and muffins leading to a critically elevated FSBS level. It appeared that you developed a strong rapport with him which made your teaching more effective. Well done. NS**

Week 10: During this week in clinical I educated my patient on medication compliance. My patient was a 65-year-old male who came to the ER with confusion after a MVA. After obtaining a CT it showed that he had a stroke. While I was reading through the provider notes I noticed he has a history of HTN and that he stopped taking his medications a year ago. I used skyscape to educate on the importance of taking the medication to prevent further complications and to prevent another stroke from occurring. Great job! Medication compliance is huge especially for hypertension and then that increased risk of stroke with hypertension. I hope he was receptive to the education that you provided him. HS

Week 11: during this week at clinical I educated my patient on the importance of using a walker to prevent falls. My patient was a 82 year old female who was admitted with a sacral fracture and a hip fracture due to a fall. She told me that she has a walker at home, but she doesn't use it often. I used skyscape to educate on the importance of using a walker to help her keep her balance and prevent another fall from occurring. I also educated her on being careful and taking caution when she goes outside to tend to her garden. Great job recognizing the importance of your patient's safety with ambulation! SA

Week 12: This week I used Skyscape to educate my patient on the importance of catheter care. He came into the emergency department with abdominal pain and pain at this catheter site. He was tested for a UTI, and it was negative, but he had a history of UTI's. I educated him on the proper maintenance of his foley and to go to his appointments for when they need to change the catheter since its chronic. Overall he was very receptive to the information and his wife was asking lots of good questions during the process. This is great education for your patient and prevention of UTI development! MD

Objective

6. Implement patient-centered plans of care utilizing the nursing process, clinical judgment, and consideration for cultural, ethnic, and social diversity. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Develop and implement a priority care map utilizing the nursing process and clinical judgment. (Noticing, Interpreting, Responding, Reflecting)			S	NA	S NA	NA	NA	NA	S	NA	S	NA	NA		NA	NA	S
b. Identify factors associated with Social Determinants of Health (SDOH) &/or cultural elements that have the potential to influence patient care.** (Noticing, Interpreting, Responding, Reflecting)			S	NA	S	NA	NA	NA	S	S	S	S	S		NA	NA	S
			RH	DW	HS	DW	DW	HS	HS	NS	HS	SA	MD		HS	HS	HS

****6b- You must address this competency in the comments below for all clinicals on 3T, 4N, or Rehab. Refer to CMS Social Determinates of Health Screening Tool in the Resources folder for the course.**

Comments: See Care Map Grading Rubrics below.

week 3: My patient was a 91-year-old female who lived at home alone. This can affect her patient care because she cannot drive therefore she would have a hard time getting to follow up doctors' appointments and checkups. My patient also has impaired physical mobility making it hard for her to cook and keep up with the home. She did express some concerns about money and how she was going to pay for home health. All of these SDOH can affect her level care because she has limited access to transportation, financial strain, and disabilities. **Can you think of any services that we could provide information to her in order to help with some of these issues? Great observations. RH**

Week 5: My patient was a 77-year-old male who lives at home with his wife. After looking through his chart I saw he and his wife had no problems paying any bills and have a steady home life. One thing that did stand out is their main source of transportation is a family. With that they may not be able to get to appointments or be able to get groceries when they need because they are relying on another person. I think they should look into home health because he does have impaired physical mobility making it hard for him to get to bathroom and keep up with household chores as well as personal hygiene. **Transportation is definitely a concern regarding many aspects as you mentioned. HS**

6a- This was changed to a NA because you did not submit a care map this week. HS

Week 9: My patient was a 65-year-old male who lives in an apartment with his friend. While talking with my patient he told me that he normally gets around by his bicycle or his roommate. This affects his ability to make it to his follow up appointments leading to deterioration in his health because he has to rely on another person for constant transportation. He is currently in the hospital for a foot ulcer and needs to use crutches therefore he cannot ride his bike anywhere if his roommate is unable to take him somewhere. I think he should look into getting information for the Erie County senior transit or a home health aide that could take him to his appointments. **Very good! You elaborated on numerous SDOH that could impact your patient in your CDG as well. Specifically related to his disease process and transportation, this poses numerous**

challenges. The health care provider explained to him about non-weight bearing status to the effected foot and wanted him to use crutches during the healing process. He also wanted to see him in the office for a follow-up appointment a week after discharge. It would not be ideal for him to ride his bike to the appointment considering his weight-bearing limitations, so he is reliant upon others. I think you brought up a great alternative with senior transit. Collaborating with case management to address these concerns would be a good way of advocating for your patients needs. NS

Week 10: My patient was a 65-year-old male who lives at home alone. While talking with my patient he was very confused and disorientated. This could cause some self-care deficits. He is close with his ex-wife, and she stated that he is usually somewhat confused, He usually drives himself, but no he has no way of transportation because he crashed his car. This could cause problems getting to appointments and to the grocery store. He was discharged to providence care center on Wednesday afternoon. This could cause financial strain if his insurance does not cover the full stay. Great job! You have listed several SDOH factors specific to your patient. HS

Week 11: My patient was a 82 year old female who lives at home alone. Her husband had recently passed away 5 months ago, and she has been struggling with that. After looking through her chart I noticed that she also has a history of anxiety and depression. Depression can cause many self-care deficits and feeling lonely. She also uses a walker and cannot drive herself. This will cause her to have a hard time getting transportation to appointments and getting medication from the pharmacy. Having a support system is definitely important to someone's mental health and recovery. Nice job recognizing how important this is! SA

Week 12: my patient was a 77-year-old male who lives at home with his wife. After looking through his chart I noticed that he does not have home health and was planning on going back home alone with his wife. This is concerning because he had a right sided stroke and is not able to perform ADL's. I also noticed that his main source of transportation is family and friends. This may cause issues if no one is around to take him to his appointments and help him get his prescriptions from the pharmacy. I would recommend home health to the family to help him preform his ADL and to make sure he is safe. Transportation is so important! Home health would be an amazing resource for him to utilize! MD

Objective

7. Illustrate professional conduct including self-examination, responsibility for learning, and goal setting. (7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Reflect on an area of strength. ** (Reflecting)	S		S	S	S	NA	S	NA	S	S	S	S	S		NA	NA	S
b. Reflect on an area for improvement and set a goal to meet this need.** (Reflecting)	S		S	S	S	NA	S	NA	S	S	S	S	S		NA	NA	S

	HS		RH	DW	HS	DW	DW	HS	HS	NS	HS	SA	MD		HS	HS	HS

**Evaluate these competencies for the offsite clinicals: DH: All IC: All ECSC: All

**7a and 7b: You must address these competencies in the comments section after each clinical experience. Please write a different comment each week. Remember that a goal includes what you will do to improve, how often you will do it, and when you will do it by (example- "I had trouble remembering to do the three checks of the six medication rights prior to administering medications. I will review the six rights and medication administration content in the textbook twice before the next clinical. Additionally, I will request to meet with my clinical faculty member to practice preparing and administering at least three medications before the next clinical.")

Comments:

Week 1-

One competency I feel I performed strongly in was obtaining a FSBS. I have done this before at home for a family member, therefore I felt this was a good review for me! Great job! HS

One competency I feel I need improvement in is programming the IV pump and remembering what buttons to push for setting the medications. To improve I will re-watch the videos in my IV lab lesson on advance 3 time prior to going to clinical on Wednesday. That is a great plan! You will become more comfortable with the IV pump as you have additional experiences in the clinical setting. HS

Week 3: One competency I feel I performed strongly in was connecting with my patient and understanding her needs. On Wednesday of clinical she was not feeling very motivated to go to therapy and mostly wanted to stay in bed. On Thursday when I went in she got a shower and I curled her hair and it made a huge difference in her motivation to go to therapy. She ended up going to all her session Thursday and seemed to be in a better mood. **You could tell that she was in such a better mood on Thursday after her hair was done rather than on Wednesday when she wanted to sleep all day. RH**

One competency I feel I need improvement in is managing my time. During med pass I am very slow and with therapy being so often throughout the day on 5T I feel that I need to be faster so that I do not interfere with their therapy session. To improve this I will prioritize my tasks every morning when at clinical and I will review med pass steps 3 times before my next clinical date. **This is a good goal, I will say you will have much more practice with this skill during this semester than last semester so give yourself some grace. You were organized and diligent during your medication pass. Speed will come with practice and familiarity of the process. RH**

Week 4: One competency I feel I performed well was assessing the needs of the elderly at the ECSC and adapting our game to fit their needs. One competency I feel I did well in for infection control was knowing what needed to be in the cart for the specific disease. **Excellent! I appreciate that you shared a strength for both clinical experiences! Keep up the great work! DW**

One thing I feel I could work on is speaking up and being a leader. I do not like to stand up in front of people with a microphone and talk because it makes me nervous therefore, I need to work on that side of my communication skills. With that being said for infection control I had a hard time speaking up when I noticed people not foaming in or out. **Colleen, I appreciate your recognition of this opportunity for improvement, as I can totally relate with having a hard time being vocal as the center of attention within a group. With that said, I don't see a goal to improve in this area. What will you do, how often will you do it, and when will you do it by to show actual growth in this area. Just saying you need to do better next time does nothing to help with growth. Sometimes you have to think outside of the box a bit. For example, maybe over the next 2 weeks, you could make an announcement in class to the entire group or even introduce yourself to 2 new people in the clinical setting to force yourself out of your comfort zone. Does this make sense?**

Unfortunately, not including a goal will result in a U for competency 7b this week. Please review the directions on p. 1 of this document. You must comment below on how you will improve your U for week 5. Failure to do so will result in a continued U until completed. Let me know if you have any questions. DW

Week 5: One competency I feel I performed strongly in this week was my med pass. I was able to pass meds on the second day of clinical therefore I wrote all my meds down on Wednesday and came prepared to report on them Thursday morning. I was able to give a subcutaneous injection of heparin as well as obtain a FSBS and give insulin; I also gave PO meds. I feel I am getting faster and more efficient with my med pass. One of my weaknesses this week was forgetting to aspirate before flushing the IV. To correct this mistake, I will go over the steps of giving an IV flush 3 times before my next clinical. **That is a great plan! HS**

Last week I received a U for my weakness. To correct this, I will make sure every week that my weakness has a time frame and goal to achieve to fix it. I will also go over the clinical tool rules to make sure everything is correct before turning it in. **HS**

Week 7: one competency I feel I performed strongly in was being able to correlate the disease processes with the diseases processes I learned about in clinical. It was cool to see how the disease looks in the colon compared to just reading about it. **I love that you could combine your knowledge with tangible clinical examples. DW** One competency I feel I could work on is being more engaged in asking questions and speaking up. I will fix this by asking 3 questions during lecture and be more engaged in lecture before my next clinical so I can feel confident in asking questions. **Great goal! Way to think outside of the box. DW**

Midterm- Colleen, great job in the first half of this semester in the medical surgical nursing course! You have shown growth in both your skills and your critical thinking abilities this semester in the clinical setting. You have successfully completed one care map satisfactorily. You are satisfactory in all competencies at this point in the semester, great job! Continue to seek out additional experiences in the clinical setting to expand your knowledge base, especially competencies related to IV site monitoring and discontinuing of the IV site, and administering IV medications. Keep up the hard work through the last half of the semester! HS

Week 9: One competency I feel I performed strongly in was priming and hanging the IV antibiotics. I think having the open lab to get more experience with the IV pump and priming the lines helped me a lot and prepared me for clinical. **I was impressed with your level of independence considering you have not had the opportunity to perform these skills in the clinical setting. I appreciate the personal accountability in seeking out opportunity to practice prior to starting clinical in the second half of the semester. I also appreciate you letting me know areas you wanted to address in the clinical setting prior to arrival so that it could be arranged. You did a great job with several nursing skills this week, demonstrating competence and confidence in each skill performed. A week to be proud of! NS**

One competency I feel I could work on is providing wound care. I received orders from the doctor to perform wound care on my patient's foot and I did not feel as confident in myself as I should when I was changing the dressing. To correct this, I will go over the wound care checklist 3 times before my next clinical. **Good plan for improvement! As you will learn, every wound is unique and has different sets of orders for dressing changes to be completed. You were put in a difficult spot when the healthcare provider was giving you dressing orders verbally. However, you did the right thing by coming to get your faculty member to ensure accuracy of the orders. In performing the dressing change, you asked appropriate questions, followed the orders effectively, and utilized aseptic technique. You will get more comfortable with wound care with each experience you get. Great plan for improvement, keep up the hard work! NS**

Week 10: One competency I feel I performed strongly in is doing thorough neurological assessment. In report the nurse told me that the patient was alert and oriented and when I went in he was confused and disoriented. I also noticed that the patient had some weakness on his left side. **Great job! That is why it is always important to get a thorough assessment at the beginning of the shift. HS** One competency I feel I could work on is asking more questions during report. Sometime the nurses will leave out some information and I don't speak up. To correct this I will ask 3 questions that I have to the nurse giving report on my next clinical. **HS**

Week 11: One competency I feel I performed strongly in this week was removing an IV catheter. This was my first time taking out an IV and it was a very fun experience. One competency I feel I could work on is prioritizing my day when I have multiple patients. It was a little difficult to prioritize the patient during the team lead experience because you do not have time to sit down and look into their chart as deeply as you can when you have one patient. To fix this I will go over prioritization skills 3 times before my next clinical to ensure I am confident in prioritizing for the next time that I have multiple patients. **Excellent job with the IV removal and documentation! The more experience you get, the easier prioritization becomes. One thing to remember is to be aware that at any time issues can occur that will be cause for changing your current priorities. Prepare to be ready to adapt and change at any moment! Great plan! SA**

Week 12: one competency I feel I performed strongly in was keeping my patient safe and implementing fall precautions. When I entered his room, I noticed that he was high fall risk but did not have the proper singe up in his room. I placed a yellow fall risk bracelet on him and put up the fall risk signs and made sure he had on yellow socks when ambulating. **Great job! MD** One competency I feel I could work on is knowing what needle sizes I need for the subcutaneous and intramuscular shots and feeling more confident in myself when I give him. To fix this I will practice doing injections in the lab and I will review the needle sizes before my next clinical. **Great goal! MD**

Final Comments-Colleen, congratulations you have successfully finished the clinical, lab, simulation portion of the MSN course! You have done a great job throughout clinical this semester! You have demonstrated growth in your clinical judgment and assessment skills by incorporating the knowledge that you gained from the classroom into the clinical setting. You are able to correlate the disease process with the symptoms that the patient is experiencing as well as the anticipated treatment plan. You are able to identify the priority problem in order to focus your assessment and identify any potential problems that the patient may experience. I enjoyed working with you throughout the semester, both in the classroom and clinical setting. Keep up the hard work as you enter the psychiatric course this summer, and become another step closer to becoming a nurse. Keep up the hard work! HS

Student Name: Colleen Camp				Course 6			
Date or Clinical Week: MSN Week 3				Objective:			
Criteria		3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	(lists at least 7*) *provides explanation if < 7	(lists 5-6)	(lists 5-7 but no specific patient data included)	(lists < 5 or gives no explanation)	3	All criteria met. RH
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	(lists at least 3*) *provides explanation if < 3		(lists 3 but no specific patient data included)	(lists < 3 or gives no explanation)	3	
	3. Identify all risk factors relevant to the patient.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)	3	
Interpreting	4. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	4. Great list of nursing priorities! 8. Good complications list. Included key symptoms for each complication. RH
	5. State the goal for the top nursing priority.	Complete			Not complete	3	
	6. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	7. Identify all potential complications for the top nursing priority problem.	(lists at least 3)	(lists 2)		(lists < 2)	3	
	8. Identify signs and symptoms to monitor for each complication.	(lists at least 3)	(lists 2)		(lists < 2)	3	
Responding	9. List all nursing interventions relevant to the top nursing priority.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	Good job correlating your interventions with your nursing priority and potential complications. RH
	10. Interventions are prioritized	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	11. All interventions include a frequency	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	12. All interventions are individualized and realistic	> 75% complete	50-75% complete	< 50% complete	0% complete	3	

Criteria		3	2	1	0	Points Earned	Comments
	13. An appropriate rationale is included for each intervention	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
Reflecting	14. List all of the highlighted reassessment findings for the top nursing priority.	>75% complete	50-75% complete	<50% complete	0% complete	3	
	15. Evaluation includes one of the following statements: - Continue plan of care - Modify plan of care - Terminate plan of care	Complete			Not complete	3	

Reference

An in-text citation and reference are required.

The care map will be graded “needs improvement” if missing either the in-text citation or reference, but not both.

The care map will be graded “unsatisfactory” if both in-text citation and reference are not included.

Total Possible Points= 45 points

45-35 points = Satisfactory

34-23 points = Needs Improvement*

< 23 points = Unsatisfactory*

***Total points adding up to less than or equal to 34 points require revision and resubmission until Satisfactory. Refer to the course specific requirements for resubmission deadlines.**

*****Students that are not satisfactory after 2 attempts will be required to meet with course faculty for remediation. *****

Faculty/Teaching Assistant Comments: Great job with your care map. You provided a very detailed list of nursing priorities and listed some specific potential complications for the top nursing priority you identified. You were able to tailor your interventions to the potential complications and to the care you provided while on clinical. RH

Total Points: 45/45

Faculty/Teaching Assistant Initials: RH

Student Name: Colleen Camp				Course Objective: 6			
Date or Clinical Week: 3/24/2025							
Criteria		3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	(lists at least 7*) *provides explanation if < 7	(lists 5-6)	(lists 5-7 but no specific patient data included)	(lists < 5 or gives no explanation)	3	You provided 9 abnormal assessment findings, fall and seizure precautions could also be included. You provided 6 abnormal lab/diagnostic findings. You provided 6 risk factors specific to your patient. HS
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	(lists at least 3*) *provides explanation if < 3		(lists 3 but no specific patient data included)	(lists < 3 or gives no explanation)	3	
	3. Identify all risk factors relevant to the patient.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)	3	
Interpreting	4. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	You provided a significant list of nursing priorities specific to your patient. You set a goal for the patient however, on future care maps make the goal more detailed for example, patient will have stabilized neurologic status by discharge or no additional neurologic decline. Nice job highlighting all of the related data from the noticing boxes supporting the priority problem. You included potential complications and the signs and symptoms to monitor for. Other potential complications to consider would include respiratory failure, pneumonia, PE, DVT, and pressure ulcers. HS
	5. State the goal for the top nursing priority.	Complete			Not complete	3	
	6. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	7. Identify all potential complications for the top nursing priority problem.	(lists at least 3)	(lists 2)		(lists < 2)	3	
	8. Identify signs and symptoms to monitor for each complication.	(lists at least 3)	(lists 2)		(lists < 2)	3	
Responding	9. List all nursing interventions relevant to the top nursing priority.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	You provided a significant list of 15 nursing intervention specific to the patient with a frequency for all except one and you included a rationale for each intervention. HS
	10. Interventions are prioritized	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	11. All interventions include a frequency	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	12. All interventions are individualized and realistic	> 75% complete	50-75% complete	< 50% complete	0% complete	3	

Criteria	3	2	1	0	Points Earned	Comments
----------	---	---	---	---	---------------	----------

	13. An appropriate rationale is included for each intervention	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
Reflecting	14. List all of the highlighted reassessment findings for the top nursing priority.	>75% complete	50-75% complete	<50% complete	0% complete	3	You reassessed all of the abnormal assessment findings except for the blood pressure, and added some additional findings such as fall and seizure precautions those should have been included in the noticing assessment findings. HS
	15. Evaluation includes one of the following statements: - Continue plan of care - Modify plan of care - Terminate plan of care	Complete			Not complete	3	

Reference

An in-text citation and reference are required.

The care map will be graded “needs improvement” if missing either the in-text citation or reference, but not both.

The care map will be graded “unsatisfactory” if both in-text citation and reference are not included.

Faculty/Teaching Assistant Comments:

Colleen,

Great job on your care map! You painted a clear picture of the patient and the plan of care outlined specific to him. You did a nice job re-evaluating the abnormal assessment findings to determine that the plan of care should be continued. HS

Total Points:45/45

Comments:

Week 1

(Insulin)- You were able to correctly prepare an insulin pen and administer subcutaneous insulin. Insulin requirements were accurately identified and calculated through the corrective scale and carbohydrate coverage orders. MD

(Assessment)- You were able to satisfactorily demonstrate the Basic Head to Toe Assessment during lab. KA/RH

(IV Math)-You satisfactorily participated in the IV Math learning session on 1/7/25 as well as the assigned IV Math practice questions and the IV Math Application lab on 1/9/2025. KA/DW/HS/SA

(Lab Day)- You satisfactorily completed the mandatory lab review of nursing foundational skills. This was achieved through simulating care for a patient in a scenario requiring competency in assessment, communication, medication administration (including PO and IM injection), nasogastric tube insertion and removal, patient mobility and hygiene, use of PPE for Contact Isolation, wound care, foley insertion and removal, development of nursing notes, and providing SBAR hand-off report. NS/MD/RH

(IV Skills)- You have satisfactorily completed IV lab including a saline flush, IV push medication administration with reconstitution, priming and hanging a primary and secondary IV solution, adjusting a flow rate to run by gravity, discontinuing IV therapy, and monitoring the IV site for infiltration and signs of complications. HS

Week 2

(Trach Care & Suctioning) - During this lab, you satisfactorily demonstrate competence with tracheostomy care and tracheostomy suctioning. DW/RH/NS/SA

(EBP Lab)- You actively participated in the online searching process for evidence-based practice literature, as well as reviewing example articles to determine appropriate selection and information needed when summarizing a research article. KA/LK

Week 9

(Lab Day- Skills Review)- You satisfactorily participated in lab by practicing NG tubes and IVPB priming/programming. KA

Comments:

Simulation #1-Please review the comments placed on the Simulation scoring sheet below. In addition, review the individual faculty feedback placed within the Simulation #1 Prebrief and Reflection Journal dropboxes. HS

Simulation #2-You received a U for not completing the Simulation #2 survey.

Please review the comments placed on the Simulation scoring sheet below. In addition, review the individual faculty feedback placed within the Simulation #2 Prebrief and Reflection Journal dropboxes. HS

4/14/2025- Completed Simulation #2 evaluation now Satisfactory. HS

Lasater Clinical Judgment Rubric Scoring Sheet

Student Roles: A=Assessment Nurse; M=Medication Nurse

STUDENT NAME(S) AND ROLE(S): Collen Camp (A) Nevaeh Walton (M)

GROUP #: 2

SCENARIO: MSN Scenario #1 – Musculoskeletal/Respiratory

OBSERVATION DATE/TIME(S): 2/26/2025 1015-1215

CLINICAL JUDGMENT COMPONENTS					<u>OBSERVATION NOTES</u>
NOTICING: (2) *					<u>Focused Observation</u>
• Focused Observation:	E	A	D	B	Focused obtaining VS (Bp, HR, RR, Spo2)
• Recognizing Deviations from Expected Patterns:	E	A	D	B	Focused assessment of left leg
• Information Seeking:	E	A	D	B	Focused assessment of right leg color, pulse, temp
					Used proper patient pronouns
					Assessed respiratory status but did not listen to lung sounds
					<u>Recognizing</u>
					Recognized elevated BP and HR
					Assesses dressing to be dry and intact
					Recognizes improved color of left foot
					Recognizes redness to right lower leg and pain
					Recognizes right pedal pulse weak
					Recognizes patient short of breath and complaints of chest pain
					<u>Information Seeking</u>
					Sought information related to history of elevated BP
					Assesses patients' allergies
					Sought additional information related to pain in right leg
					Assessing pedal pulse to right foot
					Sought information related to chest pain 8/10
					Obtaining SpO2 after complaints of chest pain
					Reassessed breathing after applying oxygen
					Regarding chest pain prior to medicating
INTERPRETING: (1) *					<u>Prioritizing Data</u>

• Prioritizing Data: E A D B • Making Sense of Data: E A D B	Prioritizes focused assessment Prioritizes pain medication Prioritizes calling provider after identifying potential DVT/PE Prioritizes calling provider test results <u>Making Sense</u> Educating patient on importance of getting out of bed now that she has a PE Patient not getting out of bed and not wearing SCD's may have lead to blood clot (DVT, leading to PE) Correctly interpreted ABG's as Respiratory Alkalosis partially compensated Explaining to patient significance of enoxaparin and side effects and subcutaneous route of medication
RESPONDING: (2,3,4,5,6) * • Calm, Confident Manner: E A D B • Clear Communication: E A D B • Well-Planned Intervention/ Flexibility: E A D B • Being Skillful: E A D B	<u>Communication</u> Educated patient on taking deep breaths Team work with med nurse while leaving the room to call provider SBAR with provider regarding right leg pain and shortness of breath and chest pain Excellent job with reading back orders and clarified order details with provider regarding enoxaparin route Nice communication with patient regarding new orders for labs and CT scan explained the possibility of a blood clot SBAR missing background when calling provider back with provider regarding ABG's respiratory alkalosis and other lab values Good communication with the patient regarding the CT results and the new orders <u>Intervention</u> Need to apply oxygen after chest pain and spo2 level Called lab to notify of stat orders Called CT to notify of stat CT order Reassessed Spo2 level Incorrect dosage of morphine administered. 3ml total which would be 6mg dose. The medication was supplied at 2mg/ml Left the morphine sitting at bedside while leaving the room Needle size incorrect for IM morphine administration

	Initiated fall precautions Re-assessed SPo2 and lung sounds Re-assessed Spo2 and patient's chest pain Administered SQ enoxaparin correct dose given (confused stated to waste .5ml to be wasted. Total dose to be administered would be 1ml per the dosage calc it would be 0.95ml (which you cannot measure that amount on the syringe)
REFLECTING: (7) * - Evaluation/Self-Analysis: E A D B - Commitment to Improvement: E A D B	A nice discussion occurred regarding the scenario. The group was able to independently evaluate and analyze personal clinical performance. They were able to demonstrate commitment to ongoing improvement, and discuss strengths and weaknesses. Students were able to summarize the scenario and the fact that the patient had a postoperative complication resulting in a DVT then a PE. They were able to state how they organized their interventions and the plan of care. The students were able to review the correct size needle to be used for an IM injection. They were able to discuss the things that went well during the scenario as well as areas to improve upon into the future.
SUMMARY COMMENTS: * = Course Objectives Satisfactory completion of the simulation scenario is a score of "Developing" or higher in all areas of the rubric. E= Exemplary A= Accomplished D= Developing B= Beginning Scenario Objectives: - Select focused physical assessment priorities based on individual patient needs. (2)* - Implement appropriate nursing interventions based on patient's assessment. (1,3,6)* - Communicate appropriately with the patient, family, team members, and healthcare providers incorporating elements of clinical judgment and conflict resolution. (4,7)* - Provide patient-centered care with consideration to cultural, ethnic, and social diversity. (2,3,6)* - Provide appropriate patient education based on diagnosis. (5)* * Course Objectives	Lasater Clinical Judgement Rubric Comments: Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs. Recognizes most obvious patterns and deviations in data and uses these to continually assess. Actively seeks subjective information about the patient's situation from the patient and family to support planning interventions; occasionally does not pursue important leads. Interpreting: Generally focuses on the most important data and seeks further relevant information but also may try to attend to less pertinent data. Even when facing complex, conflicting, or confusing data, is able to (a) note and make sense of patterns in the patient's data, (b) compare these with known patterns (from the nursing knowledge base, research, personal experience, and intuition), and (c) develop plans for interventions that can be justified in terms of their likelihood of success. Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations. Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport. Interventions are tailored for the individual patient; monitors patient progress closely and is able to adjust treatment as indicated by patient response. Is hesitant or ineffective in using nursing skills. Reflecting: Independently evaluates and analyzes personal clinical performance, noting decision points, elaborating alternatives, and accurately evaluating choices against alternatives. Demonstrates commitment to ongoing improvement; reflects on and critically evaluates nursing experiences; accurately identifies strengths and weaknesses and develops specific plans to eliminate weaknesses.

Lasater Clinical Judgment Rubric Scoring Sheet

Student Roles: A=Assessment Nurse; M=Medication Nurse

STUDENT NAME(S) AND ROLE(S): Nevaeh Walton (A) Collen Camp(M)

GROUP #: 2

SCENARIO: MSN Scenario #2 GI/DM

OBSERVATION DATE/TIME(S): 4/10/2025 1015-1215

CLINICAL JUDGMENT COMPONENTS	<u>OBSERVATION NOTES</u>				
NOTICING: (2) * • Focused Observation: E A D B • Recognizing Deviations from Expected Patterns: E A D B • Information Seeking: E A D B	Focused Observation Focused on pain assessment Focused on obtained vital signs Focused GI assessment Did not confirm NG tube placement Focused on obtaining FSBS Recognizing Recognized symptoms of hypoglycemia Identified issues with SDOH factors Notices pain Notices coffee ground output Information Seeking Sought information on pain Sought information on hypoglycemia symptoms Sought additional information related to SDOH Sought information on allergies				
INTERPRETING: (1) * • Prioritizing Data: E A D B • Making Sense of Data: E A D B	Prioritizing Data Prioritized pain assessment Prioritized vital signs Prioritized focused GI assessment Prioritized calling healthcare provider with symptoms of hypoglycemia and patient NPO Prioritized Morphine for pain over IV fluids Making Sense of Data Made sense of symptoms of hypoglycemia Makes sense of FSBS 70 Makes sense of SDOH factors regarding discharge plans Made sense of ASA and GI bleed Made sense of ulcers and bleeding risk Made sense of need for resources upon discharge for medications and discharge plan Makes sense of need for endoscopy				

RESPONDING: (2,3,4,5,6) * • Calm, Confident Manner: E A D B • Clear Communication: E A D B • Well-Planned Intervention/ Flexibility: E A D B • Being Skillful: E A D B	Calm confident manner Remained calm despite healthcare provider being rude Clear communication Provided SBAR Read orders back Verified allergies Called provider back regarding route of IV dextrose Intervention Obtained FSBS (70) related to symptoms of hypoglycemia Maintains NPO Did not reassess vitals or pain after medications Provided education on ASA use Being Skillful Accurate procedure with FSBS Administered 1ml IV Morphine for pain given very quickly- give over 2 minutes and flush slowly
REFLECTING: (7) * • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D B	Great job reflecting on the simulation. You were able to provide insight on both the things that went well and those areas that could be improved upon. You did a nice job identifying the need for a focused assessment on the patient related to the symptoms the patient was experiencing. You were able to implement your interventions and then perform reassessments to determine if the intervention was effective. Nice job addressing concerns related to the patient's history.
SUMMARY COMMENTS: * = Course Objectives Satisfactory completion of the simulation scenario is a score of “Developing” or higher in all areas of the rubric. E= Exemplary A= Accomplished D= Developing B= Beginning Scenario Objectives: 6. Select focused physical assessment priorities based on individual patient needs. (2)* 7. Implement appropriate nursing interventions based on patient’s assessment. (1,3,6)* 8. Communicate appropriately with the patient, family, team members, and healthcare providers incorporating elements of clinical judgment and conflict resolution. (4,7)* 9. Provide patient-centered care with consideration to cultural, ethnic, and social diversity. (2,3,6)* 10. Provide appropriate patient education based on diagnosis. (5)* * Course Objectives	Lasater Clinical Judgement Rubric Comments: Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs. Recognizes most obvious patterns and deviations in data and uses these to continually assess. Actively seeks subjective information about the patient’s situation from the patient and family to support planning interventions; occasionally does not pursue important leads. Interpreting: Makes an effort to prioritize data and focus on the most important, but also attends to less relevant or useful data. Even when facing complex, conflicting, or confusing data, is able to (a) note and make sense of patterns in the patient’s data, (b) compare these with known patterns (from the nursing knowledge base, research, personal experience, and intuition), and (c) develop plans for interventions that can be justified in terms of their likelihood of success. Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations. Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport. Develops interventions on the basis of relevant patient data; monitors progress regularly but does not expect to have to change treatments. Displays proficiency in the use of most nursing skills; could improve speed or accuracy. Reflecting: Independently evaluates and analyzes personal clinical performance, noting decision points, elaborating alternatives, and accurately evaluating choices against alternatives. Demonstrates commitment to ongoing improvement; reflects on and critically evaluates nursing experiences; accurately identifies strengths and weaknesses and develops specific plans to eliminate weaknesses.

EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2025

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:

Student eSignature and Date:

Colleen Camp 4/27/2025
