Excellent work in the lab this week! You satisfactorily completed the vital sign check off during 1:1 observation, including oral temperature, radial pulse, respiratory rate, pulse oximetry, and blood pressure measurement. During the blood pressure measurement, you accurately obtained two blood pressure readings on the Vital Sim manikin. The first blood pressure measurement was set at 126/74 and you identified it as 128/80. The second measurement was set at 108/68 and you interpreted it as 108/66. Great job! You were able to verbally discuss the following measurements: axillary and rectal temperature along with orthostatic vital sign assessments. You did not require any prompts during completion of your 1:1 observation and provided accurate detail in your communication with the "patient".
