School of Nursing

Student Developed Simulation Scenarios

Directions: Students will be required to develop a scenario on a chosen topic related to the Maternal Child Nursing content taught throughout the semester. Faculty will be implementing the student developed scenarios on the day of the scheduled simulation. Students will be expected to perform a scenario in the simulation center that was developed by one of their classmates on the day of the simulation. Students will sign up to be in a group of 3-4 to develop a simulation scenario on the assigned topics. Please only include skills in the scenario that students have been taught in the curriculum already.

The scenario should be roughly 15 minutes in length. Students should use the attached storyboard and patient chart to develop their scenario. The group will need to submit the completed storyboard by **October 27, 2025 by start of class** via the Student Developed Scenarios dropdown. You are required to wear your student uniform the day of the simulation. A group meeting to discuss how to write the scenario will be with your assigned faculty at the beginning of the semester on **September 8, 2025**. The first page of the Student Developed Scenario document will be due at the beginning of class in the Student Developed Scenarios Dropbox on **October 6, 2025**. The faculty will review the first page of the document and then contact you for a mid-semester checkpoint to discuss the progress of the scenario and answer any questions the group may have for the simulation. You should not proceed with completing the remainder of the document until contacted by your assigned faculty and given approval to continue onto the next step. Each group will be required to attend a facilitator meeting on **November 10, 2025** with either Kelly or Monica. This meeting will be to discuss the expectations and execution of your scenarios for the day of simulation. See the schedule for the time assigned to your group for both required meetings.

Students will vote on the best Student Developed Scenario and the chosen team will receive a prize.

During the debriefing process students will be expected to provide constructive feedback to their fellow students. Please be kind and considerate. Remember this is constructive feedback and not criticism. All students are expected to actively participate in the group debriefing.

The activity requirements and grading rubric are below. To be satisfactory for this experience you will need to score at least 77%. For any student not attending the day of simulation, credit will not be granted for the simulation time and will follow the Student Accountability Flow Sheet. This experience is worth 4 hours of simulation. Remember any missed simulation time needs to be made up hour for hour.

	Student Developed Simulation Scenario Rubric	Points	Total
1	In your group, develop a simulation scenario related to the assigned topic.	7	
2	Develop 2 questions to ask in debriefing related to your developed scenario. Questions should be specific and not simply what did you do well and how could you improve.	7	
3	Develop 2 questions NCLEX style questions with rationale related to the content in your developed scenario.	7	
4	Be creative and highlight the essential information to know about the assigned topic on the storyboard.	8	
5	Incorporate the core values of caring, diversity, excellence, integrity, and "ACE"- attitude, commitment, and enthusiasm throughout the group process.	8	
6	Complete initial meeting with assigned faculty on September 8, 2025 .	10	
7	Page 1 of the document to Dropbox by 0800 on October 6, 2025 and have mid-semester checkpoint with	10	

	faculty.		
8	Completed Storyboard submitted to the Student Develop Simulation Scenarios Dropbox on Edvance360 by October 27, 2025 at start of class.	10	
9	Complete facilitator meeting on November 10, 2025.	10	
10	Actively participates throughout the entire process (Development/day of simulation) including being present on the day of the Student Developed Scenarios November 18, 2025.	23	
	Total	100	

Schedule for Meetings on September 8, 2025

Time	Group	Faculty
1215-1245	Gestational Diabetes	Monica
	Pneumonia	Rachel
	Traumatic Brain Injury	Brian
	Newborn Hyperbilirubinemia	Kelly
1245-1315	Preeclampsia	Monica
	Sickle Cell Anemia	Brian
	Newborn Hypoglycemia	Kelly
	Communicable Disease	Rachel
1315-1345	Uncomplicated Delivery	Monica
	Glomerulonephritis	Brian

Schedule for Meetings on November 10, 2025

Time	Group	Faculty
1245-1300	Gestational Diabetes	Monica
	Pneumonia	Kelly
1300-1315	Preeclampsia	Monica
	Traumatic Brain Injury	Kelly
1315-1330	Uncomplicated Delivery	Monica
	Sickle Cell Anemia	Kelly
1330-1345	Newborn Hyperbilirubinemia	Monica
	Glomerulonephritis	Kelly
1345-1400	Newborn Hypoglycemia	Monica
	Communicable Disease	Kelly

Student Developed Scenario Schedule
November 18, 2025 0900-1500

Time	Group
0900-0910	Orientation to day
0910-0925	Gestational Diabetes
0925-0940	Pneumonia
0940-1000	Debriefing/Feedback
1000-1015	Preeclampsia
1015-1030	Traumatic Brain Injury
1030-1050	Debrief/Feedback
1050-1130	BREAK
1130-1145	Uncomplicated Delivery
1145-1200	Sickle Cell Anemia
1200-1215	Debrief/Feedback
1215-1230	Newborn Hyperbilirubinemia
1230-1245	Glomerulonephritis
1245-1300	Debrief/Feedback
1300-1320	BREAK
1320-1335	Newborn Hypoglycemia
1335-1350	Communicable Disease
1350-1405	Debrief/Feedback
1405-1500	NCLEX Questions, Scavenger Hunt, Comprehensive Sim Orientation, SDS Winners

Student Developed Simulation Scenario Storyboard

<p>Identified Problem/Scenario Topic and Related Resources:</p> <p>Scenario Topic: Maternal Hyperglycemia</p> <p>Resources:</p>	<p>Scenario Key Points:</p> <ul style="list-style-type: none"> • Recognize signs of hyperglycemia • Recognize signs of hypoglycemia • Administer correct dose of insulin • Provide the proper education
<p>Case Summary:</p> <p>Snacky Chan admitted to the Firelands OB Unit. She is 28 weeks pregnant G1 P0. She was diagnosed with gestational diabetes at 24 weeks. She has had a weight gain of 40lbs. She has a BMI of 30. She is having complaints of increased thirst, increased urination, and increased hunger. She states she has eaten 3 donuts today as well as a large plate spaghetti for lunch.</p> <p>Students will be expected to introduce self, preform hand hygiene, identify patient, and preform initial set of vital signs and blood glucose level. They will attach the external fetal monitor and assess the baby’s wellbeing. (the baby is fine) They will then administer the insulin per protocol to manage hyperglycemia.</p> <p>Next the students will re check the blood sugar levels after 15 minutes. The blood sugar drops: the students recognize the signs of hypoglycemia. They then provide the 4 oz of orange juice and re-check the blood sugar after 15 minutes.</p> <p>Once the blood sugar the blood sugar is stable they will educate on diet control and exercises as well as attending follow up appointments.</p>	<p>Expected Interventions of Students: (Minimum of 5 required.)</p> <ul style="list-style-type: none"> • Assess vital signs • Place external fetal monitor on mom • Initial glucose check • Administer insulin • Re-check blood sugar • Give 4 oz of orange juice • Re-check blood sugar • Educate on diet and exercise • Educate on going to follow up appointments
<p>Supplies:</p> <ul style="list-style-type: none"> • Glucometer • Orange juice • Vital sign equipment • Education papers- my plate • Insulin Lispro Pen injector • Sliding scale chart 	
<p>Medications: (Include drug name, dosage, route, and concentration for scenario)</p> <ul style="list-style-type: none"> • Insulin Lispro sub-q pen injector, units per sliding scale. • Orange Juice to bring up blood sugar, PO, 4oz 	<p>Support Person: (Only complete if you want a support person)</p> <p>Who is the person to the patient?</p> <p>Questions/Responses for Support Person:</p>

NCLEX Questions

1. Which of the following symptoms is associated with hyperglycemia in a client with gestational diabetes.
 - a. Polydipsia
 - b. Decreased thirst
 - c. Blood pressure 200/120
 - d. Blood sugar of 60

Answer: A

Rationale: page 126 (Signs and Symptoms) of the safe maternity and pediatric nursing care textbook. Polydipsia is one of the 3 p's for hyperglycemia.

2. The nurse recognizes the need for further education in a client with gestational diabetes when she makes which of the following statements.
 - a. I will engage in 30 minutes of exercise daily.
 - b. I will keep a daily log of blood sugar levels and my diet.
 - c. I will monitor my baby's well-being by monitoring their kick counts.
 - d. I can skip meals after I take my insulin.

Answer: D

Rationale: page 128 (patient teaching) of the safe maternity and pediatric nursing care textbook. This is not an appropriate action for a patient with diabetes.

Debriefing Questions:

1. Do you feel the teaching was effective?
2. What signs made you suspect that the gestational diabetes was uncontrolled?

Case Flow (15-20 Minute Simulation Time)

Initiation of Scenario:												
Patient statements:												
Vital Signs	T		HR		RR		BP		SpO2		Pain	BS
Cardiac												
Respiratory												
Neuro												
Skin												
GI												
GU												
Other												
Patient changes during scenario:												
Patient statements:												
Vital Signs	T		HR		RR		BP		SpO2		Pain	BS
Cardiac												
Respiratory												
Neuro												
Skin												
GI												
GU												
Other												
New Patient Orders												
End of Scenario:												
Patient statements:												
Vital Signs	T		HR		RR		BP		SpO2		Pain	BS
Cardiac												
Respiratory												
Neuro												
Skin												
GI												
GU												
Other												

All areas should be addressed with pertinent information. Do not leave any blanks. All underlined areas on supporting documents should be addressed. You can place NAs in any area that does not apply to your scenario.
