

**EVALUATION OF CLINICAL PERFORMANCE TOOL  
Maternal Child Nursing – 2025**

**Firelands Regional Medical Center School of Nursing  
Sandusky, Ohio**

**Student:**

**Final Grade:** Satisfactory/Unsatisfactory

**Semester:** Fall

**Date of Completion:**

**Faculty:** Kelly Ammanniti, MSN, RN, CHSE; Monica Dunbar DNP, RN;  
Rachel Haynes MSN, RN, Brian Seitz, MSN, RN, CNE

**Faculty eSignature:**

**DIRECTIONS FOR USE:**

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S), Needs Improvement (NI), Unsatisfactory (U), and Not Available (NA)**. The faculty member will initial if in agreement with the student’s evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written in the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a “S, NI, U, or NA”. If the student does not self-rate, then it is an automatic “U”. A student who submits the clinical evaluation tool late will be rated as “U” in the appropriate competency(s) for that clinical week. Whenever a student receives a “U” in a competency, it must be addressed with a comment as to why it is no longer a “U” the following week. If the student does not state why the “U” is corrected, it will be another “U” until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. **An unsatisfactory or needs improvement as a final evaluation in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. Patterns of performance over the course of the semester will be utilized to determine the final competency evaluations. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.**

**METHODS OF EVALUATION:**

- Care Maps
- Patient/Family Education
- Preparedness for Clinical/Clinical Performance
- Online Clinical Discussion Groups
- Administration of Medications
- Nursing Skills Completion of Clinical Performance Tool
- Written Reports of Clinical Experiences
- Documentation
- Conferences with the Faculty
- Lasater Clinical Judgment Rubric
- vSim
- Simulation Scenarios

**Absence: (Refer to Attendance Policy)**

7/11/25 KA

## PERFORMANCE CODE

### SATISFACTORY CLINICAL PERFORMANCE

**Satisfactory (S):** Safe; accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback related to written clinical work.

### UNSATISFACTORY CLINICAL PERFORMANCE

**Needs Improvement (NI):** Safe; accurate each time; skillful in parts of behavior; focuses more on the skill and self rather than the patient; inefficient, uncoordinated, anxious, worried, flustered at times; expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues; faculty feedback required in several areas of clinical written work.

**Unsatisfactory (U):** Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U", the faculty member (s) will continue to rate the competency unsatisfactory.

### OTHER

**Not Available (NA):** The clinical experience which would meet the competency was not available

Grey shaded weekly competency boxes do not need a student evaluation rating or faculty/teaching assistant initials.

\*\*Evaluate these competencies for the offsite clinicals: ER: All, H&V: 1A, B, E BG Club: 1B, E Flu: All

**Comments:**

1 (e) week 4: A stage of growth and development from Eriksons is integrity vs. despair. The reason I chose this specific stage within Eriksons is because many of the patients that I cared for in the emergency room fit this growth and development stage. Almost all of the patients that I cared for were within later adulthood, 65 years of age and older. This is the last stage within Eriksons, it explains that these individuals can often feel satisfaction with their life or despair and meaninglessness. The older individuals that I cared for expressed feelings of regret and lack of meaning within their life now. Demonstrating the emotions of sadness and frustration based on their current situation and overall view on their life. **Excellent! MD**

**\*End-of-Program Student Learning Outcomes**

**1 (e) Week 5:** A stage of growth and development from Eriksons is industry vs. inferiority. The reason I chose this specific stage of development within Eriksons is because the children that attend the boys and girls club are school aged between 6 to 11 years old. This age group starts to experience failure, low self-esteem, and withdrawal. That falls under the inferiority side of this development stage. The other side involves their beliefs to be able to achieve goals, motivation, and confidence. This is the industry side of this stage and development. An example of Industry that I saw during the boys and girls club clinical experience was when a child successfully completed the activity and was proud of herself for completing it successfully. An example of inferiority that I witnessed during this clinical experience was when a child struggled to understand the activity and another kid took the activity from him and made a comment. He experienced the feeling of failure when it was ripped away without success in completing. These examples show how kids within the same age group can experience both industry and inferiority throughout this time. **How did you encourage the child who did not complete the activity? How did you feel about this? MD**

**1 (e) Week 6:** A stage of growth and development from Erikson that relates to my clinical experience is generativity vs. stagnation. The age group that is covered within this stage is 40 to 65 years of age. I chose this stage because the patient on the floor during my clinical was within this age and stage of development. Generativity is the concept of being productive, working, raising children, and being involved. Stagnation is the concept of feeling unfulfilled, isolated, unproductive, disconnected, and lacking personal growth. Examples of generativity that I witnessed during clinical was with my patient who is actively parenting and raising her 20-year-old daughter and now her newborn daughter. The parenting styles will differ with each child due to the age gap. With the older child they are now focusing on college and entering adulthood lifestyles. With the newborn baby they are starting back with parenting on safety, feeding, nurturing, and developmental skills. An example of stagnation that I witnessed during clinical was with the same patient who was also experiencing feelings of isolation and disconnection due to having a new baby unexpectedly at an older age.

**Excellent! MD**

**1 (e) Week 8:** A stage of growth and development from Eriksons is generativity vs. stagnation. During the flu clinical most individuals that came in to get a COVID or flu vaccine were within the age range of 40-65 years old. This stage focuses on contributing to society. Eriksons theory is supported by these individuals demonstrating proactive steps to maintain their help. Receiving vaccinations is a personal choice and preventative measure to promote optimal health not only for themselves but also for the community and others around them. An example of generativity during this clinical were the individuals getting vaccinated for self-protection and protection of other family members and the community. An example of stagnation would be the individuals that chose not to participate in vaccinations possibly being uninvolved in that realm health promotion. The turnout for the flu clinic did suggest that majority support and promote vaccinations. The hospital environment would have an impact on this since majority receiving the vaccination were healthcare workers along with having specific requirements. **Were most of the people who attended the flu clinic employees? Do you feel that if they had the option to not receive the flu vaccine they would have decided against it? MD**

**1 (e) Week 9:** A stage of growth and development from Erikson's is identity vs role confusion. My hearing and vision clinical took place at a high school and involved kids ages 12 to 18. This developmental stage considered to be adolescents. During this time, individuals begin to explore their own self identity and develop a sense of self. This includes figuring out how they would like to partake personally, professionally, and socially. Trying to figure out what motivates them. However, during this time they can experience role confusion as well while building identity. Throughout this clinical I witnessed the different clothing styles, language, attitudes, and friend groups that each student partakes in. Observing both confidence in self-identity along with experiencing role confusion throughout the stage. **Absolutely! MD**

**1 (e) Week 10:** A stage of growth and development from Erikson's that I witnessed during clinical was trust vs mistrust. This stage occurs from birth to eighteen months of age. This age group depends entirely on their parents and caregivers to meet their needs. When their needs are met, it develops a sense of security and trust. Some newborn and infant needs include food, changes, proper clothing, comfort, and a safe environment. When these needs are not provided it can cause this age group to develop mistrust towards the caregiver. Not responding and neglecting their needs can negatively impact the infant's sense of security and hope. Negatively affecting their development later in life. Establishing trust during the early stages of life sets positive and healthy foundation for the infant's development. **Perfect! This is such a foundation building stage! MD**

**ER Clinical Objective 1A-D:** This week in the ER you were able to provide care appropriate for the patient, communicate effectively, provide appropriate assessments, and describe safety measures for the patients you cared for. **Great job! MD**

**BG Club Objective 1b-** You did a great job interacting with the children at the Boys and Girls Club while using developmentally appropriate communication. This can be a chaotic and challenging environment, but your group did well and kept the kids engaged. **BS**

**\*End-of-Program Student Learning Outcomes**

FTMC OB Objective 1 A, B, C, D: This week in OB you had the opportunity to work with a postpartum mother and newborn. You did an awesome job with providing appropriate care and communication for the developmental stage of the patients, and provided systematic and developmentally appropriate assessment techniques. We discussed some of the safety measures of each of them as well such as fall risk of a mom post cesarean and security for the newborn. Great job! MD

St. Mary's Week 8 Objective 1B: In your group, you developed and communicated with the different ages of students utilizing your knowledge of growth and development along with responding appropriately to their questions. KA/MD/RH/BS

Flu Clinic Week 8- 1a,b- You did a great job communicating with the patients at the flu vaccine clinic. Your conversation helped to kept the clients calm throughout the process and you worked in an efficient manner to keep the line moving. Nice work! BS

H&V Week 9: 1(a-c)- You did a great job explaining the directions and helping students with both the hearing and vision screenings while using appropriate instructions for their developmental age. RH

Firelands OB Week 10 – 1a, c, d – You did a wonderful job providing holistic care to the mom and baby you were assigned to this week. You did a great job assessing your assigned newborn utilizing developmentally appropriate assessment skills and reporting any abnormal findings. You were able to identify safety measures used to keep newborns stay safe on the OB unit and completed mother newborn verification process whenever returning the newborn to the parents from the nursery. KA

<b>Objective</b>																		
1. Describe the principles of growth and development and knowledge of pathophysiology as a basis for the provision of safe, quality nursing care to children and the childbearing family across the health-illness continuum. (1,2,3,4,7)*																		
Weeks of Clinical	1	2	3	4	5	6	7	Midterm	8	9	10	11	12	13	14	15	Make up	Final

\*\*Evaluate these competencies for the offsite clinicals: ER: 1K, L H&V: 1J, K BG Club: 1K Flu: 1 K, L

**Comments:**

ER Clinical Objective 1 K, L: This week you valued your patient's perspective on disease processes along with how diversity played a role in the care they received. You also provided respect for the patient and family. Great job! MD

BG Club Objective 1k- While interacting with the children at the Boys and Girls Club you did a great job acknowledging their perspectives, diversity, ages, and cultural factors, which all influence their behavior. BS

FTMC OB Objective 1 J, K, L: During our day in OB, you were able to witness a cesarean birth of a mother of advanced maternal age and identify resources available for her. You also were able to discuss the patient's perspective, diversity, and centrality of the patient and family needs as a health team. Awesome job! MD

**\*End-of-Program Student Learning Outcomes**

St. Mary's Week 8 Objective 1K: You provided opportunities for students to share their personal experiences related to your presentation topic. KA/MD/RH/BS

H&V Week 9: 1(k)- You were able to care for the students with developmentally appropriate interactions as well as notice the diversity of the student population. RH

Firelands OB Week 10 – 1k and l – You recognized the uniqueness of the family you were caring for and ensured the opinions and questions were responded to with thoughtfulness and their perspective was validated. You respected the family and their right to make decisions for their infants and ensured they had the necessary information to do so. KA

Objective																		
2. Integrate principles of decision-making in utilizing evidenced-based practice in the nursing process in providing care for the childbearing family and children encompassing cultural sensitivity and diversity. (1,2,3,4,5)*																		
Weeks of Clinical	1	2	3	4	5	6	7	Midterm	8	9	10	11	12	13	14	15	Make up	Final
	8/22	8/29	9/5	9/12	9/19	9/26	10/3		10/10	10/17	10/24	10/31	11/7	11/14	11/21	11/28	NA	
a. Engage in discussions of evidenced-based nursing practice.		NA	NA	S	NA	S	NA	S	S	NA	S	NA	NA	NA	NA	NA	NA	
b. Perform nursing measures safely using Standard precautions.		NA	NA	S	NA	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
c. Perform nursing care in an organized manner recognizing the need for assistance.		NA	NA	S	NA	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
d. Practice/observe safe medication administration.		NA	NA	S	NA	S	NA	S	S	NA	S	NA	NA	NA	NA	NA	NA	
e. Calculate pediatric and adult drug dosages correctly and determine appropriateness of the dose.		NA	NA	S	NA	S	NA	S	NA	NA	S	NA	NA	NA	NA	NA	NA	
f. Utilize information obtained from patients/families as a basis for decision-making.		NA	NA	S	NA	S	NA	S	S	NA	S	NA	NA	NA	NA	NA	NA	
<b>g. Identify factors associated with Social Determinants of Health (SDOH) &amp;/or cultural elements that have the potential to influence patient care.** (Noticing, Interpreting, Responding, Reflecting) (List Below)*</b>		NA	NA	S	S	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD						

\*\*Evaluate these competencies for the offsite clinicals: ER: All H&V: 2B, C, G BG Club: 2G Flu: 2B, C, D, F, G

**Comments:**

**2 (g) Week 4:** Factors associated with social determinants of health that would have a potential to influence patient care include economic stability and healthcare access. Economic stability: patients with limited income may struggle to access necessities, transportation, and healthy food/living. Struggling to afford and access these needs can negatively impact their ability to receive healthcare, medications, and appointments. Healthcare access: depending on insurance and/or income an individual's access to primary care can delay or prevent proper treatment and interventions. This creates a negative impact on patient care. **This is absolutely true! What kinds of resources and support could you provide the patient? MD**

**\*End-of-Program Student Learning Outcomes**

**2 (g) Week 5:** A factor associated with social determinants of health that has the potential to influence patient care is health literacy. In healthcare, staff typically use medical terminology that can be unfamiliar to the patient and their families. Without simple, short, clear, and appropriately provided education, it may not be understood and can lead to poor outcomes and confusion. This can lead to nonadherence with medication and treatment, negatively affecting the patients' health. **Yes! How would this impact your practice? How did you incorporate this knowledge to the BG Club? MD**

**2 (g) Week 6:** Factors associated with social determinants of health that have the potential to influence patient care is health literacy and social and community context. This was evident in my clinical experience this week. The patient was experiencing a geriatric pregnancy and both her and her husband could experience struggles with health literacy and social and community context. They have an older daughter that is currently in college, creating a large age gap between the children. As we know, healthcare changes constantly. Due to their children's larger age gap this could create issues with health literacy and social and community context. Due to their unique situation terms may be different and difficult to follow and understand. Education along with clear and simple communication is always essential, especially in this situation. Their support systems could have shifted, making this lifestyle transition more difficult. The families' dynamics will also change due to welcoming a new baby. Support, education, and providing resources to parents and their older daughter can make this transition a little easier for them. **These SDOH can definitely be a challenge! A lot as changed! MD**

**2 (g) Week 8:** Factors associated with social determinants of health that have the potential to influence patient care is education quality. Education quality can influence patient care and decision making. Affecting the way, one understands concepts and information regarding specific topics. During the flu vaccination clinical each individual had the choice to receive or to not receive their vaccinations. Individuals that showed up had made that personal decision to receive the flu and/or COVID vaccine(s). This goes for employment as well, every individual that works for a company that requires specific vaccinations has that choice to be employed through them. A problem that can negatively impact a patient's health and care can be misunderstanding and being misinformed regarding preventative measures. We see a lot of this now due to social media and social norms that are changing due to trends. **Absolutely true. Social media can be a blessing and a curse at the same time. MD**

**ER Clinical Objective 2 A-F: This week you discussed EBP in nursing, performed standard precautions, observed/gave care in an organized manner, observed safe medication administration with appropriate dosage calculations, and you were able to obtain information for proper decision-making. Awesome! MD**

**2 (g) Week 9:** Factors associated with social determinants of health that have the potential to influence care is transportation access. Transportation difficulties is just one of the social determinants of health that can play a role in students seeking hearing and vision follow ups. If a family struggles with transportation issues and their child needs to seek follow-up healthcare, it could negatively influence the child's care. If a child does not pass a hearing or vision screening once it is repeated, then they must follow up with a healthcare provider. If the student's family struggles with transportation, this can cause them to miss appointments and not follow up as recommended. Negatively influencing the child's health due to not seeking the proper healthcare to follow up on possible abnormal findings. **Absolutely! What emotions would you have as a school nurse if a parent stated they were unable to take their child to appointments? MD**

**2 (g) Week 10:** Factors associated with the social determinants of health that have the potential to influence care is access to quality prenatal care. Lack of prenatal care can negatively impact both the mother and the fetus. Increasing the risk of pregnancy, labor, and postpartum complications. Individuals that may not be able to get access to prenatal care include low-income households, transportation issues, cultural influences, and poor living environments. This could also be an individual choice; some may not seek proper prenatal care due to addiction or other practices. The risk of fetal distress and abnormalities along with newborn complications is high. **How would you educate someone who chooses to not have adequate prenatal care? How would you support the mom who wants adequate care but cannot afford it? MD**

**FTMC OB Objective 2 A-F: This week we had conversations on evidenced-based practices, performed standard precautions, organize care and recognized when assistance was needed, and utilize information for decision making for our post cesarean patient and newborn. You also were able to assist with the maintenance of an IV for the mother and calculate medications for the patients. Great job! MD**

**Flu Clinic Week 8- 2d- You did a great job safely administering flu vaccines at the flu vaccine clinic. BS**

**H&V Week 9: 2(b, c)- You use proper hand hygiene when necessary while at this clinical as well as remained organized throughout the clinical. You were able to assist with making sure the charting papers were alphabetized while also continuing to screen children as they came into your area. RH**

Firelands OB Week 10 – 2b, c, d, e, f – You utilized appropriate precautions on the newborn who had not had their first bath. You did a wonderful job providing a baby bath to the newborn and monitored their temperature before and after bath as well as helped prevent hypothermia by utilizing appropriate warming techniques. You provided the congenital heart screening to the newborn ensuring the pulse oximeter was placed on the corrects limbs and monitored for 1 minute on each site. You were able to observe the hearing screening and lab work obtained on the 24 hour old newborn. You were able to observe a circumcision and the nursing interventions provided during and after the procedure to the newborn. You did a nice job following the rights of medication administration and appropriately documenting the medication administration in the MAR this week on clinical. You had the opportunity to administer a vaccine IM to the newborn and followed the additional steps needed for a vaccine. I know this was your least favorite skill to complete but you were very skillful during the process. You worked with the family to gather information on the baby to appropriately document any feedings and output the newborn had while you were caring for them. KA

Objective																		
3. Summarize the legal, moral and ethical issues related to care of children and the childbearing family. (2,6,7)*																		
Weeks of Clinical	1	2	3	4	5	6	7	Midterm	8	9	10	11	12	13	14	15	Make up	Final
	8/22	8/29	9/5	9/12	9/19	9/26	10/3		10/10	10/17	10/24	10/31	11/7	11/14	11/21	11/28	NA

b. Respect the privacy of patient health and medical information as required by federal HIPAA regulations.		NA	NA	S	S	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
c. Follow the standards outlined in the FRMCSN policy, "Student Code of Conduct"		NA	NA	S	S	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
d. Critique examples of legal or ethical issues observed in the clinical setting. (List Below)*		NA	NA	S	S	S	NA	S	S	S	S	NA	NA	NA	NA	NA	NA	
	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD						

\*\*Evaluate these competencies for the offsite clinicals: ER: All H&V: All BG Club: All Flu: All

**Comments:**

**3 (d) Week 4:** An example of a legal and ethical issue that I observed in the clinical setting was a patient being discharged from the emergency room a couple of days ago, being placed on multiple medications, and advised to refer to primary care and a specialist. The patient had explained that they do not have the appropriate income to be able to afford any of the medication or appointments, as well as stating that they do not have any insurance. They came in again after being discharged from the emergency room the other day in worse condition and ended up being admitted due to the extent of health. This could be an ethical and legal issue depending on the resources that were given to the patient during the first emergency room visit. Depending on whether they were offered the generic versions of medication, resources of programs available, and referrals to assistive aids. **This is heartbreaking and happens more often than not. MD**

**3 (d) Week 5:** An example of an ethical issue I observed during my clinical experience involved navigating inappropriate language and behavior among the children. I felt uncomfortable when the children acted out inappropriately. Although the staff were present and aware of the behavior, the teacher to student ratio was unbalanced, and they were doing their best to handle the situations. I found myself contemplating whether I should intervene or allow the staff to handle the children as a group since they are familiar with them. I chose not to address or correct any behavior as I wanted to stay professional and respectful. I put my trust in the staff and had some conversations with the other adults to help manage the situation appropriately. This experience was a good reminder of maintaining professionalism, boundaries, and cultural competence within my role as a student. **Great learning experience for sure! Unfortunately kids today are exposed to so much inappropriate content. How would you encourage students to limit screen time or limit their ability to have this content exposure? MD**

**3 (d) Week 6:** An example of an ethical issue that I observed during my clinical experience involved a patient's health history. The patient was admitted due to having a scheduled cesarean section. When looking at the mom's health history it was noted that she had multiple past abortions throughout her lifetime. This could be a potential ethical issue due to the topic of abortion and the different societal opinions. Of course, this was just within her history and did not change the quality of care that she received. Staff that cared for this patient would see this history but that did not change how care was provided. It is essential within healthcare that if there ever are topics that are seen or brought up that create opinions that quality and equal care is always provided. I never noticed any side conversations, comments, or anything brought up

**\*End-of-Program Student Learning Outcomes**

regarding this history. Staff provided quality care, education, and support to this patient as they would for any other patient and this is how it should always be. **Absolutely! It is so important to promote this always! MD**

**3 (d) Week 8:** A possible example of an ethical issue that could happen during the flu clinical regards autonomy and consent. The specific flu clinic that the clinical took place was through the main hospital. This facility requires all staff to receive a flu vaccination by specific dates each year. While COVID vaccinations used to be required, they are no longer and are optional for all employees. The reason for the requirement of flu vaccinations is to protect ourselves and others within the hospital environment. While there are some circumstances that waiver individuals from needing to obtain certain vaccinations, majority need to receive it. For an individual to receive a vaccination they must make that decision to receive the vaccination and voluntarily consent to it. All employees are given this information at the time of hire and have the decision not to be a part of the company that holds these policies. So, while it is ultimately their decision, an individual may feel pressured or left at no choice in receiving vaccinations due to facility policy. This could be an ethical issue due to threatening the individual's autonomy. **Absolutely! If someone asked you about this, how would you respond? MD**

**3 (d) Week 9:** A possible example of an ethical issue at the hearing and vision screening clinical regards the inability of some families to seek the necessary follow-up care. Every child that does not pass a repeated hearing and/or vision screening must follow up with a healthcare provider. The outcomes of the students' cases are reported and documented by the state and school systems. However, if there are financial and transportation struggles within a family it can negatively impact the child's care. This is concerning due to the belief that all children have the right to quality healthcare. If a family is struggling financially or with transportation access it can lead to the child not receiving the recommended follow-up care. While this can be the case, a family's financial abilities and access to transportation should not prevent a child from receiving the needed healthcare. **Yes! This would be so difficult! What kinds of emotions would you have toward a family with the inability to follow up? MD**

**3 (d) Week 10:** A possible ethical issue during this clinical regards the decision of circumcision. This is a decision that the parent(s) of a baby boy makes for him. This could be an ethical issue since newborns cannot consent and advocate for themselves as well as not being a necessary procedure. There are some religious, social, personal, and cultural practices that can impact the decision of a circumcision. The risks and benefits are weighed as well as possible complications. Since the decision is not being made by the newborn themselves and there is typically no medical necessity for the procedure it creates the ethical issue of whether it should be performed or not. It is shown that specific areas of the world have different circumcision occurrence trends. It is important to provide every family with support regarding their decision on circumcision. Provide the proper non-judgmental or opinionated education based on evidence-based information. **This is so true! MD**

**ER Clinical Objective 3 A-C: Great job acting with integrity, respecting privacy, and following the Student Code of Conduct! MD**

**BG Club Objective 3a,c- At the Boys and Girls Club, you acted with integrity, consistency, and respect for differing views and perspectives. BS**

**FTMC OB Objective 3 A, B, C: Great job with acting with integrity and respecting different views on care of the patients we had this week in clinical! You were also able to respect health and medical information and followed the Student Code of Conduct policy! MD**

**St. Mary's Week 8 Objective 3A-C: You were professional and considerate with all students and staff you came in contact with. You made sure to keep student privacy throughout the day. You also maintained all of the standards in the FRMCSN Code of Conduct while at the school. KA/MD/RH/BS**

**Firelands OB Week 10 – 3a, b, c – You were professional and considerate with all the care you provided. You made sure to keep patient privacy and follow HIPPA regulations through the day. You also maintained all the standards in the FRMCSN code of conduct while on the OB unit. KA**

Objective																		
4. Construct nursing care plans and clinical reports that demonstrate mastery of clinical judgment skills through holistic, age-appropriate nursing care of the childbearing family and children. (1,2,6)*

\*\*Evaluate these competencies for the offsite clinicals: ER: 4A, D, C, E H&V: 4B, D BG Club: 4D Flu: 4B, D

**Comments:**

**4 (d) Week 4:** During this clinical I educated a patient on fall prevention measures at home. A patient came in from falling home due to having things set up too high and not taking proper precautions. I ensured to educate on removing kitchen mats and rugs throughout the home as they can be a fall hazard. Additionally, I educated to place all everyday necessities at a level that is reachable. Explaining that reaching and climbing, especially when already using an ambulatory device is dangerous and can cause life threatening falls. Suggesting that maybe a friend and/or family member could help her go around her house and adjust things as needed before staying home alone again.

*This is wonderful education! MD*

**4 (d) Week 5:** During this clinical I educated early school aged students on the topic “what is a nurse”. As a group we came up with activities for the kids to participate in to learn what a nurse is and the frequent tasks that they complete. My activity consisted of a kid friendly definition of what a nurse is, along with a pin the supplies on the nurse activity. This activity included two laminated nurses with Velcro dots attached to them, along with little laminated supplies that could stick to where the nurse would use the item. For example, some supplies included a face mask and stethoscope. The kids were to place where the nurse would put the mask and stethoscope on the nurse. When they placed an item on the nurse, we went over what the item was and how/when the nurse would use the item. *That is a great idea! MD*

**\*End-of-Program Student Learning Outcomes**

**4 (d) Week 6:** During this clinical I had the opportunity to educate a postpartum patient on what to expect following birth. During clinical my patient expressed that she was feeling exhausted and just wanted to rest. I acknowledged her feelings and reassured her that she will be able to get some rest however, assessments will be performed frequently in the beginning and then more spaced throughout the stay. I explained the purpose of the assessments including vital signs, fundal assessment, incision healing, hygiene, voiding, pain levels, and fluids. Explaining that our goal is to prevent complications and ensure optimal health. I ensured to support the patient and answer any questions that she had for all of us students. **Excellent! MD**

**4 (d) Week 8:** During this clinical I had the opportunity to educate children on CPR and the Heimlich maneuver. During the St. Mary's clinical our group had the topic of teaching CPR and the Heimlich. Our activity consisted of a brief presentation explaining what CPR and the Heimlich maneuver is along with demonstrating and practicing each activity. We had two mannequins that could be used for chest compressions and head tilting to open the airway for rescue breaths, along with one mannequin that the Heimlich maneuver could be performed on. All age groups did a good job of actively listening and being eager to practice each maneuver. At the end we asked if there were any questions and answered accordingly. **You did an awesome job during this clinical! MD**

**4 (d) Week 9:** During this clinical experience I had the opportunity to educate adolescents on how to perform their hearing and vision screenings. I explained how both the hearing and vision tests were to be completed. For the hearing screening, I instructed the students to face the opposite wall. Raise the corresponding hand when they hear a sound in that ear, and to then lower that hand once no longer heard. For the vision screening, I guided each student to cover one eye and read a specific line on the vision chart. Once they were able to complete a section, they then switched the covered eye and read another line. **Great! MD**

**4 (d) Week 10:** During this clinical experience I had the opportunity to educate a mom and dad on circumcision care. They decided to have their newborn baby boy circumcised. When bringing the newborn back to their room I explained that there will be additional hygiene practices when changing his diaper. The diaper will need to be changed frequently to ensure cleanliness, not using soap or baby wipes directly on the site, cleaning around the incision as normal, and applying a thick glob of petroleum jelly on top the site to prevent sticking to the diaper. I also included that if there are yellow crusts on the site to not pick them off as this is part of the healing process. Some signs of infection that need to be reported to the healthcare provider included swelling, excessive bleeding, fever, and discharge. Once I went over the circumcision care education, the nurse went in after me to demonstrate and answer and additional questions. **Awesome! Great job! MD**

ER Clinical Objective 4 A, C, E: This week in your CDG you were able to determine a care plan based on noticing and interpreting and then how you would respond to the situation. You were also able to describe witnessed advocacy, and analyze what was going on with your patient. **Great job! MD**

BG Club Objective 4d- As you no doubt noticed at the Boys and Girls Club, when providing teaching to kids of various ages, we must continually adjust our approach based on their developmental level. **BS**

FTMC OB Objective 4 C, E: Great job analyzing pathophysiology of your mother's cesarean and the newborn's resuscitation potential complications! You also did a great job witnessing examples of patient advocacy with the mother during her times of nausea and vomiting by recognizing the need for further assistance with a different nausea medication. **MD**

Flu Clinic Week 8- 4b- You did a great job documenting the flu (and COVID) vaccines you administered at the flu clinic. **BS**

H&V Week 9: 4(b, d)- You were able to assist with the documentation process with the school nurse once all screenings were complete. She explained their process of how to retest students and how that would impact the data they report to the state each year. You educated the students on how to properly perform the screenings while at clinical. **RH**

Firelands OB Week 10 – 4b, d - You did a nice job documenting the newborn assessment in the EMR for the first time. You asked appropriate questions to ensure you were able to document the assessments accurately. You kept up on your charting and ensured documentation was completed in real time. You provided patient education that was focused on the parents' concerns and answered all of the questions appropriately. **KA**

Objective																		
4. Construct nursing care plans and clinical reports that demonstrate mastery of clinical judgment skills through holistic, age-appropriate nursing care of the childbearing family and children. (1,2,6)*																		
Weeks of Clinical	1	2	3	4	5	6	7	Midterm	8	9	10	11	12	13	14	15	Make up	Final

\*\*Evaluate these competencies for the offsite clinicals: ER: 4F, G, H H&V: N/A BG Club: N/A Flu: N/A

**Comments:**

ER Clinical Objective 4 F-H: For this clinical, you were able to provide information correlating diagnostics, medications, and medical treatment for your patient you saw in your CDG. Great job! MD

FTMC OB Objective 4 F-J: During our clinical day we were able to obtain this objective with a newborn who received resuscitation measures post cesarean delivery. We were able to correlate blood glucose and temperature challenges the newborn was experiencing due to the traumatic delivery. You also did a great job putting pieces together with an advanced maternal age mother and complications. Awesome job! MD

Firelands OB Week 10 – 4f, g, h, I, j – You utilized information from your patient's and the mother's charts as well as from your assessment to complete the OB patient profile You were able to identify how the patient's diagnostic tests, medications, medical treatments, nutritional needs, and nursing interventions correlated to the laboring

**\*End-of-Program Student Learning Outcomes**

process. You were knowledgeable on clinical and were able to discuss how these aspects interrelated and if you did not have an answer you looked the information up to assist you with making the connections. KA

<b>Objective</b>																		
5. Collaborating professionally with members of the health care team, childbearing and child-rearing families, faculty, and peers through written, verbal and nonverbal methods, and by conferencing, networking, and posting through computer technology. (1,3,5,6,7,8)*

\*\*Evaluate these competencies for the offsite clinicals: ER: 5A, B, C, F, G H&V: 5A, B, C BG Club: 5A, B Flu: 5A, B, C

**Comments:**

ER Clinical Objective 5 A: For this clinical you were marked satisfactory in all areas with the comment “Isabella was eager to learn and comfortable in patient’s room!” by Alison Hay, RN. Great job! MD

ER Clinical Objective 5 B, C, F, G: This week you were able to evaluate your own participation in clinical, communicate professionally with team members, and clearly communicate care in the form of an SBAR on your CDG. You also provided a CDG that met all of the requirements for being satisfactory. Great job! MD

**\*End-of-Program Student Learning Outcomes**

BG Club Objective 5a,b- You showed interest and enthusiasm as you presented your material to the children at the Boys and Girls Club. Nice work! BS

FTMC OB Objective 5 A, B, C, F: During this clinical experience you were able to evaluate your participation in activities and communicate professionally with the care you provided your patients with the nursing staff. You demonstrating awesome enthusiasm in clinical with excitement with witnessing a cesarean birth and different interventions for the mother during the post-operative period. The OR team was excited about your enthusiasm during the operation and were happy to assist with your learning! You also were able to witness a newborn resuscitation. Amazing job this week! MD

FTMC OB Objective 5G: This week you submitted a Care Map and did not submit a CDG. This competency is an NA. MD

St. Mary's Week 8 Objective 5A-B: You did a great job showing interest and enthusiasm while at the school this week. You asked questions throughout the day to the students to enhance their learning on the presentation topic. You communicated and collaborated with the staff professionally and worked together to ensure the students received accurate information. KA/MD/RH/BS

Flu Clinic Week 8- 5a,b,c- You had a great attitude and positive demeanor while administering flu vaccinations at the flu clinic. Thank you for volunteering your time and staying an extra hour to administer flu and COVID vaccines, it was a big help! You also communicated effectively with other members of the healthcare team to ensure positive patient outcomes. BS

H&V Week 9: 5(a, b, c)- You remained positive and welcoming to all students throughout the clinical experience. You were able to professionally communicate with staff at the school as well as with the students who you were screening. RH

Firelands OB Week 10 – 5a, c, d, e, f, – You did a great job showing interest and enthusiasm while in OB. You sought out new learning experiences while on clinical. You were able to see a vaginal delivery while on clinical this week! You communicated and collaborated with the OB staff professionally and worked together to ensure the patients received the appropriate care. You did a nice job navigating the EMR and gathering information on your patient to ensure you could provide appropriate care throughout your clinical day. You provided hand off report to the appropriate nurse when leaving clinical at the end of shift. KA

Objective																		
6. Critique own strengths and areas for improvement modifying behaviors accordingly to achieve personal and professional goals. (7,8)*																		
Weeks of Clinical	1	2	3	4	5	6	7	Midterm	8	9	10	11	12	13	14	15	Make up	Final

	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD	MD						

\*\*Evaluate these competencies for the offsite clinicals: ER: All H&V: All BG Club: All Flu: All

**Comments:**

**6 (a) Week 4:** An area of improvement during this clinical experience would be time management and providing care efficiently. During this clinical I was nervous and scared to make a mistake. I was hesitant when performing tasks that I do know how to do but I wanted to make sure I was doing it 100% correctly. This made me perform slower than ideal for an emergency room pace. Throwing off the nurse's time management and timing of task completion. My goal is to improve my time management skills and have confidence when performing tasks, especially in front of others. To ensure that I complete these goals I will continue to watch the clinical task advance

**\*End-of-Program Student Learning Outcomes**

videos. I will ensure to make and bring clinical papers that will help organize and prioritize patient care. Lastly, I will practice clinical tasks at home with items that mock tools and items used during clinical to try and meet my goals. **Great idea! MD**

**6 (a) Week 5:** An area of improvement during this clinical would-be therapeutic communication with children. I feel as if therapeutic communication with children is more difficult when compared to adults. There were times that I just did not know what to say in response to some questions and behavior. I had an extremely hard time coming up with a response at all. My goal is to improve my therapeutic communication with children. I plan to reach this goal by continuing to work with children through babysitting, volunteering, and being around family. By doing this I will continue to become more comfortable and learn how to speak with children. I can practice, listen, reflect, and grow with my therapeutic communication skills through practice and exposing myself to environments that aid in growth of these skills. **This can be a challenge for sure! The more practice the better you will feel! MD**

**6 (a) Week 6:** An area of improvement during this clinical would be recalling medical-surgical content which is also essential in maternal-child nursing. Many of the disease processing and complications that are introduced in medical-surgical can happen to mom and baby in maternal-child. Since that course was a couple semesters ago I sometimes find it challenging to recall all the details. While I know the material from the course, it is good to have a reminder of the smaller details, especially within the main topics. My goal is to restrengthen my knowledge regarding the medical-surgical content. To reach my goal I will review the medical-surgical content by going back through notes, practicing textbook questions, and using simple nursing videos to help with memorization. **This is an awesome idea! MD**

**6 (a) Week 8:** An area of improvement during this clinical event would be organization. During the flu clinical it took me a decent amount of time to organize and get comfortable with administering vaccinations. At the beginning I was stressed and felt watched. This caused me to become unorganized and rushed. My goal is to stay confident and organized even while feeling eyes on me, to not feel rushed and perform care efficiently. I know that when I feel like this, mistakes can be made. It is important to have a clear and steady mind, not being afraid to clarify information. To reach this goal I plan to remind myself by taking deep breaths and clearing my mind before starting a task. Along with ensuring to gather all information before starting to ensure an understanding. **With medication administration it is so important to slow down. It does not matter how many people are in line, it is so important to keep everything organized and slow down. I look forward to an update with how slowing down worked for you. MD**

**6 (a) Week 9:** An area of improvement for me during this clinical was providing clear instructions to students. It is important to give students clear and simple instructions. During the hearing and vision clinical experience I noticed that some students were not understanding some of the instructions for the screenings. Most students were not paying attention and focused on the task at hand, they were all more concerned about their friends and acting silly. Although I explained the screening instructions simply and clearly, some did not listen to the instructions, and it had to be adjusted. I had to redirect some of the students to get their attention onto the testing, so they were able to focus when listening to instructions. Moving forward, my goal is to improve my communication skills with students. I plan to do this by explaining things in different ways and approaching situations in a different manner. Engaging in the community and taking more opportunities to work with kids and learning more communication skills. The more time and exposure around children and explaining education topics to patients in general will help my communication skills and techniques. **Excellent! MD**

**6 (a) Week 10:** An area of improvement for me during this clinical was being hesitant and scared to give a newborn bath. During this clinical my patient needed a bath due to hitting the 24-hour old mark. I was nervous due to my lack of experience, fear of accidentally harming the baby, timing factors, feeling overwhelmed, and being watched. For this instance, the family wanted a demonstration bath so it was decided that it would be more efficient to have the nurse complete the newborn bath. My goal is to be more confident when handling a newborn and giving a bath. To reach this goal and become more comfortable I will watch demonstration videos and to what I can to expose myself to these situations. **Perfect! Practice makes progress! MD**

**ER Clinical Objective 6 B-I: You did amazing in clinical meeting all of this objective! Keep up the fabulous work! MD**

**BG Club Objective 6 B-I: This week you were to address all of these competencies since they all related to you and how you felt you did during your clinical experience. You achieved satisfactory in all areas related to your professionalism, ACE attitude, growth, time management, organization, seeking out new experiences, growth in decisions and self-confidence. Great job! MD**

**\*End-of-Program Student Learning Outcomes**

BG Club Objective 6e- Professional behavior was observed throughout your time at the Boys and Girls Club this week. BS

FTMC OB Objective 6 D-I: I am so proud of you for being prepared for clinical, exhibiting professional behavior, actively seeking out new learning experiences, your organization, and growth in clinical judgment! You did an awesome job displaying an ACE attitude in clinical this week! Keep up the amazing work! MD

MIDTERM-Amazing job during the first half of the semester! I am so proud of you and the progress you have made! Be sure to look for opportunities to continue growing! MD

St. Mary's Week 8 Objective 6A-I: You came to the school ready and prepared to present your topic. You were enthusiastic and willing to share what you learned about your presentation topic to the students. You were organized and timely with your presentation throughout the day. You delivered all presentations with an ACE attitude. Awesome job! KA/MD/RH/BS

Flu Clinic Week 8- 6d,e,g- You may have been a bit nervous at first, but you worked through it and performed efficiently and administered many vaccines. You also worked in a timely manner to get all of the clients through the line. Professional behavior was observed at all time throughout the clinical experience. Nice work! BS

Firelands OB Week 10 – 6c, d, e, f, g, h, I – Your thought process and clinical judgment skills have grown from previous semesters. You came to clinical ready and prepared to learn. You were enthusiastic and willing to learn whatever your faculty and staff was able to teach you. You were organized and timely with your care and documentation and delivered all your care with and ACE attitude. Terrific job! KA

**\*End-of-Program Student Learning Outcomes**

Student Name: <b>Isabella Riedy</b>		Course Objective: <b>4: Construct nursing care plans and clinical reports that demonstrate mastery of clinical judgment skills through holistic, age-appropriate nursing care of the childbearing family and children. (1,2,6)*</b>					
Date or Clinical Week: <b>9/25/2025 Ineffective Breathing Pattern</b>							
Criteria		3	2	1	0	Points Earned	Comments
<b>Noticing</b>	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	<b>(lists at least 7*) *provides explanation if &lt; 7</b>	<b>(lists 5-6)</b>	<b>(lists 5-7 but no specific patient data included)</b>	<b>(lists &lt; 5 or gives no explanation)</b>	<b>3</b>	<b>All criteria met. --	--	----------------	-----------------	----------------	-------------	---	--

Criteria		3	2	1	0	Points Earned	Comments
	13. An appropriate rationale is included for each intervention	> 75% complete	50-75% complete	< 50% complete	0% complete	3	All criteria met. MD
Reflecting	14. List all of the highlighted reassessment findings for the top nursing priority.	>75% complete	50-75% complete	<50% complete	0% complete	3	All criteria met. MD
	15. Evaluation includes one of the following statements: <ul style="list-style-type: none"> <li>Continue plan of care</li> <li>Modify plan of care</li> <li>Terminate plan of care</li> </ul>	Complete			Not complete	3	

**Reference**

An in-text citation and reference are required. Both included. MD

The care map will be graded “needs improvement” if missing either the in-text citation or reference, but not both.

The care map will be graded “unsatisfactory” if both in-text citation and reference are not included.

Total Possible Points= 45 points  
45-35 points = Satisfactory  
34-23 points = Needs Improvement\*  
< 23 points = Unsatisfactory\*

**\*Total points adding up to less than or equal to 34 points require revision and resubmission until Satisfactory. Refer to the course specific requirements for resubmission deadlines.**

**\*\*\*Students that are not satisfactory after 2 attempts will be required to meet with course faculty for remediation. \*\*\***

**Faculty/Teaching Assistant Comments:**

**Total Points: 45/45 Satisfactory MD**

**Faculty/Teaching Assistant Initials: MD**

Comments:

The student has satisfactorily completed the assigned vSim and met the established objectives by obtaining at least 80% on the scenario (including SBAR), and post-simulation quiz by the due date and time.

vSim Objectives

9/22/2025 vSim Maternity Case 1

1. Performs focused antepartum assessment of patient with severe preeclampsia. (1, 2, 4)\*
2. Recognizes signs and symptoms of severe preeclampsia (hypertensive disorders). (1, 2)\*
3. Communicates severe preeclampsia to the interprofessional team. (1, 2, 3, 5)\*
4. Administers prescribed antihypertensive medication (magnesium sulfate). (1, 2, 3, 5)\*
5. Utilize therapeutic communication and interpersonal skills in the interactions with patients, families, and members of the health team. (1, 3, 5, 6)\*

\* Course Objectives

10/6/2025 vSim Maternity Case 4

1. Select physical assessment priorities based on individual patient needs. (1, 2)\*
2. Recognizes signs and symptoms of umbilical cord prolapse. (1, 2, 5)\*
3. Performs emergent nursing management strategies for umbilical cord prolapse. (1, 2, 3, 4, 5)\*
4. Utilize therapeutic communication and interpersonal skills in the interactions with patients, families, and members of the health team. (1, 3, 5, 6)\*

\* Course Objectives

11/3/2025 vSim Pediatric Case 3

1. Identify and describe patient history, physical assessment findings, and diagnostic information related to dehydration.
2. Prioritize and implement evidence-based nursing interventions that are culturally and situation appropriate for the pediatric patient.
3. Implement clinical orders, patient safety measures, and provide education using therapeutic and confidential communication for the pediatric patient and family members.

\*Course Objectives

11/18/2025 vSim Pediatric Case 1

1. Select physical assessment priorities based on individual patient needs. (1, 2)\*
2. Recognize signs and symptoms of seizure activity. (1, 2)\*
3. Demonstrate appropriate nursing interventions for a patient experiencing a seizure. (1, 2, 3, 4, 5, 6)\*
4. Demonstrate therapeutic communication skills when interacting with children and their families. (1, 3, 5, 6)\*
5. Discuss how social determinants of health can influence the management of a chronic illness. (2, 3)\*

\* Course Objectives

11/21/2025 vSim Pediatric Case 4

1. Select physical assessment priorities based on individual patient needs. (1, 2)\*
2. Identifies developmentally appropriate and culturally competent nursing interventions based on patient care needs. (1, 2, 4)\*
3. Prioritizes patient safety measures and appropriate nursing interventions for a patient with an acute sickle cell pain crisis. (1, 2, 3, 4, 5)\*
4. Utilize therapeutic communication and interpersonal skills in the interactions with patients, families, and members of the health team. (1, 3, 5, 6)\*

\* Course Objectives

## Lasater Clinical Judgment Rubric Scoring Sheet

**Lasater Clinical Judgment Rubric Scoring Sheet: SCENARIO: Empathy Simulation**

STUDENT NAME:

OBSERVATION DATE/TIME:

**REFLECTING: (6)\***

- Evaluation/Self-Analysis: **E**      A      D      B
- Commitment to Improvement: **E**      A      D      B

You reflected on many aspects of your time caring for the newborn simulator. Your responses were thoughtful and reflective on how you felt and you compared your experience to caring for a real newborn.

Great job.

I enjoyed seeing your photo!

**SUMMARY COMMENTS:**

E = exemplary, A = accomplished, D = developing, B = Beginning  
Based off of Lasater's Clinical Judgment Rubric

**Simulation Objectives:**

1. Identify common challenges associated with caring for a newborn and how to empathize with the childrearing family. (1, 2, 6)\*
2. Describe how patient-centered care is dependent on past medical history, cultural history, and social history. (1, 2, 3, 4)\*
3. Describe your psychological and social response to the simulation and how it impacts the care provided to the newborn patient and childrearing family. (1, 5, 6)\*

**Developing to accomplished is required for satisfactory completion of this simulation.**

**Comments**

**You are satisfactory for this simulation.**

\*Course Objectives

## Lasater Clinical Judgment Rubric Scoring Sheet

STUDENT NAME:

OBSERVATION DATE/TIME: 10/16-17/2025 SCENARIO: Escape Room

CLINICAL JUDGMENT						OBSERVATION NOTES
<b>COMPONENTS NOTICING: (1, 2, 5)*</b>						Noticed patient safety issues throughout the room. These included sharps container on bed, patient hanging off the bed, bed not locked, armband not on patient, syringe, and side rails not up. Noticed the assessment findings in the patient assessment supporting the need for a breathing treatment. Noticed math problems in the box and recognized the need to solve. Noticed some boxes needed a code and one needed a key.
• Focused Observation:	E	A	D	B		
• Recognizing Deviations from Expected Patterns:	E	A	D	B		
• Information Seeking:	E	A	D	B		
<b>INTERPRETING: (2, 4)*</b>						Interpreted the risk in the safety issues for the patient and recognized the need to be fixed. Interpreted the need to work as a group to solve problems and find clues. Interpreted the need to complete the dosage calculation to administer the correct amount of IV fluids. Interpreted the need to administer meds and the need to call HCP to administer the correct doses.
• Prioritizing Data:	E	A	D	B		
• Making Sense of Data:	E	A	D	B		
<b>RESPONDING: (1, 2, 3, 5)*</b>						Responded to safety issues by correcting each of them to provide a safe environment for the patient's care. Responded to instructor cues regarding environment and problem solving. Responded to HCP orders and picked the correct dosage of medication for the patient. Flexible with plan of care and looking for clues as well as communicating with one another effectively. Responded to the patient's respiratory distress by providing the patient with the ordered breathing treatment.  Responded to the healthcare providers order and programed the IV to the correct rate and administered the prescribed IV fluids.
• Calm, Confident Manner:	E	A	D	B		
• Clear Communication:	E	A	D	B		
• Well-Planned Intervention/ Flexibility:	E	A	D	B		
• Being Skillful:	E	A	D	B		
<b>REFLECTING: (6)*</b>						Worked together with communication and idea sharing. Collaborated and provided suggestions to one another to make sense of riddles, math formulas, medications, and treatments.
• Evaluation/Self-Analysis:	E	A	D	B		
• Commitment to Improvement:	E	A	D	B		

**SUMMARY COMMENTS:**

E = exemplary, A = accomplished, D = developing, B = Beginning  
Based off of Lasater’s Clinical Judgment Rubric

**Developing to accomplished is required for satisfactory completion of this simulation.**

Scenario Objectives:

1. Utilize the concepts of growth and development to identify concerns with patient safety and provide appropriate interventions to address safety concerns. (1, 3, 5)\*
2. Administer medications utilizing the concepts of growth and development and the rights of medication administration to prevent errors in the process. (1, 2, 5)\*
3. Collaborate with members of the healthcare team to provide safe, holistic, and comprehensive patient care. (1, 2, 4, 5, 6)\*
4. Utilize SBAR communication in interactions with members of the health team. (5)\*

\*Course Objectives

You are successful in this simulation as you were able to provide a safe environment for the patient. You were also able to work together as a team to solve the math formulas and give appropriate dosages of medications. Good job! KA/MD/RH/BS

Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs Recognizes most obvious patterns and deviations in data and uses these to continually assess Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs

Interpreting: Generally focuses on the most important data and seeks further relevant information but also may try to attend to less pertinent data In most situations, interprets the patient’s data patterns and compares with known patterns to develop an intervention plan and accompanying rationale; the exceptions are rare or in complicated cases where it is appropriate to seek the guidance of a specialist or a more experienced nurse

Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport Develops interventions on the basis of relevant patient data; monitors progress regularly but does not expect to have to change treatments Displays proficiency in the use of most nursing skills; could improve speed or accuracy

Reflecting: Evaluates and analyzes personal clinical performance with minimal prompting primarily about major events or decisions; key decision points are identified, and alternatives are considered Demonstrates a desire to improve nursing performance; reflects on and evaluates experiences; identifies strengths and weaknesses; could be more systematic in evaluating weaknesses

Identify stridor lung sounds. take gown down to visualize chest but not enough to visualize retractions</p> <p>Acetaminophen order checked in skyscape and safe dose range ordered and per skyscape order was correct. Verified skyscape resource during debriefing to be correct.</p>
<p><b>INTERPRETING: (2, 4) *</b></p> <ul style="list-style-type: none"> <li>• Prioritizing Data:            E        A        D        B</li> <li>• Making Sense of Data:        E        A        D        B</li> </ul>	<p>Interpret temperature as elevated</p> <p>Look up safe dose range for medication orders in chart.</p> <p>Give ibuprofen first due to acetaminophen not being due</p> <p>Interpret temperature as elevated, interpret heart rate as elevated, interpret oxygen saturation as low. Interpret combination of</p>

	<p>symptoms as respiratory distress</p> <p>Prioritize oxygen application to patient</p> <p>Stay in room with patient while in respiratory distress</p>
<p><b>RESPONDING: (1, 2, 3, 5) *</b></p> <ul style="list-style-type: none"> <li>• Calm, Confident Manner:     E     A     D     B</li> <li>• Clear Communication:        E     A     D     B</li> <li>• Well-Planned Intervention/ Flexibility:                    E     A     D     B</li> <li>• Being Skillful:                E     A     D     B</li> </ul>	<p>Remove unsafe items from bed</p> <p>Education provided to father about plan of care and asked if he had any questions</p> <p>Call healthcare provider to clarify orders including ibuprofen, amoxicillin, and IVF. Had healthcare provider readback orders to them rather than students reading back orders to healthcare provider.</p> <p>Change IV rate on pump</p> <p>Medication administration: verify name/DOB, verify allergies, educate on what medications are for (ibuprofen, amoxicillin, and cetirizine), scan patient, scan medication, give correct dose administered.</p> <p>Verify with pharmacy that cetirizine is a chewable tablet</p> <p>Education provided to father about croup (what it is, signs/symptoms to look for, how to manage at home, signs/symptoms of respiratory distress) education provided about ear infection and how to take antibiotics at home</p> <p>Put oxygen on patient due to low oxygen saturation. Start at 0.5 L</p> <p>Call respiratory for breathing treatment. Stress importance of treatment and communication respiratory status.</p> <p>Educate father on plan of care and what is happening with patient while waiting on breathing treatment</p> <p>Medication administration after breathing treatment</p> <p>Call healthcare provider. Give update on symptoms/respiratory distress episode. Receive an order for dexamethasone. Had healthcare provider read back order to students.</p> <p>Education provided to father about steroid.</p>

	Medication administration: acetaminophen, dexamethasone.
<p><b>REFLECTING: (6) *</b></p> <ul style="list-style-type: none"> <li>• Evaluation/Self-Analysis: E      A      D      B</li> <li>• Commitment to Improvement: E      A      D      B</li> </ul>	<p>Team discussion of scenario and recognition of teamwork and communication throughout simulation. Discussion of medication orders and how team identified the doses were wrong. Students stated they were nervous addressing orders but knew they needed to address them because patient safety comes first. Team provided great education to father about croup and what to watch for at home. Emotional intelligence questions asked in relation to how students would feel if that was their child and how they felt during the respiratory distress part of the scenario. During debriefing, skyscape resource checked for acetaminophen safe dose range. Student had 10-20 mg/kg as safe dose range but did not have a route associated with it. Order in the chart was appropriate for this dose range, so they did administer it. Instructed that they need to double check route for future simulations and the PO safe dose range is listed as 10-15 mg/kg.</p>
<p><b>SUMMARY COMMENTS: * = Course Objectives</b></p> <p><b>Satisfactory completion of the simulation scenario is a score of “Developing” or higher in all areas of the rubric.</b></p> <p><b>E= Exemplary</b>  <b>A= Accomplished</b>  <b>D= Developing</b>  <b>B= Beginning</b></p> <p><b>Scenario Objectives:</b></p> <ol style="list-style-type: none"> <li>1. Select physical assessment priorities based on individual patient needs. (1, 2)*</li> <li>2. Review appropriateness of prescribed medications for prevention of errors and administer medications utilizing the concepts of growth and development. (1,2,5)*</li> </ol>	<p><b>You are Satisfactory for this scenario! RH</b></p> <p>Lasater Clinical Judgement Rubric Comments:</p> <p>Noticing: Regularly observes and monitors a variety of data, including both subjective and objective; most useful information is noticed; may miss the most subtle signs. Recognizes most obvious patterns and deviations in data and uses these to continually assess. Actively seeks subjective information about the patient’s situation from the patient and family to support planning interventions; occasionally does not pursue important leads.</p> <p>Interpreting: Generally focuses on the most important data and seeks further relevant information but also may try to attend to less pertinent data. In most situations, interprets the patient’s data patterns and compares with known patterns to develop an intervention plan and accompanying rationale; the exceptions are rare or in complicated cases where it is appropriate to seek the guidance of a specialist or a more experienced nurse.</p> <p>Responding: Generally displays leadership and confidence and is able to control or calm most situations; may show stress in particularly difficult or complex situations. Generally communicates well; explains carefully to patients; gives clear directions to team; could be more effective in establishing rapport. Develops interventions on the basis of relevant patient data; monitors progress regularly but does not expect to have to change treatments. Displays proficiency in the use of most nursing skills; could improve speed or accuracy.</p>

<p>3. Implement appropriate nursing interventions upon completion of nursing assessment. (1, 2, 5)*</p> <p>4. Utilize the concepts of growth and development to provide therapeutic communication with the toddler and their family. (3, 5)*</p>	<p>Reflecting: Evaluates and analyzes personal clinical performance with minimal prompting primarily about major events or decisions; key decision points are identified, and alternatives are considered. Demonstrates a desire to improve nursing performance; reflects on and evaluates experiences; identifies strengths and weaknesses; could be more systematic in evaluating weaknesses.</p>

**EVALUATION OF CLINICAL PERFORMANCE TOOL**  
**Maternal Child Nursing – 2025**  
**Firelands Regional Medical Center School of Nursing**  
**Sandusky, Ohio**

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
