

## Medical Surgical Nursing 2026

### Erie County Senior Center Activity Proposal

**Directions:** Please answer the following questions, typing your response in the space provided. This document is due in the dropbox labeled ECSC Activity Proposal by **Friday 1/16/2026** by 1500.

**1. Please list names of each person in the clinical group.**

Katelyn Swingle and Rylee Bollenbacher

**2. What activity will you be leading while at the Erie County Senior Center? Give a detailed outline of your activity, and explain how you plan on running your activity?**

For our activity that we'll be leading while at the Erie County Senior Center, we'll be knocking down solo cups with light bean bags. Clients will have to stand by one end of the table and slide the beanbag to hit one of the solo cups on the other side of the table. We'll change up the layout of the solo cups once all the clients have taken their turn. Every time they knock down a cup they'll have the choice to pick out a piece of candy.

**3. How will this activity benefit the clients**

This activity will benefit the clients by working on their hand-eye coordination and it'll help them focus.

**4. Describe the anticipated level of participation, any declines in functional ability and what you plan to adapt to these needs.**

How we could describe the anticipated level of participation is they'll be engaged with the game. It'll help them socialize with one another and they'll have a great time cheering each other on. When it comes to clients having declines in functional abilities we'll move the solo cups closer to the client or we'll decrease in the amount of solo cups we have on the table to have it less challenging or maybe even both.
