

INFECTION CONTROL “QUALITY” SCAVENGER HUNT

Assignment: The student will independently participate in a quality assurance review of charts by monitoring for appropriateness and compliance of precautions for all patients who are currently in isolation. This will be completed during the Infection Control clinical. Each student will use the electronic scavenger hunt form found in the Edvance360 Clinical Resources tab to type their findings from the clinical experience and submit it to the Infection Control Signature Form and Scavenger Hunt dropbox located in Edvance360 by Saturday at 2200 following your clinical experience. Handwritten forms will not be accepted for credit. The faculty will review for completion and forward to the Firelands Infection Preventionist, Sydney Cmar, RN, MPH.

Instructions: Under the direction of Sydney Cmar, you will go to various inpatient units and complete this assignment. You will make rounds on the nursing unit to determine which patients are in isolation precautions (all patients in isolation will be assessed). Utilizing the patient chart in Meditech, you will then review and record the information included on the checklist. Sydney Cmar will review this process with you during your Infection Control clinical.
