Firelands Regional Medical Center School of Nursing
Nursing Foundations 2018
Skills Lab Competency Tool

Comments:

Week 2 (Hand Hygiene; Vital Signs; PPE): During lab this week you were able to satisfactorily demonstrate:

- Proper application and removal of personal protective equipment.
- Appropriate hand hygiene utilizing hand sanitizer and soap/water with two attempts.
- Beginner skills level during guided practice with measurement of temperature (oral, axillary, & rectal), radial & brachial pulses, respirations, and oxygen saturation. Vital signs skills will be observed 1:1 with faculty during Week 3. AR

Week 3 (Vital Signs): You were satisfactory in the skills lab this week related to vital signs. Great job!

You accurately demonstrated oral temperature, radial pulse, respiratory rate, pulse oximetry, and BP measurement (BP #1- reading- 138/76, setting- 132/76; BP #2- reading- 108/62, setting 110/60) during the 1:1 observation in the lab. You accurately described axillary and rectal

temperature measurements, along with orthostatic vital sign measurement. One prompt was required as a reminder to obtain the pulse along with BP for the orthostatic VS. You worked very hard and sought out assistance and feedback as you practiced obtaining blood pressures. Meditech documentation related to vital signs was completed. Keep up the great work on the role playing and communication with your “patient”. AR

Week 4 (Assessment):

Week 5 (Assessment; Mobility):

Week 6 (Personal Hygiene Skills):

Week 7 (NG Skills: Insertion, Irrigation, and Removal; Mobility; Sterile Gloves):

Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves):

Week 9 (Dressing Change: Dry Sterile, Sterile Wet to Dry; Documentation Lab):

Week 10 (Safety; Infection Control; Prioritization; Tube Feeding; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP; Care Plan Development):

Week 11 (Case Scenarios; Care Plan Development; Medication Lab; Open Lab):

Week 12 (Respiratory Equipment; SAM II; Care Plan Development):
