Faculty	Kelly Ammanniti	Michelle Bussard	Carmen Patterson	Elizabeth Woodyard	Amy Rockwell
Initials	KA	MB	CP	EW	AR

Comments:

Week 5 (Meditech/BMV):

Week 6 (Wound Care):

Week 9 (NG Insertion/Care): You did a great job in the lab this week and were satisfactory with the following skills:

Nasogastric Tube Insertion, Irrigation, and Removal. You did require one prompt during insertion as a reminder to complete a GI Assessment prior to inserting the NG tube. During insertion you were able to remind yourself to apply skin prep to the nose prior to beginning the insertion and to check the position of the tube in the back of the throat with a penlight. As a reminder when you are working with the NG tube, always clamp the NG over on itself before disconnecting to prevent gastric contents from spilling onto your hands, the patient, or the bed. You were able to

verbalize what you would do if the patient began to cough or choke during insertion, that you would verify tube placement by aspiration and confirming the cm marking, the difference between irrigation and flushing, and the different techniques for verifying tube placement. The communication throughout the observation was excellent. You also completed the assigned documentation in Meditech. Keep up the great work in the lab! AR

Week 10 (Foley Insertion/Care): You did a great job in the lab this week and were satisfactory with the following skills: Application of Sterile Gloves, Foley Catheter Insertion (female), and Foley Catheter Removal. One prompt was given during insertion related to maintaining sterility of your gloves following placement (you grabbed the edge of the glove packaging which contaminated them). Two prompts were needed during removal related to holding the catheter at the labia while the balloon drains per gravity and washing/drying the perineal area following removal. As you place the StatLock remember to insert the catheter and measure on the leg prior to cleaning the skin and applying skin prep. You had very good communication and were thorough throughout the observation. Great job! You correctly verbalized the differences in catheter insertion for a male patient. You independently completed Meditech documentation for Urinary Catheter Management and I & O. Keep up the great work!!! AR

Week 11 (Comprehensive Assessment): You satisfactorily performed VS and Physical assessment skills. You were given 2 prompts: safety and more thorough pain assessment. You were very thorough and communicated each step very well. Nice work! NS/CP

Week 12 (Documentation):

Week 14 (Simulation):

REFLECTING: • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D B	
SUMMARY COMMENTS: Beginning to Developing in all areas is required for Satisfactory completion of this simulation lab.	

E = exemplary, A = accomplished, D = developing, B = Beginning
Based off of Lasater's Clinical Judgment Rubric
