Comments:

Week 5 (Meditech/BMV):

Week 6 (Wound Care):

Week 9 (NG Insertion/Care): Nice job performing NG insertion, irrigation, and removal. You showed confidence in skill performance and included all necessary components of each skill. You also successfully completed the assigned documentation in Meditech. CP

Week 10 (Foley Insertion/Care): You did a great job in the lab this week and were satisfactory with the following skills: Application of Sterile Gloves, Foley Catheter Insertion (female), and Foley Catheter Removal. No prompts were needed! During insertion you were able to remind yourself to label the drainage bag or tubing with the orange label, and during removal you reminded yourself to empty the drainage bag and tubing prior to removal. You maintained the sterile field throughout the Foley insertion, did not contaminate the catheter or your gloves at any point, had

very good communication, and were thorough throughout the observation. Great job! As a reminder always verify the patients name and date of birth with the name band. You correctly verbalized the differences in catheter insertion for a male patient. You independently completed Meditech documentation for Urinary Catheter Management and I & O. Keep up the great work!!! AR

Week 11 (Comprehensive Assessment): You satisfactorily performed VS and Physical assessment skills. You were given a prompts: safety. You reminded yourself to adjust the position of the bed. You used a strong systematic approach and you were very confident in performing your skills. Nice work! CP

Week 12 (Documentation):

Week 14 (Simulation):
