Comments:

Week 5 (Meditech/BMV): You satisfactorily completed the Meditech/BMV lab and have satisfied the requirements for this lab. CP

Week 6 (Wound Care): You satisfactorily performed a wet to dry and dry sterile dressing change and have satisfied the requirements for this lab. CP

Week 9 (NG Insertion/Care): You did a great job in the lab this week and were satisfactory with the following skills: Nasogastric Tube Insertion, Irrigation, and Removal. No prompts were needed! During insertion you were able to remind yourself to apply skin prep to the nose prior to beginning, check the position of the tube in the back of the throat with a penlight, and to secure the tube by placing tape over the nose and pinning to the gown. When working with an NG tube be sure to clamp it over on itself prior to disconnecting in order to prevent gastric contents from

running onto the patient, your hands, or the bed. When verifying patient identity always ask for name and date of birth and view the name band as they state these things. You were able to verbalize what you would do if the patient began to cough or choke during insertion, that you would verify tube placement by aspiration and confirming the cm marking, the difference between irrigation and flushing, and the different techniques for verifying tube placement. Your communication throughout the observation was excellent. You completed the assigned documentation in Meditech. Keep up the great work in the lab! AR

Week 10 (Foley Insertion/Care): You did a great job in the lab this week and were satisfactory with the following skills: Application of Sterile Gloves, Foley Catheter Insertion (female), and Foley Catheter Removal. One prompt was needed during insertion as a reminder to label the bag and/or tubing with orange label. You maintained the sterile field throughout the Foley insertion, did not contaminate the catheter or your gloves at any point, had very good communication, and were thorough throughout the observation. Great job! As a reminder always verify the patients name and date of birth with the name band. You correctly verbalized the differences in catheter insertion for a male patient. You independently completed Meditech documentation for Urinary Catheter Management and I & O. Keep up the great work!!! AR

Week 11 (Comprehensive Assessment): You satisfactorily performed VS and Physical assessment skills. You were given two prompts: assessment of last bowel movement and palpating the dorsalis pedis and posterior tibial pulses. You were able to go back and ask about numbness/tingling on your own. You communicated well with the patient. In the future, slow down a little. NS/CP

Week 12 (Documentation): You satisfactorily completed the Documentation lab and satisfied the requirements for this lab. CP

Week 14 (Simulation): You have satisfactorily completed the simulation lab. Taylor you have a wealth of knowledge, don't be afraid to share this. Show more confidence in your skills and abilities. Be assertive in sharing your perception and interpretation of data with your team. You did a nice job in debriefing sharing what you felt went well and recognizing the strengths of other members of the team. Remember to acknowledge your own strengths as well. Based on what you shared during debriefing, you were very aware of what was going on with the patient and you were able to interpret the data appropriately based on what you noticed. Nice work! Please see comments in graded rubric below. CP

Lasater Clinical Judgment Rubric Scoring Sheet

STUDENT NAME: **Taylor Ingersoll** GROUP: **4** OBSERVATION DATE/TIME: **11/20/2018 (0800-1200)** SCENARIO: **Fluid & Electrolyte Imbalance**

CLINICAL JUDGMENT	OBSERVATION NOTES
<p>COMPONENTS NOTICING: (3, 5*)</p> <ul style="list-style-type: none"> • Focused Observation: E A D B • Recognizing Deviations from Expected Patterns: E A D B • Information Seeking: E A D B 	<p>You noticed the patient had nausea and diarrhea.</p> <p>Remember to review chart for additional information which may assist in caring for the patient.</p>
<p>INTERPRETING: (1, 5*)</p> <ul style="list-style-type: none"> • Prioritizing Data: E A D B • Making Sense of Data: E A D B 	<p>You were able to interpret the data given in report, data retrieved from patient chart, and assessment findings to determine the patient was exhibiting signs and symptoms of dehydration and needed fluid replacement.</p>
<p>RESPONDING: (7, 5*)</p> <ul style="list-style-type: none"> • Calm, Confident Manner: E A D B • Clear Communication: E A D B • Well-Planned Intervention/ Flexibility: E A D B • Being Skillful: E A D B 	<p>You responded to the patient's needs by contacting the physician. You communicated patient findings in a clear, organized manner.</p>

<p>REFLECTING: (7, 5*)</p> <ul style="list-style-type: none"> • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D <p style="padding-left: 40px;">B</p>	<p>You were able to recognize your areas of strength. You were also able to recognize some of your areas for improvement and provided examples for what you could have done better.</p> <p>You shared that you should assume roles in your areas of strength however you also recognized the need to step out of your comfort zone and work on areas where improvement is needed. Great job!</p>
<p>SUMMARY COMMENTS:</p> <p>Satisfactory is developing or higher in all competencies.</p>	<p>Your assessment was very thorough and organized. Nice work! It is okay to assist members of the team however remember to carry out your role on the team.</p> <p>Great job communicating with the physician and the patient!</p>

E = exemplary, A = accomplished, D = developing, B = Beginning
