***Course Objectives**

Comments:

Week 2 (Hand Hygiene; Vital Signs; PPE): During lab this week you were able to satisfactorily demonstrate:

- Proper application and removal of personal protective equipment.
- Appropriate hand hygiene utilizing hand sanitizer and soap/water.
- Appropriate level of skill during guided practice with measurement of temperature (oral, axillary, & rectal), radial pulse, respirations, and pulse oximetry. Vital signs skills will be observed 1:1 with faculty during Week 3. Keep up the good work! AR

Week 3 (Vital Signs): You satisfactorily completed the vital signs lab this week. You were able to take vital signs and report to me about them. You did require a prompt for the manual blood pressure so I would recommend practicing either in the skills lab or with friends/family. Let me

know if you would like some additional support to improve this skill. You also satisfactorily communicated to me about orthostatic blood pressures and the differences in temperature locations (oral, axillary and rectal). Keep up the good work! DC

Week 4 (Assessment): Satisfactory with head to toe assessment guided practice, hand-off report activity, and Micromedex online activity. You will be observed 1:1 for Head to Toe Assessment competency during Week 5. AR

Week 5 (Assessment; Mobility): Great job in lab this week! You have satisfactorily demonstrated a basic head to toe assessment in the skills lab. Your approach was systematic and thorough. You did require 2 prompts related to assessing the sensation of extremities (presence of numbness, tingling, burning, etc.) and assessing the patient's urine color and appearance. You demonstrated friendly, professional, and informative communication. You were able to correctly identify the lung sounds as crackles. Great job! As a reminder, when you are asking the patient's identity always verify by comparing with the name band.

Feedback on documentation this week: With this being the first time that you fully documented these interventions, there are some minor areas for improvement. Overall you did a great job! Please take some time to pull your documentation back up and review the following details for improvement.

- Vital Signs- documentation is accurate and complete.
- Assessment- documentation was incomplete for the left ear, and the respiratory assessment regarding the posterior lower lobe. You had documentation under "heart rhythm" which should have been left blank. You omitted charting for the duration of nausea and vomiting.
- Safety- documentation is accurate and complete.
- Pain- you omitted the "physician notification and orders received" section from your documentation.

Mobility- You are satisfactory by actively participating in the mobility lab. BS

Week 6 (Personal Hygiene Skills):

Week 7 (NG Skills: Insertion, Irrigation, and Removal):

Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves; Documentation Lab):

Week 9 (Dressing Change: Dry Sterile, Sterile Wet to Dry):

Week 10 (Safety; Infection Control; Prioritization; Tube Feeding; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP; Care Plan Development):

Week 11 (Case Scenario; Care Plan Development; Medication Lab; Open Lab):
