Comments:

Week 5 (Meditech/BMV):

Week 6 (Wound Care):): Great job in the lab this week! You were satisfactory with placement of sterile gloves and during 1:1 observation of the wet to dry sterile dressing change. You maintained asepsis throughout the procedure and effectively communicated with your “patient”. You were given two prompts as a reminder to assess all parts of the wound prior to cleansing with normal saline, and for the proper order of assessment, cleansing, culture, and drying. For the future be careful when you are packing a wound so that you don’t allow the packing material to dangle on the skin. I suggest reviewing the procedure frequently to become more comfortable with the steps. Wound care documentation on Meditech Expanse was completed. Keep up the great work! AR

Week 9 (NG Insertion/Care): Tara, you were satisfactory in performing NG insertion, irrigation, and removal. You did a great job explaining the procedure to the patient! You kept the patient informed throughout the entire procedure and assessed the patient's level of comfort throughout the procedure, nice work! You were given 1 prompt as a reminder to document after performing the procedure. Overall, nice job! Keep up the great work! CP

Week 10 (Foley Insertion/Care):

Week 11 (Comprehensive Assessment):

Week 12 (Documentation):

Week 14 (Simulation):
