Phase 1

Poster Title: Prescription Opioid Misuse

Reference: Chang, Y.-P. (2017). Factors associated with prescription opioid misuse in adults aged 50 or older. *Nursing Outlook*, 66(2), 112-120. DOI: <https://doi.org/10.1016/j.outlook.2017.10.007>.

Question: What age group is at highest risk for developing prescription opioid misuse?

- A. 13-17 years of age.
- B. 18-24 years of age.
- C. 25-44 years of age.
- D. 50 and older.

2/20/2020 Feedback

You are all set with your poster title and question. Please note the revisions made to your reference above. You will need to utilize the corrected version for all remaining phases of this project. Don't forget to submit the full article with the answer highlighted in yellow. We look forward to reviewing your phase II summary; deadline is Monday, 2/24/2020.
