***Course Objectives**

Comments:

Week 2 (Hand Hygiene; Vital Signs; PPE): During lab this week you were able to satisfactorily demonstrate:

- Appropriate hand hygiene utilizing hand sanitizer and soap/water.
- Accurate verbalization of procedure for donning & doffing PPE.
- Appropriate level of skill during guided practice with measurement of radial and brachial pulses, along with manual and doppler blood pressure. Vital signs skills will be observed 1:1 with faculty during Week 3. Keep up the good work! BS

Week 3 (Vital Signs):

Overall you did a great job in the lab this week! You satisfactorily completed the vital sign check off during 1:1 observation, including oral temperature, radial pulse, respiratory rate, pulse oximetry, and blood pressure measurement. During the blood pressure measurement you accurately obtained two out of three blood pressure results on the Vital Sim manikin. During assessment of the radial pulse you stated the heart rate was “32”, however did not recognize this as an abnormal finding. Upon discussion I pointed out this abnormality and it was discovered you did not multiply the “32” by “2” to obtain the heart rate/minute , therefore this counted as one prompt. You were able to verbally discuss the following measurements: axillary and rectal temperature. You were not able to verbalize the procedure for orthostatic blood pressure measurement therefore you did receive an overall unsatisfactory during the first observation. One further prompt was needed related to identification of the patient by name and date of birth prior to beginning any care. During your first remediation attempt you were able to accurately state the orthostatic blood pressure procedure resulting in a satisfactory evaluation. For the future I suggest reviewing the orthostatic BP procedure frequently. Keep up the overall great work!! AR

Week 4 (Assessment): Satisfactory with head to toe assessment guided practice, hand-off report activity, and Micromedex/Intranet navigation activity. You will be observed 1:1 for Head to Toe Assessment competency during Week 5. LM

Week 5 (Assessment; Mobility):

Week 6 (Personal Hygiene Skills):

Week 7 (NG Skills: Insertion, Irrigation, and Removal):

Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves; Documentation Lab):

Week 9 (Dressing Change: Dry Sterile, Sterile Wet to Dry):

Week 10 (Safety; Infection Control; Prioritization; Tube Feeding; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP; Care Plan Development):

Week 11 (Case Scenario; Care Plan Development; Medication Lab; Open Lab):

6/10/2020
