***Course Objectives**

Comments:

Week 2 (Hand Hygiene; Vital Signs; PPE): During lab this week you were able to satisfactorily demonstrate:

- Appropriate hand hygiene utilizing hand sanitizer and soap/water.
- Accurate verbalization of procedure for donning & doffing PPE.
- Appropriate level of skill during guided practice with measurement of radial and brachial pulses, along with manual and doppler blood pressure. Vital signs skills will be observed 1:1 with faculty during Week 3. Keep up the good work! BS

Week 3 (Vital Signs):

Cassie, great job in the lab this week! You satisfactorily completed the vital sign check off during 1:1 observation, including oral temperature, radial pulse, respiratory rate, pulse oximetry, and blood pressure measurement. During the blood pressure measurement, you accurately obtained

two out of two blood pressure results on the Vital Sim manikin. You were able to verbally discuss the following measurements: axillary and rectal temperature along with orthostatic blood pressure. You did not require any prompts throughout your checkoff! Your Meditech documentation related to vital signs was accurate. Keep up the great work!! LM

Week 4 (Assessment): Satisfactory with head to toe assessment guided practice, hand-off report activity, and Micromedex/Intranet navigation activity. You will be observed 1:1 for Head to Toe Assessment competency during Week 5. LM

Week 5 (Assessment; Mobility):

Cassie, great job in lab this week! You have satisfactorily demonstrated a basic head to toe assessment in the skills lab. Your approach was systematic, thorough, and overall well done. You did require 1 prompt related to orienting the patient to place and time. You demonstrated friendly, professional, and informative communication. You were able to correctly identify the lung sounds as coarse crackles. Great job! LM

Feedback on documentation this week: With this being the first time that you fully documented these interventions, there are some minor areas for improvement. Overall you did a great job! Please take some time to pull your documentation back up and review the following details for improvement. LM

- Vital Signs- remember to mark vital signs on the worklist, not vital signs “monitored”.
- Pain- your documentation was accurate and complete.
- Safety- your documentation was accurate and complete.
- Assessment- documentation under HEENT assessment for Lt. ear should only have been marked “none” for ear discharge. Rt. Ear should have been marked moderate hearing loss.

Mobility- You are satisfactory by actively participating in the mobility lab. LM

Week 6 (Personal Hygiene Skills):

Satisfactory with personal hygiene, making an occupied bed, shaving, oral care, hearing aide care, application of ace wraps, TED Hose, and SCD's, and clinical readiness scenario during guided practice, along with Meditech Expanse Test Hospital documentation. Keep up the good work! AR

Week 7 (NG Skills: Insertion, Irrigation, and Removal):

Great job this week in lab demonstrating competence for Nasogastric Tube Insertion, Irrigation, and Removal through guided observation. You were able to verbalize understanding of the difference between irrigation and flushing, aspiration precautions, and familiarized yourself with the wall suction set up. Additionally, you participated in the PO intake station for accurate calculation of carbohydrate intake, accurately measured

gastric output through the NG tube, practiced assisting a visually impaired patient with their meal, and completed the assigned documentation in Meditech accurately. Keep up the hard work! AR

Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves; Documentation Lab):

You did a great job in the lab this week and were satisfactory with the following skills: Application of Sterile Gloves, Foley Catheter Insertion (female), and Foley Catheter Removal. No prompts were needed! One area to focus on in the future is to be careful when placing a used item into the trash bag so you don't contaminate your glove. You were very thorough and had excellent communication throughout the observation. Great job! You correctly verbalized the differences in catheter insertion for a male patient. You independently completed the Oral intake and output station, Output station, and Meditech documentation for Urinary Catheter Management and I & O. Keep up the great work!!! AR

You have satisfactorily completed the documentation lab by actively participating in Meditech documentation related to vital signs, physical re-assessment, safety and falls, pain assessment, patient rounds, TED hose/SCD/Ace wrap, feeding method, Intake and Output, urinary catheter management, and writing a nurse note. You utilized your time wisely, asked appropriate questions, and gained experience with each intervention listed. Great job! NS/DC

Week 9 (Dressing Change: Dry Sterile, Sterile Wet to Dry): You have satisfactorily demonstrated competency in the skill of wound assessment and care (Dry Sterile Dressing & Sterile Wet to Dry Dressing), and completed Meditech documentation related to wound care. Nice job! LM

Week 10 (Safety; Infection Control; Prioritization; Tube Feeding; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP; Care Plan Development): Satisfactory participation with the following stations: Prioritization, Tube Feeding, Patient Weight, Restraints, Doppler BP, Meditech documentation, and Patient Scenario involving Safety, Infection Control, Pressure ulcer prevention, and Care Plan Development. Keep up the hard work! BL

Week 11 (Case Scenario; Care Plan Development; Medication Lab; Open Lab):

6/10/2020
