ATTN: The Honorable Gary Click
Ohio House Representative District 88

Dear Representative Click,

As one of your constituents, as well as a mother and future Registered Nurse, my focus has always been on providing care for others. I am writing you in regards to bill H.R.253, as it has personal meaning to myself and my family. My youngest sister was born with Dandy-Walker Syndrome in 2000. My mother has been her sole caretaker since birth. When she aged out of the developmental school programs, there has not been many other resources for her to socialize outside of a few therapies she receives at home. Allowing for expansion to the already existing adult day care services provided in the state, for individuals like my sister who suffer from neurological conditions would not only offer more fulfilling life experiences for my sister, who still deserves interactions with peers her own age, but would also provide respite to my mother, who knows no personal time to herself. I know there are many other families throughout the state of Ohio who would benefit from such a change.

Thank you for your consideration in this matter.

Sincerely,

Alyssa Riehl
