

Firelands Regional Medical Center School of Nursing

Care Map Grading Rubric

Course Objective: Utilize steps of the nursing process including clinical judgment in the formulation of an evidence-based, patient-centered plan of care. (1,2,3,4,5)*		Student Name: Tamica Ivey			
		Date: 9/17/2021			
Top Nursing Priority:					
		3 Points >75% Complete	2 Points 50-75% Complete	1 Point <50% Complete	Comments
Noticing	Identify all abnormal assessment findings	3	-	-	Excellent job identifying all abnormal assessment findings.
	Identify all abnormal lab finds/diagnostic tests	3	-	-	All abnormal lab findings/diagnostic tests identified. Great job!
	Identify all risk factors	3	-	-	All appropriate risk factors associated with patient identified.
	Highlight all related/relevant data in the noticing boxes	3	-	-	Excellent job clustering all the relevant data together.
Interpreting	List all nursing priorities	3	-	-	Great job listing all the appropriate nursing priorities for the patient.
	Highlight the top nursing priority	3	-	-	Nice job identifying your top nursing priority as imbalanced nutrition: less than body requirements. While this is an appropriate priority for the patient, based on all your assessment data, you would want to consider choosing impaired skin integrity as your highest priority. You have more data to support the problem, and as the nurse, we would want to address the patient's wounds and pain before we turn our focus to nutrition.
	Identify all potential complications	3	-	-	Excellent job identifying potential complications for the patient.
	Highlight potential complications relevant to top nursing priority	-	-	1	Since you have identified imbalanced nutrition: less than body requirements as your nursing priority, you would want to highlight dehydration, hypoproteinemia, and electrolyte imbalances also.
	Identify signs and symptoms to monitor for each complication	-	-	-	Unfortunately, you did not include any signs or symptoms for each complication that you listed.
Responding	List all nursing interventions relevant to top nursing priority	3	-	-	Great job! Greater than 75% of nursing interventions relevant to your top nursing priority included. You would also want to include an intervention related to educating the patient about their diet and appropriate PO intake, as well as a skin assessment to assess the patient's hydration (skin turgor).
	Interventions are prioritized	3	-	-	Nice job.
	All interventions include a frequency	3	-	-	All interventions include a frequency.
	All interventions are individualized and realistic	3	-	-	Great job!
	An appropriate rationale is included for	3	-	-	Great job with your rationales.

	each intervention				
Reflecting	List the reassessment findings for the top nursing priority	3	-	-	Excellent job!
	Reflection includes one of the following statements: <ul style="list-style-type: none"> Continue plan of care Modify plan of care Terminate plan of care 	3	-	-	Excellent job. Keep in mind you would only want to terminate the plan of care if the patient improved.
48-33 points = Satisfactory 32-17 points = Needs Improvement ≤ 16 points = Unsatisfactory		Total Points Earned: 43/48=89.58% Comments: Excellent job! Satisfactory Nursing Care Map. Faculty Initials: BL
