245D.09 STAFFING STANDARDS

Subd. 4a. **Orientation to individual service recipient needs.**

(e) The staff person must review and receive instruction on the safe and correct operation of medical equipment used by the person to sustain life or to monitor a medical condition that could become life-threatening without proper use of the medical equipment, including but not limited to ventilators, feeding tubes, or endotracheal tubes. The training must be provided by a licensed health care professional or a manufacturer's representative and incorporate an observed skill assessment to ensure staff demonstrate the ability to safely and correctly operate the equipment according to the treatment orders and the manufacturer's instructions.
