

The HighScope climate for learning

I am on the Supportive role on the continuum because I agree with the philosophy of the High Scope Program. I believe that teachers should be partners with children and give them the appropriate support they need to grow and develop. I value their active learning and giving them opportunities to participate in sharing control. I plan to continue to provide an environment where children participate in active learning, shared control, and where they can partner with teachers. To scaffold their learning and to provide materials and a learning environment where that can flourish.
