

Dominique Alvarez

Where am I on the continuum?

1. I feel like I am supportive; I try my best to allow the children to make choices and be involved in our small groups. I value their thoughts and follow where they lead during their play.
2. I think one way I could be even more supportive might be to allow the children to tell me their interests and ideas that they would like to explore during our small group time and actually plan some activities around their responses.
