

2nd Try It Out/Addressing Gaps in Data

Language, Literacy, and Communication

COR Advantage Item/Q - Book Enjoyment & Knowledge

Ideas to fill up the gap:

#1 Idea: Plan to look for the missing item.

After reading the item, including the levels, I decided to collect anecdotes during Literacy Time; in which children can talk about the characters or situations about the story; and explain why they like a particular book.

#2 Idea: Add Item-Related Material.

After noticing that I was missing several anecdotes in Item Q, I decided to look at the books in the different areas. I perceived that I had old books, wrinkled and with missing pages. Then I decided to place new books in the different areas: house, toy, block, discovery, writing, and book areas; that way giving the opportunity for students to discover new characters; and have conversations about why they like a particular book.
