

Supportive Partnership Climate:

Thanks to High Scope and Consious Discipline, I believe that I am at Supportive Partnership Climate. I value students' active learning and give them many opportunities to make choices, be leaders and encourage them to problem solve by using higher order thinking questions. I always join in their play and scaffold as needed.

I would like to continue to learn way to be more supportive to improve my skills. This class has already given me many ideas to apply in my classroom.
