

SERVICER REQUESTS PRIOR TO APPOINTMENT

NAL Group agents will field a variety of inbound phone calls or emails from servicers. Some you will process, and others you will redirect to the appropriate department.

Servicer Calling to Accept an Order

 2. Reassign the job to the service company
 3. Schedule the job to the new service company for the pre-scheduled date and time

Servicer Calling to Update SKUs on Order Prior to Appointment

Our servicers will review their work orders before rolling on those jobs. If there is an issue or if the customer brings something up during the servicer's pre-call, the servicer may call to have the order corrected.

Standard Missing SKU Process

- Review SOW to confirm needed servicers are not included in the purchased services
- Confirm with the caller which SKU is missing from the order and use the Master Client SKU List to find the SKU if needed.
- Advise the caller that you will have to call the store to verify that it is missing from the order.
- Ask to put the caller on hold while you call the store, DoD, or IST.
- Call the store and speak with a store agent regarding the missing SKU.
- Is the SKU missing from the order?
 - Yes:
 - Inform the caller that the store approved the addition of the missing SKU.
 - Add the SKU to the order as "**Client Pays.**"
 - Confirm the servicer can perform the services as scheduled
 - No
 - Follow the client specific upsell process
 - Advise customer/servicer if the order is not being performed as scheduled
- Notate all calls in DOLI.

The below clients use a client specific Missing SKU process. Refer to the WF for these processes:

BBY Make It Right

It is a Best Buy requirement that the servicer be onsite in order for NALG to add additional services to the customer's order.

- If the servicer requests RC add services prior to the servicer rolling on the job, we should advise the servicer to call us back from onsite.
- If the servicer is unable to roll on the job with the services sent to us by Best Buy, RC will confirm the scope of work with the customer/client.
- If the order is correct
 - RC will advise the servicer that services will not be added at this time and that the servicer should roll on the job.
 - If the servicer refuses to roll on the job as is, we should treat the order like a rejected job.
- If the order is not correct
 - The customer will be referred to Best Buy to correct the order. In these cases, we will not roll on the job until the customer and client have resolved the issue.
 - We will update the order to "Waiting Client Action – Problem with Order" status until the issue is resolved.

Update Pickup Location

There are times where our service may be assigned to an order, but the pickup location is very out of the way for the servicer. If the servicer requests that we change the pickup location, it is necessary to arraign this change with the client.

1. Confirm the pick-up location on the order with the servicer by clicking the blue client link in DOLI and verbally reviewing the location's address with the servicer.
2. Call the client to ask if the pick-up location can be changed to the requested location.
3. If the location can be changed,
 - a. Confirm when the product would be available at the new location.
 - b. Note the new pick-up location in the Additional Instructions, and if possible, update the pickup location in the client info screen.
4. If the location cannot be changed, ask if the servicer is still able to complete the job.
 - a. **No:** We will need to put the order into "Prescheduled - rejected" status and start the servicer needed process.
 - b. **Yes:** Leave the order scheduled as is.
5. Notate DOLI accordingly

Note: We cannot change the pickup location for Sam's Club orders.
