

Habit for Humanity is a non-profit organization that helps serve Cole's County underserved population through helping build homes, establishing community security, financial stability, and education, disaster preparedness programs, etc. That is why I most enjoyed my time with this legacy project because I participated in sorting affordable household items such as kitchen items, decorations, office supplies, etc. As volunteering with this organization gave me a sense of being a valuable resource through my participation. My group committed their time and effort in serving the Restore buildings and its employees as they genuinely thanked us for our help. Lastly, I hope to see the growth of Habit for Humanity Restore location across other counties near Charleston, IL as its duties are an invaluable resource to help further develop the community.
