Physical Layout: this unit is placed like a big circle with the nurses station in the middle.

Lighting, color, décor: lighting is not very bright in the halls, color is tan, the decor is bright nature pictures.

Pace, activity level: kids play cards, games, and watch TV.

Emotional atmosphere: nurses try to keep it quiet and calm but teens are not very quiet

Factors that are contributing to the emotional atmosphere: teens w/ mental health issues is the biggest contributing factor.

Typical clients who use this service:

Age: (average and range) ages 12-18

Gender: both male + female Cultures: most are from around this area

Socioeconomic status: low Education level: middle school / high school

Reading ability: All can read as far as I know

Communication ability: able to communicate at the age they are

Reasons for using

this agency/service? pts needs help with their mental health

What could a nurse do to improve the milieu today on this unit? (Use extra pages if necessary)

they could not cuss at the pts, and be more therapeutic with the pts.

What needs are being focused on by the staff? (Physical, vocational, social, spiritual, emotional, etc.)

physical needs, and some emotional needs. I feel the nurses are burnt out on their job and need some vacation time to be able to take care of themselves before they can take care of these teens.
