

Lakeview School of Nursing
N405 Leadership and Management
Weekly Clinical Journal

Name: Lindsey Ball

Date: Fall 2020

Week 2 9/2

Journal of Observations:

This week I followed case management. We had to find out what home health services they had and if they were going to continue services or need more assistance. We also set up equipment and other assistance they may need when discharged.

What Leadership and Management skills were observed?

Leadership was performed when the case manager called the patients family to see what they thought their needs were. I had to prioritize what patients to see first. I also witness delegation when a nauseous patient wanted toast, the case manager communicated that to the CNA.

Week 3 Date: 9/9

Journal of Observations:

This week I want to discuss an event that happened to me in the parking lot of Ruler Foods. On my way to school, I found an elderly man on the ground by his car covered in blood from hitting his nose from a fall.

What Leadership and Management skills were observed?

When I found the man lying on the ground and covered in blood, I immediately went to the women next to me to stay with him while I ran to the school to get supplies (delegation). Then, after him insisting we do not call an ambulance, I asked who we could call, he was confused and could not tell me but he did know his address so I drove his car and drove him home with Becky following me to bring me back to school (management of the situation).

Week 4 Date: 9/16
