Physiological Adaptation	17	64.7%								▲				

Topics To Review Go to your Improve tab to access your Focused Review Experience

Management of Care (3 items)

Collaboration with Interdisciplinary Team (2 items)

Acute Neurological Disorders: Reportable Findings for a Client Who Has Meningitis ActiveLearningTemplate: System Disorder

Gastrointestinal Structural and Inflammatory Disorders: Identifying Interprofessional Care Needs ActiveLearningTemplate: Therapeutic Procedure

Informed Consent (1 item)

Legal Responsibilities: Obtaining Consent for a Married Adolescent ActiveLearningTemplate: Basic Concept

Safety and Infection Control (3 items)

Accident/Error/Injury Prevention (2 items)

Head Injury: Planning Care for an Infant Who Has an Epidural Hematoma ActiveLearningTemplate: System Disorder

Pediatric Emergencies: Planning Interventions for Lead Exposure ActiveLearningTemplate: System Disorder

Standard Precautions/Transmission-Based Precautions/Surgical Asepsis (1 item)

Infection Control: Nursing Action for an Infant Who Has Respiratory Syncytial Virus ActiveLearningTemplate: System Disorder

Health Promotion and Maintenance (3 items)

Developmental Stages and Transitions (1 item)

Topics To Review Go to your Improve tab to access your Focused Review Experience

Health Promotion of Preschoolers (3 to 6 Years): Developmental Milestones of a 4-Year-Old Child
ActiveLearningTemplate: Growth and Development

Health Screening (1 item)

Musculoskeletal Congenital Disorders: Scoliosis Assessment ActiveLearningTemplate: Diagnostic Procedure

Aging Process (1 item)

Hospitalization, Illness, and Play: Preschoolers' Understanding of Time ActiveLearningTemplate: Growth and Development

Psychosocial Integrity (1 item)

Abuse/Neglect (1 item)

Psychosocial Issues of Infants, Children, and Adolescents: Identifying Possible Indications of Physical Abuse
ActiveLearningTemplate: Basic Concept

Basic Care and Comfort (4 items)

Elimination (1 item)

Dermatitis and Acne: Teaching About Diaper Dermatitis ActiveLearningTemplate: Basic Concept

Nutrition and Oral Hydration (3 items)

Acute Infectious Gastrointestinal Disorders: Food Choices for a Toddler Who Has Diarrhea-Related Dehydration
ActiveLearningTemplate: System Disorder

Acute Infectious Gastrointestinal Disorders: Priority Finding for a Toddler Who Has Gastroenteritis
ActiveLearningTemplate: System Disorder

Gastrointestinal Disorders: Dietary Teaching for Celiac Disease ActiveLearningTemplate: System Disorder

Pharmacological and Parenteral Therapies (2 items)

Medication Administration (2 items)

Immunizations: Identifying Contraindications to Administering Immunizations ActiveLearningTemplate: Basic Concept

Mycobacterial, Fungal, and Parasitic Infections: Providing Teaching About Oral Nystatin ActiveLearningTemplate: Medication

Reduction of Risk Potential (2 items)

System Specific Assessments (1 item)

Oxygen and Inhalation Therapy: Identifying Patterns of Respiration ActiveLearningTemplate: Nursing Skill

Therapeutic Procedures (1 item)

Burns: Preparing a Preschooler for Hydrotherapy Treatment Following a Burn Injury ActiveLearningTemplate: Therapeutic Procedure

Physiological Adaptation (6 items)

Hemodynamics (1 item)

Cardiovascular Disorders: Planning Care for a Child Who Has Heart Failure ActiveLearningTemplate: System Disorder

Fluid and Electrolyte Imbalances (2 items)

Acute Infectious Gastrointestinal Disorders: Evaluating Laboratory Values Following Treatment for Dehydration
ActiveLearningTemplate: System Disorder

Pituitary Disorders: Indications of Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH)
ActiveLearningTemplate: System Disorder

Medical Emergencies (2 items)

Burns: Caring for a Toddler Who Has a Partial-Thickness Burn ActiveLearningTemplate: System Disorder

Pediatric Emergencies: Priority Finding to Report ActiveLearningTemplate: Basic Concept

Pathophysiology (1 item)

Chronic Neuromusculoskeletal Disorders: Expected Findings of Spastic Cerebral Palsy ActiveLearningTemplate: System Disorder

Outcomes

Please see page 6 for an explanation of the Scores and Topics to Review sections

Page 2 of 6

Nursing Process	No of Items	Individual Score	Description
RN Assessment	11	45.5%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	9	88.9%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Planning	10	60.0%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measureable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	24	50.0%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.
RN Evaluation	6	83.3%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.

Priority Setting	No of Items	Individual Score	Description
	7	57.1%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

Thinking Skills	No of Items	Individual Score	Description
Foundational Thinking in Nursing	4	50.0%	Ability to recall and comprehend information and concepts foundational to quality nursing practice.
Clinical Judgment/Critical Thinking in Nursing	56	60.7%	Ability to use critical thinking skills (interpretation, analysis, evaluation, inference, and explanation) to make a clinical judgment regarding a posed clinical problem. Includes cognitive abilities of application and analysis.

NCLEX®	No of Items	Individual Score	Description
RN Management of Care	4	25.0%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Control	7	57.1%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Health Promotion and Maintenance	5	40.0%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Psychosocial Integrity	3	66.7%	The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.
RN Basic Care and Comfort	6	33.3%	The nurse provides nursing care to promote comfort and assist client to perform activities of daily living.
RN Pharmacological and Parenteral Therapies	6	66.7%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.
RN Reduction of Risk Potential	12	83.3%	The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.
RN Physiological Adaptation	17	64.7%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

QSEN	No of Items	Individual Score	Description
Safety	15	46.7%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	11	63.6%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	33	66.7%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
Teamwork and Collaboration	1	0.0%	The delivery of client care in partnership with multidisciplinary members of the health care team, to achieve continuity of care and positive client outcomes.

NLN Competency	No of Items	Individual Score	Description
Human Flourishing	11	54.5%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	46	63.0%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Professional Identity	2	0.0%	Professional identity reflects the professional development of the nurse as a member and leader of the health care team who promotes relationship-centered care, and whose practice reflects integrity and caring while following ethical and legal guidelines.
Spirit of Inquiry	1	100.0%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

BSN Essentials	No of Items	Individual Score	Description
Liberal Education for Baccalaureate Generalist Nursing Practice	5	60.0%	The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems.
Basic Organization and Systems Leadership for Quality Care and Patient Safety	7	42.9%	The need for nurses to be able to understand power relationships and use decision-making and leadership skills to promote safe practice and quality improvement within health care systems.
Scholarship for Evidence-Based Practice	32	65.6%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Interprofessional Communication and Collaboration	1	0.0%	The need for nurses to be able to function as a member of the healthcare team while promoting an environment that supports interprofessional communication and collaboration with the goal of providing patient-centered care.
Clinical Prevention and Population Health	4	50.0%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Professionalism and Professional Values	1	0.0%	The need for nurses to be able to practice nursing in a professional manner while providing patient-centered care that is caring, respects diversity, and is governed by legal and ethical tenets.
Baccalaureate Generalist Nursing Practice	10	70.0%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

Score Explanation and Interpretation

Individual Performance Profile

INDIVIDUAL SCORE

The individual score is the number of questions answered correctly divided by the number of questions on the assessment. It is on a scale of 0% to 100%.

TOPICS TO REVIEW

Based on the questions missed on this assessment, a listing of content areas and topics to review is provided. A variety of learning resources may be used in the review process, including content, images, animations, and videos in ATI's Content Mastery Series® Review Modules, online practice assessments, and a focused review that is individualized to the questions missed.
