

N431 Adult Health II

Clinical Reflection Form

Name: Rece Doggett

Date: Thanksgiving Break

Clinical Rotation Site:       Emergency

1. Briefly write about today's experience(s)

On this day I was able to start over 4 IVs successfully and got to administer multiple medications including solumedrol, Lasix, and a tetanus shot. The environment was very stimulating, and the staff is wonderful. This is the best clinical rotation site I have ever experienced and would be more than willing to spend the entire clinical in emergency. There is always something to do and it is a fast-paced environment to keep you in line.

2. What is one thing you learned?

Time management is imperative. This may be one of the hardest things to manage in the emergency department and they can teach a ton of tips and tricks to help speed up and improve the quality of care in a shortened amount of time.

3. What is one thing you would do differently?

Personally, I should have asked to do more things instead of waiting to be asked to do things. Nurses must be assertive to get the job done (in a nice way).

4. What is your major "take home" from today's clinical experience(s)?

"Nursing can change your life for the better when you go to school for it." – Kaitlyn the nurse

5. Is there anything else you would like to mention?

Even though I was on school break during this time, I had a wonderful time with this clinical instructor and she made the whole experience a ton better.
