

N431 Adult Health II

Clinical Reflection Form

Name: Rece Doggett
clinical

Date: Week 6 of

Clinical Rotation Site: CCU

1. Briefly write about today's experience(s)

While in the CCU I got to see more than I got to due because there are limits to what students can do. One thing that was a ton of fun that I got to do was help clean a central line in the client's neck. This was a good learning experience and not only that, but it was a previous lakeview student who helped walk me through it.

2. What is one thing you learned?

One thing I learned during this rotation is that the emergency department may not be the only place that I would like to work some day.

3. What is one thing you would do differently?

I do not think I would have done anything differently during this clinical because it was a great experience. I had better social and educational development here compared to previous and post clinicals on the med-surg floor.

4. What is your major "take home" from today's clinical experience(s)?

Its not always good to think one way of doing things is the only right way. There are multiple ways of doing a procedure correctly (establish your own routine).

5. Is there anything else you would like to mention?

No, thank you!
