Individual Performance Profile

N433 Final Exam Danville Fall 2020

Outcomes

Acute/Chronic	No of Items	Individual Score	Description
Acute	41	92.7%	A disease, condition or injury characterized by a relatively sudden onset of symptoms that are usually severe. An episode of acute disease results in: recovery to a state comparable to the client's condition of health and activity before the disease; progression into a chronic illness; or death.
Chronic	12	83.3%	A disease or condition that persists for 6 months or more, or in which a cure is not expected. Chronic diseases generally cannot be prevented by vaccines or cured by medication, nor do they just disappear.

Bloom's Taxonomy	No of Items	Individual Score	Description
Evaluate	14	100.0%	Appraise information to make a judgment based on standards.
Analyze	9	100.0%	Examine detailed information methodically to determine relationships.
Apply	34	91.2%	Use information in a variety of situations.
Understand	7	100.0%	Explain the meaning of information.
Remember	1	100.0%	Recall relevant information.

Individual Performance Profile

N433 Final Exam Danville Fall 2020

Body Function	No of Items	Individual Score	Description
Cardiac Output and Tissue Perfusion	13	84.6%	The anatomical structures (heart, blood vessels, and blood) and body functions that support adequate cardiac output and perfusion of body tissues.
Cognition and Sensation	9	100.0%	The anatomical structures (brain, central and peripheral nervous systems, eyes and ears) and body functions that support perception, interpretation, and response to internal and external stimuli.
Excretion	7	100.0%	The anatomical structures (kidney, ureters, and bladder) and body functions that support filtration and excretion of liquid wastes, regulate fluid and electrolyte and acid-base balance.
Immunity	2	100.0%	The anatomic structures (spleen, thymus, bone marrow and lymphatic system) and body functions related to inflammation, immunity, and cell growth.
Ingestion, Digestion, Absorption & Elimination	11	100.0%	The anatomical structures (mouth, esophagus, stomach, gall bladder, liver, small and large bowel, rectum, and anus) and body functions that support ingestion, digestion, and absorption of food and elimination of solid wastes from the body.
Integument	7	100.0%	The anatomical structures (skin, hair, and nails) and body functions related to protecting the inner organs from the external environment and injury.
Mobility	2	100.0%	The anatomical structures (bones, joints, and muscles) and body functions that support the body and provide its movement.
Oxygenation	5	100.0%	The anatomical structures (nose, pharynx, larynx, trachea, and lungs) and body functions that support adequate oxygenation of tissues and removal of carbon dioxide.
Regulation and Metabolism	3	100.0%	The anatomical structures (pituitary, thyroid, parathyroid, pancreas, and adrenal glands) and body functions that regulate the body's internal environment.

Individual Performance Profile

N433 Final Exam Danville Fall 2020

BSN Essentials	No of Items	Individual Score	Description
Liberal Education for Baccalaureate Generalist Nursing Practice	1	100.0%	The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems.
Basic Organization and Systems Leadership for Quality Care and Patient Safety	1	100.0%	The need for nurses to be able to understand power relationships and use decision-making and leadership skills to promote safe practice and quality improvement within health care systems.
Scholarship for Evidence-Based Practice	6	100.0%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Information Management and Application of Patient Care Technology	1	100.0%	The need for nurses to be able to use computer-based information management systems and patient care technology in the provision of client care.
Clinical Prevention and Population Health	9	88.9%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Baccalaureate Generalist Nursing Practice	64	92.2%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

Clinical Areas	No of Items	Individual Score	Description
Fundamentals	1	100.0%	Ability to apply fundamental nursing principles and skills to basic needs of clients. Topics include foundational client care concepts (ie: medical and surgical asepsis, infection control, physical assessment, therapeutic communication, medication administration, pain management integral to the delivery of safe, ethical, and legal nursing practice.
Nursing Care of Children	87	92.0%	Ability to apply nursing knowledge to clinical problems experienced by children. Topics include basic concepts (e.g., medication administration, physical assessment, nutritional needs), care of children with various system disorders, care of children experiencing pediatric emergencies (e.g., accidental poisoning, respiratory arrest), and care of children with psychosocial disorders.
Pharmacology	1	100.0%	Ability to apply concepts related to the pharmacodynamics and pharmacotherapeutics of commonly prescribed medications for clients with physical and mental health disorders. Topics include principles of medication administration and dosage calculation, side/adverse effects, drug/food interactions, contraindications, and nursing implications integral to the safe administration of medications to clients across the lifespan.

Individual Performance Profile

N433 Final Exam Danville Fall 2020

Critical Thinking	No of Items	Individual Score	Description
Foundational Thinking in Nursing	19	89.5%	Ability to recall and comprehend information and concepts foundational to quality nursing practice.
Clinical Judgment/Critical Thinking in Nursing	65	93.8%	Ability to use critical thinking skills (interpretation, analysis, evaluation, inference, and explanation) to make a clinical judgment regarding a posed clinical problem. Includes cognitive abilities of application and analysis.

Dosage Calculation	No of Items	Individual Score	Description
Medication Order	1	100.0%	Correctly interprets medication orders and identifies errors/omissions.
Oral Dosage	2	100.0%	Correctly calculates oral medication dosages.
Multi-Step Dosage Calculation	1	100.0%	Correctly Calculates dosages based upon client weight.
Dosage Calculation	2	100.0%	Correctly Calculates dosages to administer based upon available dose.

NCLEX RN	No of Items	Individual Score	Description
RN Management of Care	13	84.6%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Control	5	80.0%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Health Promotion and Maintenance	24	95.8%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Basic Care and Comfort	1	100.0%	The nurse provides nursing care to promote comfort and assist client to perform activities of daily living.
RN Pharmacological and Parenteral Therapies	6	100.0%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.
RN Reduction of Risk Potential	11	100.0%	The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.
RN Physiological Adaptation	28	92.9%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

Individual Performance Profile

N433 Final Exam Danville Fall 2020

NLN Competency	No of Items	Individual Score	Description
Human Flourishing	13	100.0%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	60	91.7%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Spirit of Inquiry	6	100.0%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

Nursing Process	No of Items	Individual Score	Description
RN Assessment	26	96.2%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	18	83.3%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Planning	7	100.0%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	32	93.8%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.
RN Evaluation	4	100.0%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.

Individual Performance Profile

N433 Final Exam Danville Fall 2020

Priority Setting	No of Items	Individual Score	Description
Priority Setting	7	100.0%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

QSEN	No of Items	Individual Score	Description
Safety	8	75.0%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	24	95.8%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	15	100.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
