

Justin Pranada
N443 - Clinical
1/20/2021 - Wednesday

I was in the ED at Sarah Bush Lincoln for this clinical. For this clinical, I was in POD 1 with Hayley. The charge nurse was Stephanie and she delegated assignments to her staff nurses well. She coordinated the ED properly and was very organized in the things that she did. She placed new patients in proper pods where the nurse to patient ratio was appropriate for the workload.

All in all, the experience for this clinical was decent. I learned some new things from my nurse and doctors who were in the ED. I learned how to use a Doppler on a patient who had left leg pain. The patient's leg was cold and had weak pulses.
