

N431 Adult Health II

Clinical Reflection Form

Name: Olamide Adewole

Date: 02/10/2021

Clinical Rotation Site: Emergency department

1. Briefly write about today's experience(s)

Today's experience was great. I learnt so much from my preceptor Lauren, who was acting as both the triage nurse and the emergency department nurse.

2. What is one thing you learned?

I learnt how to work a syringe pump, which I didn't even know existed. It was used to administer iron sucrose to a patient with heavy vaginal bleeding.

3. What is one thing you would do differently?

I don't think there would be anything I would have done differently at clinical besides wearing more comfortable shoes. It's hard to learn when your shoes are pinching your feet.

4. What is your major "take home" from today's clinical experience(s)?

I learnt from the doctor "if you order one stat EKG, order another one, because the first one might be accurate".

5. Is there anything else you would like to mention?

Is No, there is nothing else to mention.
