

Module: Virtual Interaction: Adolescent clients at risk for suicide

Simulation: The Communicator 2.0

Individual Performance Profile

Individual Name: christine nlandu

Student Number:

Institution: Lakeview CON

Program Type: BSN

Please note that time spent on your Individual Performance Profile reflects only conversations fully completed.

Time Use and Score

Virtual Interaction: Adolescent clients at risk for suicide	Date	Time Spent	Score(Points)
— Practice: Justin	03/29/2021	22:22	Complete

Scenario

Justin is presenting with headaches, but his provider has not found a physical cause for them. Talk with Justin about the stress in his life and assess his mental health.

Overall Engagement

Overall Engagement

0 of 0 points

Selected option:

Good job assessing Justin's level of suicide risk and building his buy-in for a referral.

Rationale:

It took you longer than four minutes, not counting time spent making menu selections. In real life, you should be able to screen, assess suicide risk, and make a referral in approximately three to four minutes.

Communication Technique Feedback:

Points on technique separate from overall points

Assessing Level of Suicide Risk

0 of 0 points

Rationale:

Good job. You uncovered stressors in Justin's life, noticed hints of suicidal ideation, and asked about it. It took you longer than five minutes, not counting the time you spent making menu selections. You may have taken time to explore different pathways here, but in real life you should be able to screen a client in approximately three to five minutes.
